Selected Works Of Deng Xiaoping 1975 19:

Endogenous Origins of Economic Reforms in India and China Rajiv G. Maluste, 2011-07 Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005 DeLong 2003 Kohli 1989 and Panagariya 2004 2008 This dissertation provides empirical support for this literature establishing an earlier start for India's economic policy liberalisation than presented in stylized accounts It demonstrates the endogenous nature of the origins of these policy shifts Attitudinal change literature had directed attention to the need for further research into India's policy changes of the early 1980s and for studying broader comparability issues in other developing countries This research makes a contribution towards filling these gaps This dissertation shows that India started its economic liberalisation under the Indira Gandhi administration from 1980 to 1984 These findings depart from the conventional view that India's economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership's attitudinal changes The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977 The new approach entailed more openness towards private enterprise scaling back the role of the public sector and starting India's integration into the global economy The dissertation also discusses the comparable role of attitudinal changes at the start of China's policy liberalisation led by Deng Xiaoping from 1978 to 1982 It focuses on the significance and challenges faced by China's political leadership in bringing about societal attitudinal change The dissertation concludes by drawing comparisons between India and China developing a linkage between their endogenous attitudinal changes and economic policy liberalisation Deng Xiaoping Alexander Pantsov, Steven I. Levine, 2015 This book covers the entire life of

Deng Xiaoping Starting with his childhood and student years to the post Tiananmen era **Mao's Last Revolution** Roderick MacFarquhar, Michael Schoenhals, 2008-03-15 The authors explain why Mao launched the Cultural Revolution and show his Machiavellian role in masterminding it which Chinese publications conceal In its critical analysis of Chairman Mao and its portrait of a culture in turmoil this book offers the most authoritative and compelling account to date of this seminal event in Chinese history *China's Strategy in Space* Stacey Solomon, 2013-06-12 This book addresses why China is going into space and provides up to date information on all aspects of the Chinese Space Program in terms of launch vehicles launch sites and infrastructure crew vehicles for space exploration satellite applications and scientific exploration capabilities Beyond mere capabilities it is important to understand how Chinese aerospace leaders think how they make decisions and what their ultimate goal is during their space endeavors What are Chinese intentions in space To what extent does culture and ethics influence Chinese strategic decision making within the highest levels of the aerospace industrial complex This book examines these questions and offers four potential scenarios on where the Chinese space program is headed based on this new perspective of understanding China's space goals This book is not only required reading for policy

makers and military leaders in the US government but also for the general population students and professionals interested in truly understanding the reasons behind what the Chinese are doing in space *Conquering Resources: The Growth and Decline of the PLA's Science and Technology Commission for National Defense* Benjamin C. Ostrov, Richard P.

Suttmeier, 2019-07-26 This case study seeks to explain how organizations grow and the limits to that growth when an organization engaged in policy implementation lacks the resources necessary to achieve policy goals The discussion of the basis of conflict that emerges from this study is of lasting significance For years studies of this issue have pointed to various models of factionalism stressing the informal character of the groups involved In Professor Ostrov's study however conflict is shown to have a supra Cultural Revolutionary institutional basis in this and other key units *Order and Security in*

Southeast Asia Michael Leifer, 2006 Michael Leifer who died in 2001 was one of the leading scholars of Southeast Asian international relations This is an academic and personal volume devoted to Leifer's vast contributions to the discipline of international relations **Deng Xiaoping and the Transformation of China** Ezra F. Vogel, 2013-10-14 No one in the

twentieth century had a greater impact on world history than Deng Xiaoping And no scholar is better qualified than Ezra Vogel to disentangle the contradictions embodied in the life and legacy of China's boldest strategist the pragmatic disciplined force behind China's radical economic technological and social transformation **China Since Tiananmen** Joseph

Fewsmith, 2001-07-30 China Since Tiananmen is the first book to look comprehensively at the intellectual and political trends in the decade since the Tiananmen Incident 1989 to assess the ways in which China has changed Fewsmith looks on the one hand at the intellectual critique of the enlightenment tradition which had previously held a sacrosanct position in the thinking of liberal intellectuals since the May Fourth Movement of 1919 to explain the rise of neo conservatism and nationalism over the past decade On the other hand he examines the maneuverings of elite political actors to understand the constraints they operate under and how the conduct of elite politics has changed since Tiananmen Together these two approaches give a more comprehensive and realistic assessment of the forces that drive China today These trends are of great importance for anyone trying to understand Sino US relations **On Deng Xiaoping Thought** Jie Wu, 1996 The

