University of Illinois** University of Illinois at Urbana-Champaign. Library,1975 *Theology and the Philosophy of Science*
Wolfhart Pannenberg,1976 This major work by one of the world s best known theologians is a unique contribution in bringing theology into solid dialogue with the scientific disciplines Professor Pannenberg develops the position that the scientific method is as applicable to theology as it is to other spheres of intellectual reflection He discusses the nature of science and scientific explanation and defines the sense in which theology is a science Professor Pannenberg then speaks of Christian theology as a branch of the theology of religion and calls upon Christian thinkers to search for truth in less traditional bound and presumptuous ways than they have in the past This book demonstrates that Pannenberg believes in a unitary way of knowledge Here he defines both the theologians and the secular thinkers who believe that theological discourse is in some special way privileged exempt from the universally accepted Western methods or reasoning His argument is provocative to theologians of a different bent and challenges secular thinkers to take as rational propositions Christian theology s truth claims With this book Professor Pannenberg places himself centrally and unequivocally in the secular academic community and rescues theology from its privileged marginality in modern intellectual discourse Publisher
