some of which sprung from alternative forms of knowledge in science fiction journalism or religion These different forms of prediction laid very different claims to how accurately futures could be known and what kind of control could be exerted over what was yet to come The Future of the World carefully examines these different engagements with the future and inscribes them in the intellectual history of the post war period Using unexplored archival collections The Future of the World reconstructs the Cold War networks of futurologists and futurists *Edinburgh Companion to Science Fiction and the Medical Humanities* Donna McCormack,Anna McFarlane,Gavin Miller,2025-03-31 The medical humanities are becoming increasingly important as their first wave is interrogated by a critical approach that aims to uncover the wider possibilities of the field In conversation with this debate this volume explores the ways in which science fiction studies can contribute to such discussions Science fiction challenges techno optimism and offers a non realist avenue for the expression of illness experience Science fiction also estranges its readers from their societies and the medical possibilities inherent in those societies inviting consideration of how medicine may be complicit with or opposed to other structures of power By engaging these concerns this Companion volume offers a unique viewpoint on the power of the future to shape the present **The Past, Present, and Future of Integrated History and Philosophy of Science** Emily Herring,Kevin Jones,Konstantin Kiprijanov,Laura Sellers,2019-05-14 Integrated History and Philosophy of Science iHPS is commonly understood as the study of science from a combined historical and philosophical perspective Yet since its gradual formation as a research field the question of how to suitably integrate both perspectives remains open This volume presents cutting edge research from junior iHPS scholars and in doing so provides a snapshot of current developments within the field explores the connection between iHPS and other academic disciplines and demonstrates some of the topics that are attracting the attention of scholars who will help define the future of iHPS Hearings, Reports and Prints of the House Committee on Science and Astronautics United States.
