Rail Gun Jonathan Moeller, 2017-12-08 The galaxy is at war but wars are won and lost in the shadows Sent to Mercator Station to stop a flow of weapons to a terrorist group Jack March must keep all his wits about him Because if he is not careful he will be the terrorists next victim *Railway Guns* John Goodwin, 2016-08-30 In the nineteenth century the War Office showed little interest in developing large heavy artillery for its land forces preferring instead to equip its warships with the biggest guns Private initiatives to mount a gun on a railway truck pulled by a steam engine were demonstrated before military chiefs in the Southern Counties but not taken up However the development of longer range guns weighing up to 250 tons to smash through the massive armies and trench systems on the Western Front in 1916 led to a rethink The only way to move these monsters about quickly in countryside thick with mud was to mount them on specially built railway trucks towed by locomotives The railway guns were to be put on little used country lines where they could fire on beaches road junctions and harbors The locations and cooperation given by the independent railway companies is explained as are the difficulties of using the same lines for war and civilian traffic The First World War also saw the emergence of large training camps for railway men When the war ended most railway guns were dismantled and lost in ordnance depots The Army Council was uncertain about artillery needs in a future war so training and development stopped This book largely concentrates on the realities of the time the type of gun the locomotives artillery targets locations and what it was like when firing took place It is fully illustrated with pictures maps and plans covering different aspects of railway guns their locomotives and equipment

Railway Guns of World War I Marc Romanych,Greg Heuer,2017-08-24

World War I was the Golden Age of the railway gun Even though at the start of the conflict none of the armies possessed any railway artillery pieces and the very idea was comparatively new more railway guns were used during this war than in any other conflict Designed to break the stalemate of trench warfare the first railway guns were simple improvised designs made by mounting surplus coastal defence fortress and naval guns onto existing commercial railway carriages As the war dragged on railway artillery development shifted to longer range guns that could shell targets deep behind enemy lines This change of role brought much larger and more sophisticated guns often manufactured by mounting long barrel naval guns to specially designed railway carriages This book details the design and development of railway guns during World War I from the very first basic designs to massive purpose built monster railway guns Accompanying the text are many rare never before published photographs and colour illustrations depicting how these weapons were used during World War I

Lepage,2017-08-23 Featuring 256 drawings this history of military trains and railways from 1853 through 1953 describes how the railroad transformed the nature of warfare Transport and logistics are discussed for armored trains rail borne artillery and armored combat vehicles medical evacuation trains and draisines light auxiliary vehicles such as handcars The railroad s role in establishing European colonial empires in Asia and Africa is examined Conflicts covered include the Boer Wars the American Civil War the Austro Prussian War the Franco Prussian War the Russo Turkish War World War I the Finnish Civil War the Spanish Civil War World War II and the French Indochina War **A Projectile for a Rectangular Barreled Rail Gun** Francisco M. Juanche,1999-12-01 The Physics Department at the Naval Postgraduate School is developing a concept to overcome the problems that keep present rail guns from being practical weapons The rails must be replaced often if the rail gun operation is to be continuous Replacing the rails in present rail gun configurations is time consuming The Physics Department s design concept uses a rectangular barrel as part of the solution to the problem of replacing the rails The projectile will require flat surfaces to maintain electrical contact with the flat rails and aerodynamic stabilization because of the lack of angular momentum This thesis develops one possible model of a projectile for a rectangular barreled rail gun which could be used to replace the standard five inch gun found on most warships The proposed projectile is successfully modeled as a five inch projectile with flat areas planed onto opposite sides and long chord short span fins attached in a cruciform configuration The computer programs used to develop the projectile model are included to allow evaluation of alternate configurations **British Coastal Weapons vs German Coastal Weapons** Neil Short,2023-04-27 For the first time ever compare the British and German World War II big guns duelling with each other and harrying shipping in the Channel One of the longest running battles of World War II took place across the English Channel in which huge artillery guns attempted to destroy each other created psychological terror among the local inhabitants living near the coast and harassed shipping over a four year period Neil Short examines the array of powerful weapons located across the Strait of Dover Superb colour artworks explore both fixed gun batteries including Jane and Clem and batteries Todt and Lindemann and railway artillery such as the German K5 and K12 guns and the British 18in Boche Buster Construction and targeting technology used by each side are also covered in detail and the locations of all the major sites around Dover and Calais are pinpointed on easy to follow maps **Lunar Redemption** Stephen Phillips,2008-11 Earth s political powers are ensnared in a spiralling descent towards destruction It is an unavoidable Catch 22 dilemma The world is environmentally exhausted and time has run out for mankind Humanity s only hope is to establish a viable colony on the moon It must encompass an environment of miniature ecosystems which are totally removed from the devastation that has

become Earth's inescapable future. The success of the Lunar Colony angers many power brokers on earth. Resentment, jealousy, and fear become the key motivators that ultimately threaten the survival of the colony. Simon and his heroic team stand alone in the harsh vacuum of space. Their mission is to defend the Lunar Colony against those who conspire to destroy it at any cost.

War at the Speed of Light Louis A. Del Monte, 2021-03. War at the Speed of Light describes the revolutionary and ever-increasing role of directed energy weapons such as laser, microwave, electromagnetic pulse, and cyberspace weapons in warfare. Louis A. Del Monte delineates the threat that such weapons pose to disrupting the doctrine of Mutually Assured Destruction, which has kept the major powers of the world from engaging in nuclear warfare. Potential U.S. adversaries such as China and Russia are developing hypersonic missiles and using swarming tactics as a means to defeat the U.S. military. In response, the U.S. Department of Defense established the 2018 National Security Strategy, emphasizing directed energy weapons which project devastation at the speed of light and are capable of destroying hypersonic missiles and enemy drones and missile swarms. Del Monte analyzes how modern warfare is changing in three fundamental ways: the pace of war is quickening, the rate at which weapons project devastation is reaching the speed of light, and cyberspace is now officially a battlefield. In this acceleration of combat, called hyperwar, Del Monte shows how disturbingly close the world is to losing any deterrence to nuclear warfare.
