Mind Of Egypt History And Meaning In The Time Of The Pharaohs:

The Mind of Egypt Jan Assmann, 2003 The Mind of Egypt presents an account of the mainsprings of Egyptian civilization the ideals values mentalities belief systems and aspirations that shaped the first territorial state in human history Drawing on a range of literary iconographic and archaeological sources Jan Assmann reconstructs a world of unparalleled complexity a culture that long before others possessed an extraordinary degree of awareness and self reflection Egypt, Ethiopia, and the Greek Novel Robert Cioffi, 2024 In this richly detailed study Robert Cioffi explores the significance of the Nile River Valley as the geographic centre of the ancient Greek novel during the genre's heyday in the Roman empire He shows how the region is repeatedly portrayed in these fictions as a dual site of ethnographic representation and of resistance to imperial power

The Religious Nile Terje Oestigaard, 2018-07-30 The Nile is arguably the most famous river in the world For millennia the search for its source defeated emperors and explorers Yet the search for its source also contained a religious quest a search for the origin of its divine and life giving waters Terje Oestigaard reveals how the beliefs associated with the river have played a key role in the cultural development and make up of the societies and civilizations associated with it Drawing upon his personal experience and fieldwork in Africa including details of rites and ceremonies now fast disappearing the author brings out in rich detail the religious and spiritual meanings attached to the life giving waters by those whose lives are so bound to the river Part religious quest part exploration narrative the author shows how this mighty river is a powerful source for a greater understanding of human nature society and religion The Exodus Peter Feinman, 2021-10-13 Did the Exodus occur This question has been asked in biblical scholarship since its origin as a modern science The desire to resolve the question scientifically was a key component in the funding of archaeological excavations in the nineteenth century Egyptian archaeologists routinely equated sites with their presumed biblical counterpart Initially it was taken for granted that the Exodus had occurred It was simply a matter of finding the archaeological data to prove it So far those results have been for naught The Exodus An Egyptian Story takes a very real world approach to understanding the Exodus It is not a story of cosmic spectaculars that miraculously or coincidentally occurred when a people prepared to leave Egypt There are no special effects in the telling of this story Instead the story is told with real people in the real world doing what real people do Peter Feinman does not rely on the biblical text and is not trying to prove that the Bible is true He places the Exodus within Egyptian history based on the Egyptian archaeological record It is a story of the rejection of the Egyptian cultural construct and defiance of Ramses II Egyptologists not biblical scholars are the guides to telling the Exodus story What would you expect Ramses II to say after he had been humiliated If there is an Egyptian smoking gun for the Exodus how would you recognize it To answer these questions requires us to take the Exodus seriously as a major event at the royal level in Egyptian history

The Use of Documents in Pharaonic Egypt Christopher Eyre, 2013-10-31 This volume reconstructs the history of documentary practice in pharaonic Egypt from the early Old Kingdom to the major administrative

changes imposed by the colonizing regimes of the Graeco Roman period Relating administrative and legal practice to the physical practicalities of the media used for writing and through the close reading of primary textual sources it examines how different types of documents private and official were created and used It explores the ways in which the writing of documents was embedded deeply in the interactions between customary social practices which were essentially oral and in the penetration of outside hierarchies into local government Eyre argues that the potential of the written document as evidence or proof was never fully exploited in the pharaonic period even though writing was a powerful symbol and display of hierarchical authority He presents the government as a system rooted in personal prestige and patronage structures lacking the effective departmental hierarchies and archive systems that would represent a true bureaucratic system **Egyptian**

Hieroglyphs in the Late Antique Imagination Jennifer Taylor Westerfeld,2019-10-04 Throughout the pharaonic period hieroglyphs served both practical and aesthetic purposes Carved on stelae statues and temple walls hieroglyphic inscriptions were one of the most prominent and distinctive features of ancient Egyptian visual culture For both the literate minority of Egyptians and the vast illiterate majority of the population hieroglyphs possessed a potent symbolic value that went beyond their capacity to render language visible For nearly three thousand years the hieroglyphic script remained closely bound to indigenous notions of religious and cultural identity By the late antique period literacy in hieroglyphs had been almost entirely lost However the monumental temples and tombs that marked the Egyptian landscape together with the hieroglyphic inscriptions that adorned them still stood as inescapable reminders that Christianity was a relatively new arrival to the ancient land of the pharaohs In *Egyptian Hieroglyphs in the Late Antique Imagination* Jennifer Westerfeld argues that depictions of hieroglyphic inscriptions in late antique Christian texts reflect the authors attitudes toward Egypt s pharaonic past Whether hieroglyphs were condemned as idolatrous images or valued as a source of mystical knowledge control over the representation and interpretation of hieroglyphic texts constituted an important source of Christian authority Westerfeld examines the ways in which hieroglyphs are deployed in the works of Eusebius and Augustine to debate biblical chronology in Greek Roman and patristic sources to claim that hieroglyphs encoded the mysteries of the Egyptian priesthood and in a polemical sermon by the fifth century monastic leader Shenoute of Atripe to argue that hieroglyphs should be destroyed lest they promote a return to idolatry She argues that in the absence of any genuine understanding of hieroglyphic writing late antique Christian authors were able to take this powerful symbol of Egyptian identity and manipulate it to serve their particular theological and ideological ends **Capturing the Senses** Giacomo Landeschi,Eleanor Betts,2023-06-12 This

open access book surveys how digital technology can contribute effectively to improving our understanding of the past through a sensory engagement based on the evidence of material culture In particular it encourages specialists to consider senses and human agency as important factors in studying ancient space while recognising the role played by digital tools in enhancing a human centred form of analysis Significant advances in archaeological computing digital methods and sensory

approaches have led archaeologists to rethink strategies and methods for creating narratives of the past Recent progress in data visualisation and implementation as well as other nascent digital sensory methods means that it is now easier to explore and experience ancient space from a multiscale perspective from the individual body or single building to the wider landscape The chapters in *Capturing the Senses Digital Methods for Sensory Archaeologies* present innovative methods for representing an embodied experience of ancient space simulating but not recreating ancient behaviours and social interaction Chapters cover topics including the potentials and pitfalls of visualising recreating and re enacting experiencing the senses in Virtual Reality environments and also digital reconstructions and auralisations of ancient spaces to study sound sensory perception Overall the book demonstrates that multisensory approaches can give a new perspective on how ancient spaces were intended to be used by inhabitants to fulfil a series of purposes including conveying messages and regulating movement This is an open access book