Second Chinese Revolution E. Bregolat, 2016-04-30 The Second Chinese Revolution explores some of the keys to understanding China a country whose evolution already affects all of us Beginning in 1978 when China's GDP was only 6% of the USA's the author takes us through the different aspects that have played a fundamental role in the country's change China's eruption in world markets in the background of the West's economic crisis its obsession with science and technology and its relentless march towards a knowledge society and a reassessment of the Tiananmen Square events of June 1989 and the ongoing debate on political reform The book also includes a comparative analysis of the reforms in China and Russia in the last decades *Politics at Mao's Court* Frederick C Teiwes, 2016-07-22 The investigation of the rise and fall of Gao Gang suggests broader implications on the nature of elite politics in the Maoist era The illumination of basic issues in Chinese

politics in the context of this case especially as regards the role of Mao Zedong is relevant not only to the initial post 1949 period of comparative but flawed party unity but also to the structural fault lines of the political system which were later to contribute so significantly to the Cultural Revolution China's Education Development and Policy,1978-2008 Xiulan Zhang,2011-09-30 China s Education Development and Policy 1978 2008 is translated from the original Chinese version and presents the current assessment of the changes to the educational system in China and how those changes have been perceived during the past thirty years *The Evolution of China's Political Economy* Rich Marino,2023-05-01 For years China s rapid economic transformation was hailed as a successful project that lifted hundreds of millions of people out of poverty However in recent times the Chinese narrative has taken a more negative turn in the eyes of the West Much of this has to do with the US perception about the role of the Chinese state in its economy and its military build up especially in the South China Sea There s no question China s complex economy can be difficult to understand Information is often unclear and incomplete and its data are not always reliable However this book presents the reader with a clear picture of China s economy and how it compares to other advanced economies mainly the United States The book unwraps the key features and structures of China s economy Moreover it examines and shows the similarities and differences in comparison with other like economies In that effort it underscores the differences by evaluating their benefits as well as their disadvantages against the backdrop of China s incomplete transition to a market economy This along with its governance structure becomes the crucial components shaping the way key stakeholders will act and react to opportunities and incentives as that economy evolves The book supplements the definition of globalization for the academic the student the professional and anyone else interested in its positive and negative effects It is also a good fit for anyone who wants to understand China s three elements of political economy global trade political power and its image on the global stage *Chinese Foreign Policy in Transition* Guoli Liu,2017-07-12 Since the establishment of the People s Republic of China in 1949 and particularly after the opening brought about by economic reforms roughly thirty years thereafter China has become an influential player in regional and global affairs Increasingly both American and European policymakers examine Chinese foreign policy as a flexible pragmatic and significant element in world affairs This has accelerated in the middle of the new first decade of this century as business firms and political officials have developed interests in the sources processes and significance of China s reemergence as a global force This volume examines how in conjunction with rapid economic growth and profound social transformation China s foreign policy is experiencing significant transition The purpose of this truly deep and probing collection is to deepen Western understanding of the sources substance and significance of Chinese foreign policy with a focus on the post Cold War environment Contributors include academic specialists area researchers and distinguished journalists all with firsthand experience in the field of China studies The volume is divided into four parts 1 theory and culture 2 perspective and identity 3 bilateral relationships and 4 retrospective and prospective essays on Chinese policy concerns The volume is sensitive to

changes in national leadership and Communist Party structure as well as continuity and change in foreign policy As Lowell Dittmer of the University of California notes in his Foreword precisely because it is so difficult to do well the analysis of foreign policy is often conducted rather tritely Thus it is a real pleasure to find assembled here a treasure trove of some of the finest work by some of the field s most penetrating minds This is fortunate for at the core of this volume is one of the biggest and most portentous questions to confront the world at the outset of the twenty first century That Understanding China and India Rollie Lal,2006-04-30 Key to developing national security strategy is figuring out what other countries want What are their national interests How do they perceive them How do they project them onto the world stage Understanding all of this helps us to predict their behavior In developing a national security strategy for Asia the United States must take into account the desires of two emerging giants of the 21st century China and India We would be mistaken Lal argues if we lumped China and India together in one Asian policy because these two countries differ greatly from one another Based on over 120 in depth interviews with government officials and scholars in Beijing and New Delhi the author s research yields some surprising news about the differences between China and India Chinese leaders define their national interest as preservation of the state and territorial unity whereas Indian decision makers define their national interests in relation to forces beyond India such as the forces of globalization and their geopolitical status One factor that accounts for these differences among the many explored in this book is the influence of one party rule in China and parliamentary democracy in India Another important finding is that China and India are unlikely to pursue hostility with each other The U S approach to Asia will need to take these differences into account **Comrades!** Robert Service,2007 Service offers a history of communism drawing the uncomfortable conclusion that the poverty and injustice that enabled its rise are still dangerously alive Unsettling and compelling this is a comprehensive study of one of the most important movements of the modern world

