Kozmin, Sergey M. Smolskiy, 2009-07-24 *Radio Monitoring Problems Methods and Equipment* offers a unified approach to fundamental aspects of Automated Radio Monitoring ARM. The authors discuss the development, modeling, design, and manufacture of ARM systems. Data from established and recent research are presented and recommendations are made on methods and approaches for solving common problems in ARM. The authors also provide classification and detailed descriptions of modern high efficient hardware software ARM equipment including the equipment for detection, radio direction finding, parameters measurement and their analysis and the identification and localization of the electromagnetic field sources. Examples of ARM equipment structure, applications and software are provided to manage a variety of complicated interference environment in the industrial centers, inside of the buildings and in the open terrain. This book provides a reference for professionals and researchers interested in deploying ARM technology as a tool for solving problems from radio frequency spectrum usage control. *Radio-electronic Engineering*, 1953.
