Carlo Patrono, Bernhard A. Peskar

Radioimmunoassay In Clinical Biochemistry:

Radioimmunoassay in Clinical Biochemistry Charles Alexander Pasternak, 1975 *Radioimmunoassay in Basic and Clinical Pharmacology* Carlo Patrono, Bernhard A. Peskar, 2012-12-06 Thirty years have elapsed since the first description by S A BERSON and R S YALOW of the basic principles of radioimmunoassay RIA During this period of time RIA methodology has been instrumental to the growth of many areas of biomedical research including endocrinology oncology hematology and pharmacology It has done so by providing a relatively simple universal tool allowing for the first time the detection of endogenous mediators that are present in body fluids at concentrations as low as 10^{-10} M The fundamental nature of this discovery and the wide ranging fall out of basic and clinical knowledge derived from its application have been acknowledged by the many honors tributed to its pioneers including the Nobel Prize awarded to Dr YALOW 10 years ago Although several excellent books have been published during the past decades covering various aspects of RIA methodology we felt the need as pharmacologists for a comprehensive discussion of the methodological and conceptual issues related to the main classes of mediators of drug action and to drugs themselves Thus we gladly accepted the challenge provided by the invitation to edit a volume of the Handbook of Experimental Pharmacology on Radioimmunoassay in Basic and Clinical Pharmacology We tried to balance the emphasis placed on more general aspects of the RIA methodology and that on specific mediators *Annals of Clinical Biochemistry*, 2001 *Clinical Biochemistry V2* Herbert Spiegel, 2012-12-02 Clinical Biochemistry Contemporary Theories and Techniques Volume 2 is a collection of papers that deals with coagulation chemistry inborn errors of metabolism IEM and the biochemistry of aging One paper explains the biochemistry and clinical importance of lipoprotein X LP X as a marker for obstructive jaundice and also as a pointer in the deficiency of lecithin cholesterol acyltransferase LCAT a rare inborn error of metabolism Another paper presents guidelines in determining radioimmunoassay that are used for example in identifying enzymes produced by various malignant lesions One paper reviews the basic molecular events and interactions involved in the blood clotting process and its related systems To determine inborn errors of metabolism the investigator can use screening techniques prenatal diagnosis or therapy and laboratory procedures related to IEM To correct errors at the gene level transgenesis and genetic engineering use recombinant DNA research techniques involving the introduction of a foreign DNA into the host cell Some examples of IEM are phenylketonuria and hyperphenylalaninemia without PKU This collection can prove useful for the clinical chemists endocrinologists internists medical practitioners and investigators involved in research on biochemistry Practical Clinical Biochemistry Ranjna Chawla, 2014-04-30 Fully revised new edition presenting latest developments in medical biochemistry Includes many new chapters and case reports Previous edition published in 2006 *New Developments in Immunoassays* H. Schönfeld, 1979-03-07 **Radioimmunoassay in Clinical Biochemistry** C.A. Pasternak, 1975 **Festschrift - The Institute of Nuclear Medicine** University College, 2011-10-23 The Institute of Nuclear Medicine founded in 1961 celebrates

with this Festschrift its Golden Jubilee It has been a remarkable 50 years of progress of the radionuclide tracer methodology From initial physiology based experimentation a full independent medical discipline evolved and with it a comprehensive clinical service Diagnosis and Treatment with radiotracers have established the basis for Nuclear Medicine Technological advances have permeated the field like none other its multidisciplinary character and its translational research are embedded in the history of the Institute and its success Recent and latest advances in the field promise a future as bright as has been witnessed and documented in the last 50 years

The Analysis of Drugs in Biological Fluids Joseph Chamberlain, 2018-02-06 This new edition focuses on a variety of techniques available for the analysis of drugs in biological fluids Over 150 figures and tables help to describe the latest advances and give examples of their applications Current chiral analysis methods as well as discussions on the impact of chirality are described Practical aspects of bioanalytical work including many examples of laboratory problems not often reported in the scientific literature are examined in depth

Clinical Biochemistry of Steroid Hormones J. K. Grant, G. H. Beastall, 1983 **Practical Medical Biochemistry** DC Sharma, Manminder Riyat, 2016-01-01 The third edition presents thoroughly revised and updated text in a simple and easy to understand language The book systematically presents the principles requirements methods and interpretation of results of various experiments performed in practical biochemistry classes

Immunoassays for Clinical Chemistry W. M. Hunter, J. E. T. Corrie, 1983 **Immunoassays for the 80s** A. Voller, A. Bartlett, D. Bidwell, 2012-12-06 Analyses for naturally occurring biological substances or administered materials have been with us for many years These were usually based on the physical or chemical characteristics of the substances to be measured However in recent years there has been an explosion of interest in analytical methods which made use of the high specificity and sensitivity of immunological reactions These methods can be very simple in terms of technical procedures and can usually be performed on minute samples of biological fluids factors which have ensured their ready acceptance in most laboratories Recently there have been numerous meetings on technical aspects of particular immunoassays and on their application in specific diseases We felt however that the time was ripe for an overview of the whole field To this end a conference on Immunoassays for the 80s was held at the Zoological Society of London in 1980 and this book is largely based on that meeting Both the immunoassay techniques and their numerous applications were discussed and are dealt with at length in this volume The editors wish to thank all the contributors for their chapters and to acknowledge the debt they owe to Jean Ryan NLCM without whose organization and assistance this volume would not have been completed A V D B A B

27th International Congress of Pure and Applied Chemistry A. Varmavuori, 2013-10-22 27th International Congress of Pure and Applied Chemistry is a collection of lectures presented at the 27th Congress of the International Union of Pure and Applied Chemistry held in Helsinki Finland on August 27 31 1979 The event covers a wide range of topics relating to chemistry including biotechnology and bioengineering trace element analysis modern methods in clinical chemistry and analysis and structure of cell membrane carbohydrates Chemometrics is

Methods in Neurobiology Robert Lahue, 2013-11-21 Rapid advances in knowledge have led to an increasing interest in neurobiology over the last several years These advances have been made possible at least in part by the use of increasingly sophisticated methodology Furthermore research in the most rapidly advancing areas is essentially multidisciplinary and is characterized by contributions from many investigators employing a variety of techniques While a grasp of fundamental neurobiological concepts is an obvious prerequisite for those who wish to follow or participate in this field critical awareness and evaluation of neurobiological research also requires an understanding of sophisticated methodologies The objective of *Methods in Neurobiology* is the development of such critical abilities The reader is exposed to the basic concepts principles and instrumentation of key methodologies and the application of each methodology is placed in the special context of neurobiological research The reader will gain familiarity with the terminology and procedures of each method and the ability to evaluate results in light of the particular features of neurobiological preparations and applications
