Rationale for Geologic Isolation of High-level Radioactive Waste, and Assessment of the Suitability of Crystalline Rocks Harry Wynn Smedes, 1980 Scientific Basis for Nuclear Waste Management Clyde J. Northrup, 2013-12-19 The Symposium on the Scientific Basis for Nuclear Waste Management was held in the fall of 1979 in Boston Massachusetts and was one of a number of symposia included in the Annual Meeting of the Materials Research Society The thrust of this annual Symposium is unique in the area of waste management Recognizing that this is an area of great complexity which requires contributions from scientists with many different backgrounds some of which are not normally associated with nuclear energy the Materials Research Society provides a forum for discussions of a wide range of materials behavior and transport phenomena As can be seen from the list of references in each paper the authors draw heavily on contributions associated with professional societies in addition to the Materials Research Society and this annual meeting encourages the cross fertilization between disciplines that are essential to an adequate treatment of the problems associated with nuclear waste management The proceedings of the first Symposium that was held in 1978 was designated as Volume 1 in this series The third Symposium is scheduled for 1980 The scope of the 1979 Symposium was guided by the Steering Committee R L Schwoebel Sandia Laboratories USA Chairman W Carbiener Battelle Memorial Institute Columbus USA D Ferguson Oak Ridge National Laboratory USA W Heimerl DWK Mol Belgium W Lutze Hahn Meitner Institut Berlin W Germany J D Mather Institute of Geological Sciences Harwell UK G Oertel Department of Energy USA R **An Annotated Bibliography for the Design of Waste Packages for Geologic Disposal of Spent Fuel and High-level Waste** K.
