Wright, 1983-08 Russia is a huge storehouse of natural resources including oil gas and other energy sources which she can trade with the rest of the world for advanced technology and wheat In this book leading experts evaluate the Soviet potential in major energy and industrial raw materials giving special attention to implications for the world economy to the end of the twentieth century The authors examine the mineral and forest resources that the Soviet Union has developed and may yet develop to provide exports during the 1980s They discuss the regional dimension of these resources especially in Siberia and the Soviet Far East individual mineral raw materials such as petroleum natural gas timber iron ore manganese and gold and finally the role of raw materials in Soviet foreign trade The authors representing the United States Canada and Great Britain are primarily geographers but they include economists political scientists and a geologist Their work is based on primary sources for most of these reports current information is no longer being released to researchers and on interviews with Soviet officials **Mineral Industries of the U.S.S.R. - 1990** Richard Michael Levine, 1991 *The Nonfuel Mineral Outlook for the U.S.S.R. Through 1990* James S. Grichar, Richard Michael Levine, Lotfollah Nahai, 1982 **Mineral Industries of Eastern Europe and the U.S.S.R.** United States. Bureau of Mines, 1978 Monthly Catalog of United States Government Publications , 1982 **Minerals Yearbook** , 1992 **Weekly News Bulletin** Vsesoiužnoe obshchestvo kul'turnoi svyazi s zagranitsy (Soviet Union), 1926 **Bureau of Mines Research** United States. Earney, 2012-11-12 During the past century scientists world statesmen and international entrepreneurs have become increasingly aware of the potential of the oceans as a source of minerals This book provides an authoritative picture of the current state of marine mineral extraction A major work of reference it will be essential reading for both those engaged in maritime studies and for professional organisations involved in the extraction of underwater minerals **Allocation of Resources in the Soviet Union and China** United States. Congress. Joint Economic Committee. Subcommittee on Priorities and Economy in Government, United States. Congress. Joint Economic Committee. and China could be such superpowers is particularly intriguing and the main idea explored in this study In line with neo realist approaches this book argues that in a unipolar world competitors will rise to challenge the global hegemon As the power profiles of the BRICs rise and they gain greater control of geo global politics they are likely to attain significant regional dominance among other regional powers although their underdeveloped tradition of hard power and internal challenges could prevent them from gaining superpower status This book captures the dynamics of the changing international system and the prospects for a change in the international distribution of power **Congressional Record** United States.
