The technical complexities of C-14 dating can baffle archaeologists.

This book attempts their rescue. It is by specialists for non-specialists.

The realisation that the production rate of C-14 in the atmosphere was not constant undermined the assumption that C-14 years could be equated with calendar years.

Correction by calibration with cross-dated tree-ring radio-carbon samples offers hope, but creates 'correction curves' of bewildering variety.

This book explains the issues clearly and simply, provides valuable comparative data, assesses the reliability of the methods, tells how to take a sample, and where to send it for dating.

**Climate and Cultural Change in Prehistoric Europe and the Near East** Peter F. Biehl,Olivier P. Nieuwenhuys,2016-11-23 The subject of climate change could hardly be more timely In Climate and Cultural Change in Prehistoric Europe and the Near East an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change

as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations **California Prehistory** Terry L. Jones, Kathryn A. Klar, 2007-07-16 Some forty scholars examine California s prehistory and archaeology looking at marine and terrestrial palaeoenvironments initial human colonization linguistic prehistory early forms of exchange mitochondrial DNA studies and rock art This work is the most extensive study of California s prehistory undertaken in the past 20 years An essential resource for any scholar of California prehistory and archaeology **Radiocarbon Dating** R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor s seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the 14C method in archaeology and analyzes factors that affect the accuracy and precision of 14C based age estimates In addition to reviewing the basic principles of the method it examines 14C dating anomalies and means to resolve them and considers the critical application of 14C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for 14C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record **The Drowning of a Cornish Prehistoric Landscape** Andy M. Jones, Michael J. Allen, 2023-06-01 Between 2018 and 2019 Cornwall Archaeological Unit undertook two projects at Mount s Bay Penwith The first involved the excavation of a Bronze Age barrow and the second environmental auger core sampling in Marazion Marsh Both sites lie within an area of coastal hinterland which has been subject to incursions by rising sea levels Since the Mesolithic an area of approximately 1 kilometer in extent between the current shoreline and St Michael s Mount has been lost to gradually rising sea levels With current climate change this process is likely to occur at an increasing rate Given their proximity the opportunity was taken to draw the results from the two projects together along with all available existing environmental data from the area For the first time the results from all previous palaeoenvironmental projects in the Mount s Bay area have been brought together Evidence for coastal change and sea level rise is discussed and a model for the drowning landscape presented In addition to modeling the loss of land and describing the environment over time social responses including the wider context of the Bronze Age barrow and later Bronze Age metalwork deposition in the Mount s Bay environs are considered The effects of the gradual loss of land are discussed in terms of how change is perceived its effects on community resilience and the construction of social memory and narratives of place The volume presents the potential for nationally significant environmental data to survive which demonstrates the long term effects of climate change and rising sea levels and peoples responses to these over time

*Modelling Human-Environment Interactions in and beyond Prehistoric Europe* Samuel Seuru, Benjamin Albouy, 2023-07-25 This book offers insight into the relationship between prehistoric and protohistoric human populations and the world around them It reconstructs key aspects of the palaeoenvironment from large scale drivers of environmental conditions such as climate to more regional variables such as vegetation cover and faunal communities The volume underscores how computational archaeology is leading the way in the study of past human environment interactions across spatial and chronological scales With the increased availability of high resolution climate models agent based modelling palaeoecological proxies and the mature use of Geographic Information System in ecological modelling archaeologists working in interdisciplinary settings are well positioned to explore the intersection of human systems and environmental affordances and constraints These methodological advancements provide a better understanding of the role humans played in past ecosystems both in terms of their impact upon the environment and in return the impact of environmental conditions on human systems They may also allow us to infer past ecological knowledge and land use patterns that are historically contingent rather than environmentally determined This volume gathers contributions that combine reconstructions of past environments and archeological data with a view to exploring their complex interactions at different scales and invites scholars from varying disciplines and backgrounds to present and compare different modelling approaches

**The Dover Bronze Age Boat** Peter Clark, 2013-02-15 Tells the dramatic story of the discovery in 1992 of the perfectly preserved remains of a large prehistoric sewn plank boat in Dover a unique find of a boat capable of cross channel sailing It includes carefully researched reconstruction drawings

*The Oxford Handbook of the Prehistoric Arctic* T. Max Friesen, Owen K. Mason, 2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate limited range of resources and remoteness from populated areas Despite these factors it holds a complex and lengthy history relating to Inuit Iupiat Inuvialuit Yupik and Aleut peoples and their ancestors The artifacts dwellings and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost allowing archaeologists to reconstruct their lifeways with great accuracy Furthermore the combination of modern Elders traditional knowledge with the region's high resolution ethnographic record allows past peoples lives to be reconstructed to a level simply not possible elsewhere Combined these factors yield an archaeological record of global significance the Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies the complex process of interaction between indigenous peoples and Europeans and the dynamic relationships between environment economy social organization and ideology in hunter gatherer societies In the *The Oxford Handbook of the Prehistoric Arctic* each arctic cultural tradition is described in detail with up to date coverage of recent interpretations of all aspects of their lifeways Additional chapters cover broad themes applicable to the full range of arctic cultures such as trade stone tool technology ancient DNA research and the relationship between archaeology and modern arctic communities The resulting

volume written by the region's leading researchers contains by far the most comprehensive coverage of arctic archaeology ever assembled
