## **Rainforests Of West Africa:**

**The Rainforests of West Africa** MARTIN, 2013-11-11 Nowhere else in the world did industrialized countries leave such early marks in the rainforest as in West Africa Past and present developments here are in one way or the other significant for rainforests on other continents as well West Africa is a pioneer in both a good and a bad sense This is reason enough to take a closer look at the history of moist tropical West Africa Until recently no one really seemed to be interested in the rainforests except for a few specialists The world's scientific community neglected to study the incalculable riches of tropical forests to make the public aware of them and their due importance Although interdisciplinary research has been a popular topic for some decades now it was not applied to just the most complex habitat on earth Scientists from all fields studied only that which was easiest to record seemingly blind to a myriad of details awaiting closer examination Botanists went about establishing their herbariums and paid much too little attention to the vegetation as a whole or to the significance of useful plants for local populations Zoologists too busied themselves with collecting and describing species Anthropologists on the other hand tended to overlook faunal details in their ignorance of the animal world they wrote of tigers and deer in Africa And finally foresters saw neither the forest nor the trees for the timber and even confused rainforests with monocultures of fir trees

Myth and Reality in the Rain Forest John F. Oates, 1999 This book offers a timely clear headed and uniquely important contribution to conservation one that should be read by all bureaucrats scientists and others involved with development projects that supposedly benefit wildlife and wilderness George B Schaller author of *Wildlife of the Tibetan Steppe*

**Rainforest** Tony Juniper, 2019-09-19 Rainforests have long been recognized as hotspots of biodiversity but they are crucial for our planet in other surprising ways Not only do these fascinating ecosystems thrive in rainy regions they create rain themselves and this moisture is spread around the globe Rainforests across the world have a powerful and concrete impact reaching as far as America's Great Plains and central Europe In *Rainforest Dispatches from Earth's Most Vital Frontlines* a prominent conservationist provides a comprehensive view of the crucial roles rainforests serve the state of the world's rainforests today and the inspirational efforts underway to save them In *Rainforest* Tony Juniper draws upon decades of work in rainforest

conservation He brings readers along on his journeys from the thriving forests of Costa Rica to Indonesia where palm oil plantations have supplanted much of the former rainforest Despite many ominous trends Juniper sees hope for rainforests and those who rely upon them thanks to developments like new international agreements corporate deforestation policies and movements from local and Indigenous communities As climate change intensifies we have already begun to see the effects of rainforest destruction on the planet at large Rainforest provides a detailed and wide ranging look at the health and future of these vital ecosystems Throughout this evocative book Juniper argues that in saving rainforests we save ourselves too

White, Lisa Naughton-Treves, Amy Vedder, 2001-01-01 Extending from west Africa to Madagascar from the vast lowland Congo Basin to the archipelago of forest islands on its eastern rim the African rain forest is surpassed in size only by the Amazon This book sheds light on the current efforts to understand and conserve the African rain forest an area in need of urgent action to save its biological wealth cultural heritage and economic potential Written by conservation scientists and practitioners based in the African rain forest the book offers a multidisciplinary perspective that integrates many biological and social sciences Early chapters trace the forces from paleoecological factors to recent human actions that have shaped the African forest environment The next chapters discuss the dominant biological patterns of species ranging from the distinctive elephants gorillas and okapi to the less well known birds butterflies and amphibians Other chapters focus on how such different groups as hunter gatherers forest farmers bushmeat hunters recent immigrants and commercial foresters have used the forests Several authors stress the need for tighter links between research and conservation action The final section draws lessons from the collective experience of those working in an Africa wracked by political strife and economic hardship

*Tropical Forests in Transition* J. Goldammer,2013-03-08 In evolutionary time scales natural disturbances have affected the vegetation on Earth During the Quaternary the forest biomes of the tropics were subjected to manifold disturbances Climate changes and climate oscillations were associated with changing precipitation and drought regimes flooding siltation landslides etc The prehistorical forest was also influenced by the effects of large wildlife populations Large scale catastrophies in the forest biomes were mainly caused by abiotic environmental alterations the small scale disturbances were and still are related to both biotic and abiotic processes Both the large and the small scale disturbances have played a significant role in shaping distribution dynamics structure and composition of the paleoforest After the expansion of hominids and early humans and later by modern humans the anthropogenic influences on the tropical forest began to overlap natural disturbances Today s anthropogenic impacts on the tropical forests differ qualitatively and quantitatively from the natural disturbances The speed of tropical deforestation and savannization is dramatically increasing The physical and chemical impacts of forest conversion and biomass burning add to other anthropogenic influences on the atmosphere and climate The expected anthropogenic climate change will also have considerable impacts on the tropical flora and fauna The book on Tropical Forests in Transition synthesizes information on changing environmental conditions and human impacts on the tropical forest by looking back to

the paleoecology analyzing the impact of modern human populations and modeling the future of the tropical forest in a changing environment The aim of the book is to strengthen multidisciplinary thinking in disturbance ecology     *Instant Insights: Sustainable tropical forest management* Mr Patrick D. Hardcastle, Dr Alice Muchugi, Dr Sammy Muraguri, Dr Hesti L. Tata, Professor Jürgen Blaser, Prof Francis E. Putz, Dr Ian D.
