List Price \$152.00 Servicemen's Price \$84.00

The Jewell Pattern 444 Set Analyzer tests every circuit in any set, including those using variable mu. and output and radio frequency pentode tubes.

An improved switching system for selecting circuit tests separates all A.C. and D.C. tests. This speeds testing and greatly reduces the possibility of securing incorrect readings.

In addition to all the voltage and current measuring ranges being available at time saving pin jack terminals, a triple range output meter circuit and a triple range ohmmeter are provided for use in set servicing. A.C. current ranges up to 8 amperes are provided for servicing other household appliances such as vacuum cleaners, oil burners, and electric refrigerators.

Every possible feature has been incorporated that will reduce wear and make the instrument more sturdy. The elimination of binding posts which loosen and break, non-shatterable glass scale covers, and a test plug and cable that are separable from the analyzer by a multi-plug at the instrument panel are typical examples.

The Jewell Analyzer Data Service is more complete than ever this season, and adds greatly to the value of this instrument.
