Métodos Para Educar Niños Con Dificultades En El Aprendizaje Métodos Para Su Educación:

Métodos para educar niños con dificultades en el aprendizaje Patricia I. Myers, 1983 **Manual del maestro** James Bowen, Peter R. Habson, 1987 *Manual del maestro* Peter R. Habson, 1987 Métodos para educar niños con dificultades en el aprendizaje Patricia I. Myers, Donald D. Hammill, 1982 *Manual del maestro* Patricia Myers, 1987

Cómo Educar a Niños Con Déficit de Atención Miguel Rodríguez López, 2020-02-04 Esta obra brinda una guía para padres y maestros sobre cómo lidiar con situaciones cotidianas que se dan en la interacción con los pequeños. En este manual el psicólogo educativo Miguel Rodríguez a partir de su experiencia con múltiples casos responde a la necesidad de padres y maestros de contar con herramientas eficaces para educar a niños con este déficit con cariño y alegría. *El nivel de conocimiento del maestro de la corriente regular sobre los métodos para educar niños con problemas específicos de aprendizaje* Nixzalis Avilés González, 2009 Es de suma importancia que se realice el estudio pues puede proveer información valiosa al maestro sobre los métodos más recomendados para trabajar con niños con problemas específicos de aprendizaje. Los métodos discutidos en la investigación los cuales han sido recomendados por expertos van dirigidos a utilizarse por maestros de la corriente regular. Los objetivos del estudio son explorar cuáles son los métodos más utilizados para educar a niños con problemas específicos de aprendizaje y con qué frecuencia los maestros de la corriente regular utilizan estos métodos. *Leaf x* Dificultades de Aprendizaje Neil Mars, Durante muchos años analicé decenas de libros de varias fuentes. Comencé leyendo gran parte de las ediciones literarias prometedoras de resultados inmediatos mayormente de autores con antecedentes en psicología ofreciendo métodos de memorización y técnicas de concentración pero nada parecía funcionar. No funcionaban porque estaban basadas en el sentido común tal como estudiar en ubicaciones tranquilas y bien iluminadas y también porque en gran parte exponían modelos científicos de acercamiento que originaban en la misma irracionalidad social que estaba creando estudiantes con dificultades de aprendizaje. En una sociedad que consideraba la necesidad de concentración como principio fundamental y diferencial en la capacidad de aprender todo lo que se presentaba sobre aprendizaje seguía el fortalecimiento de esa misma falacia social. Las obras disponibles sobre el tema del aprendizaje parecían y parecen no considerar lo que para la sociedad en general no es real: el aprendizaje como una prehensión mental y emocional de la realidad. Se promueve una retención forzada de la realidad en nuestras mentes como si fuera posible aprender lo que no se puede comprender, experimentar o aplicar con autonomía. La sociedad se ha corrompido en los siglos pasados y está viviendo esta situación con una indiferencia natural y absoluta para con toda una evolución constructiva de miles de años. Esto me ha motivado a analizar diversas obras sobre salud mental a saber la forma del cerebro procesar y analizar la realidad lo que es normal y lo que no es. Inevitablemente y como consecuencia de un desbloqueo de las ilusiones de la humanidad un nuevo mundo apareció en frente a mis ojos y con los nuevos caminos para conocer y descubrir. Una buena parte de este nuevo conocimiento ha cambiado mi personalidad y alterado mi forma de enfrentar la vida para siempre. **Dificultades de**

Los niños con dificultades en el aprendizaje Sally L. Smith, 1979

Un modelo de educación para niños y niñas con discapacidad intelectual Ángela de Sosa Vaz; Facultad de Humanidades y Ciencias de la Educación y Máximo Rodrigo Núñez (Universidad de la República), 2014

En este artículo partimos de la idea de que educar es un fenómeno complejo y multidimensional de carácter emergente y recursivo en el que los sujetos implicados son realmente agentes del proceso en interacción permanente con su medio independiente de su condición física y/o intelectual por lo que decimos que es imposible hoy día pensar en un proceso de enseñanza aprendizaje de manera lineal es decir enseñar secuencias lineales y actividades de mera transmisión Partimos de la premisa de que vivimos en una sociedad compleja donde impera el modelo global globalización intentando borrar las diferencias e individualidades dejando paso a una homogeneización desenfrenada donde lo que impera es la uniformidad Este artículo pretende reflexionar sobre la educación menos agresiva y más interactiva y productiva para niños y niñas con discapacidades intelectuales Trabajar de esta manera implica reconocer a la diversidad como característica inherente a lo humano así como educar en las diferencias Esta forma de replantearse la escuela constituye una estrategia fundamental para lograr erradicar cualquier forma de discriminación y para la adquisición de formas de vida democráticas Planteamos una educación como nos enseña Freire que nace y renace a cada instante en los ambientes en los contextos y en las situaciones en las que unos seres humanos interaccionan cooperan dialogan y se ayudan mutuamente para construir situaciones más satisfactorias y teorías más explicativas de la realidad
