Second Language Acquisition And The Critical Period Hypothesis:

Second Language Acquisition and the Critical Period Hypothesis David Birdsong, 1999-01-01 Second Language Acquisition and the Critical Period Hypothesis is the only book on the market to provide a diverse collection of perspectives from experienced researchers on the role of the Critical Period Hypothesis in second language acquisition. It is widely believed that age effects in both first and second language acquisition are developmental in nature with native levels of attainment in both to be though possible only if learning began before the closure of a window of opportunity a critical or sensitive period. These seven chapters explore this idea at length with each contribution acting as an authoritative look at various domains of inquiry in second language acquisition including syntax morphology phonetics phonology Universal Grammar and neurofunctional factors. By presenting readers with an evenly balanced take on the topic with viewpoints both for and against the Critical Period Hypothesis this book is the ideal guide to understanding this critical body of research in SLA for students and researchers in Applied Linguistics and Second Language Acquisition. **The Age Factor in Second Language Acquisition** David Michael Singleton, Zsolt Lengyel, 1995-01-01 This book takes a hard look at some of the assumptions that are customarily made concerning the role of age in second language acquisition. The evidence and arguments the contributors present run counter to the notion that an early start in second language learning is of itself either absolutely sufficient or necessary for the attainment of native like mastery of a second language. Another theme of the book is a doubt that there is a particular stage of maturity beyond which language learning is no longer fully possible. In short the book presents a challenge to those who take it as given that second language learning is inevitably different in its essential nature from language acquisition in the childhood years and that second language knowledge acquired beyond the critical period is in all circumstances and in all respects doomed to fossilize at a non native like level. Second Language Acquisition and the Critical Period Hypothesis David Birdsong, 1999 The Critical Period Hypothesis Sabine Starzer, 2013-11-25 Seminar paper from the year 2013 in the subject English Language and Literature Studies Linguistics grade 2 University of Vienna Anglistik course Proseminar Linguistik language English abstract When it comes to learning a language there seems to be a certain period in which a child must acquire the basic competences in order to be able to understand and use language. This window of opportunity is also called critical period and has been the subject of much research over the last decades. Especially for future language teachers the question about the existence of such a critical period for second language acquisition as well arises. This paper examines the actual research on critical period for second language acquisition and sheds light on the on going academic discussion. The paper proceeds as follows: section 2 provides a short description of the Critical Period Hypothesis and sheds light on biological and neurological aspects of language learning. In section 3 recent findings of research according to critical periods in second language acquisition are presented and discussed. Section 4 contains a list with personal characteristics and strategies having emerged out of different studies.

These characteristics might help second language learners to gain more success in their goal to reach the status of native speakers. This of course can also be useful for language teachers who want to support their learners. Section 5 provides a short conclusion.

Is there a Critical Period Hypothesis in Second Language Acquisition? Jochen Mueller, 2014-05-06
 Studienarbeit aus dem Jahr 2013 im Fachbereich Didaktik für das Fach Englisch Pädagogik Sprachwissenschaft Note 3,0
 Universität zu Köln Sprache Deutsch Abstract This paper wants to research into the question of the existence of a Critical Period Hypothesis CPH in Second Language Acquisition SLA. Further since this theory was already introduced in the early 60s I will have a closer look at the modifications of the CPH i.e. the Sensitive Period Hypothesis SPH. By the help of taking some of the findings from different studies into account I will try to answer the underlying question.

Fossilization in Adult Second Language Acquisition Zhaohong Han, 2004 This book is a systematic attempt to address the issue of fossilization in relation to a fundamental question in second language acquisition research which is why are learners adults in particular unable to develop the level of competence they have aspired to in spite of continuous and sustained exposure to the target language adequate motivation to learn and sufficient opportunity to practice.

Age Effects on Second Language Acquisition Jule Dorin, 2015-11-19 Studienarbeit aus dem Jahr 2015 im Fachbereich Anglistik Linguistik Note 1,7 Universität Paderborn Veranstaltung Second Language Acquisition Sprache Deutsch Abstract It is a widespread belief that the acquisition of a foreign language is much easier for children rather than for adults It is said that the younger the learner the better the outcome will be The same applies for the assumption that an adult learner of a foreign language cannot reach native like competence no matter how long the process of acquisition will take whereas a child indeed can acquire a perfect language without even the hint of a foreign accent Furthermore there is a common notion that the age of onset of the acquisition of a second language plays a role in its further development Indeed the acquisition of a foreign language can be a frustrating and very tough experience for adults in whereas it seems to be a facile and fast proceeding process for children or adolescents A possible answer to these beliefs may be found in the Critical Period Hypothesis which states that the age is a major factor for second language acquisition henceforth SLA and that there is a time span where the acquisition of a language functions best On the other hand there are studies which want to make clear that in fact the contrary is true or as well that age has no influence at all when it comes to SLA This paper aims to find out if there indeed is a connection between the learner's age and his level of proficiency in the L2

Second Language Acquisition and the Younger Learner Jenefer Philp, Rhonda Oliver, Alison Mackey, 2008 This new volume of work highlights the distinctiveness of child SLA through a collection of different types of empirical research specific to younger learners Characteristics of children's cognitive emotional and social development distinguish their experiences from those of adult L2 learners creating intriguing issues for SLA research and also raising important practical questions regarding effective pedagogical techniques for learners of different ages While child SLA is often typically thought of as simple and often enjoyable and universally effortless in other words as children's play the complex portraits of young second language learners which emerge in the 16 papers collected in this book invite the reader to reconsider the reality for many younger learners Chapters by internationally renowned authors together with reports by emerging researchers describe second and foreign language learning by children ranging from pre schoolers to young adolescents in home and school contexts with caregivers peers and teachers as interlocutors