Red China's Green Revolution Joshua Eisenman,2018-04-24 China s dismantling of the Mao era rural commune system and return to individual household farming under Deng Xiaoping has been seen as a successful turn away from a misguided social experiment and a rejection of the disastrous policies that produced widespread famine In this revisionist study Joshua Eisenman marshals previously inaccessible data to overturn this narrative showing that the commune modernized agriculture increased productivity and spurred an agricultural green revolution that laid the foundation for China s future rapid growth Red China s Green Revolution tells the story of the commune s origins evolution and downfall demonstrating its role in China s economic ascendance After 1970 the commune emerged as a hybrid institution including both collective and private elements with a high degree of local control over economic decision but almost no say over political ones It had an integrated agricultural research and extension system that promoted agricultural modernization and collectively owned local enterprises and small factories that spread rural industrialization The commune transmitted Mao s collectivist ideology and enforced collective isolation so it could overwork and underpay its households Eisenman argues that the commune was

eliminated not because it was unproductive but because it was politically undesirable it was the post Mao leadership led by Deng Xiaoping not rural residents who chose to abandon the commune in order to consolidate their control over China Based on detailed and systematic national provincial and county level data as well as interviews with agricultural experts and former commune members Red China's Green Revolution is a comprehensive historical and social scientific analysis that fundamentally challenges our understanding of recent Chinese economic history

The End of the Maoist Era: Chinese Politics During the Twilight of the Cultural Revolution, 1972-1976 Frederick C Teiwes, Warren Sun, 2014-12-18 This book launches an ambitious reexamination of the elite politics behind one of the most remarkable transformations in the late twentieth century As the first part of a new interpretation of the evolution of Chinese politics during the years 1972-82 it provides a detailed study of the end of the Maoist era demonstrating Mao's continuing dominance even as his ability to control events ebbed away The tensions within the gang of four the different treatment of Zhou Enlai and Deng Xiaoping and the largely unexamined role of younger radicals are analyzed to reveal a view of the dynamic of elite politics that is at odds with accepted scholarship The authors draw upon newly available documentary sources and extensive interviews with Chinese participants and historians to develop their challenging interpretation of one of the most poorly understood periods in the history of the People's Republic of China

The End of China's Non-Intervention Policy in Africa Obert Hodzi, 2018-10-22 This book gives a compelling analysis and explanation of shifts in China's non intervention policy in Africa Systematically connecting the neoclassical realist theoretical logic with an empirical analysis of China's intervention in African civil wars the volume highlights a methodical interlink between theoretical and empirical analysis that takes into consideration the changing status of rising powers in the global system and its effect on their intervention behaviour Based on field research and expert interviews it provides a rigorous analysis of China's emergent intervention behaviour in some key African conflicts in Libya South Sudan and Mali and broadens the study of external interventions in civil wars to include the intervention behaviour of non Western rising powers Obert Hodzi is Visiting Researcher at the African Studies Center Boston University USA and Postdoctoral Researcher at the University of Helsinki Finland

State and Market in Higher Education Reforms Hans G. Schuetze, Germán Álvarez Mendiola, Diane Conrad, 2012-09-05 Universities have never been static Even so it is fair to say they have experienced a most radical transformation in the past twenty years During this period the role and responsibility of the state generally have been broadly limited while allowing market forces private ownership and control more influence But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability Education and post secondary education

especially are increasingly seen as matters for markets Formal post secondary education becomes a service commercialized and traded across national borders This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives Chapter authors describe and analyze government reforms and other developments that have directly or indirectly affected this relationship Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide
