Mountain Town Flagstaffs First Century:

Mountain Town Platt Cline, 1994-01-01 Written by Flagstaff's town historian *Mountain Town* is a definitive history of a place where people from all walks of life intertwine **Flagstaff** John G. DeGraff, III, 2011 On July 4 1876 members of the Second Boston Party made camp at Antelope Spring on their way to California To celebrate the country's centennial the men prepared a ponderosa pine tree by stripping it of its branches and creating a flagpole With the arrival of the Atlantic and Pacific Railroad in 1882 this flag staff was once again discovered The area was growing in population so it became necessary to establish a post office Many names were proposed for the new town such as Antelope City and Flagpole but the name Flag Staff fit best As an oasis in the middle of the southwest desert Flagstaff has been a hub for many attractions surrounding the city prompting visitors to send news of their experiences via a picture postcard Many of the cards in this volume have messages and postmarks that help show a glimpse of what life was like in Arizona's High Country **Good Time Girls of Arizona and New Mexico** Jan MacKell Collins, 2019-08-21 As settlements and civilization moved West to follow the lure of mineral wealth and the trade of the Santa Fe Trail prostitution grew and flourished within the mining camps small towns and cities of the nineteenth century Southwest Whether escaping a bad home life lured by false advertising or seeking to subsidize their income thousands of women chose or were forced to enter an industry where they faced segregation and persecution fines and jailing and battled the other hazards of their profession Some dreamed of escape through marriage or retirement and some became infamous and even successful but more often found relief only in death An integral part of western history the stories of these women continue to fascinate readers and captivate the minds of historians today Arizona and New Mexico each had their share of working girls and madams like Sara Bowman and Dona Tules who remain notorious celebrities in the annals of history but Collins also includes the stories of lesser known women whose roles in this illicit trade help shape our understanding of the American West *Flagstaff's Walkup Family Murders* Susan Johnson, 2021-09-27 In the summer of 1937 the mountain town of Flagstaff emerged from the Great Depression with an eye toward the future Few people were better positioned for success than JD Walkup a handsome young mover and shaker who served as chairman of the board of supervisors and a happily married father of four The city was alive and bustling tourism thrived and cultural endeavors blossomed But JD's life changed forever one cool summer evening when his wife Marie and their children were found dead The murders shook the town to its core along with the disturbing knowledge that Marie was the culprit Join author Susan Johnson as she explores the tragic history of a once happy Flagstaff family *Arizona's War Town* John S. Westerlund, 2004-01-01 Few American towns went untouched by World War II even those in remote corners of the country During that era the federal government forever changed the lives of many northern Arizona citizens with the construction of the U S Army ordnance depot at Bellemont ten miles west of Flagstaff John Westerlund now tells how this linchpin in the war effort marked a turning point in Flagstaff's history One of only sixteen munitions depots built between 1941 and 1943 the

Navajo Ordnance Depot contributed significantly to the city's rapid growth during the war years as it brought considerable social, cultural, and economic change to the region. A clearing in the ponderosa pine forest called Volunteer Prairie met the military's criteria for a munitions depot: open terrain, a cool climate, plentiful water, and proximity to a railroad. It was also sufficiently inland to be safe from the threat of coastal invasion. Constructing a depot of 800 ammunition bunkers, each the size of a 2,000 square foot home, called for a force of 8,000 laborers, and Flagstaff became a boom town overnight as construction workers and their families poured in from nearby Indian reservations and as far away as the Midwest and South. More than 2,000 were retained as permanent employees, a larger workforce than Flagstaff's total pre-war employment roster. As Westerlund's portrait of wartime Flagstaff shows, prosperity brought unanticipated consequences: racism simmered beneath the surface of the town as ethnic groups were thrown together for the first time; merchants called a city-wide strike to protest emerging union activity; juvenile delinquency rose dramatically; Flagstaff women entered the workforce in unprecedented numbers, altering local mores along with their own plans for the future; meanwhile, hundreds of sailors and marines arrived at Arizona State Teachers College to participate in the Navy's V-12 program. Whether recounting the difficulty of 3,500 Navajo and Hopi employees adjusting to life off the reservation or the complaints of townspeople that Austrian POWs transferred to the depot to ease the labor shortage were treated too well, Westerlund shows that the construction and maintenance of the facility was far more than a military matter. Navajo Ordnance Depot remained operational to support wars in Korea, Vietnam, and the Persian Gulf, and today Camp Navajo provides storage for thousands of deactivated ICBM motors. But in recounting its early days, Westerlund has skillfully blended social and military history to vividly portray not only a city's transitional years but also the impact of military expansion on economic and community development in the American West.

The Martians David Baron, 2025-08-26 Long before NASA began contemplating a visit to our neighboring world, a turn of the century Mars craze invaded the public's imagination, here thrillingly retold in David Baron's *The Martians: There Is Life on the Planet Mars*. *New York Times*, December 9, 1906. This *New York Times* headline was no joke. In the early 1900s, many Americans actually believed we had discovered intelligent life on Mars, as best-selling science writer David Baron chronicles in *The Martians*, his truly bizarre tale of a nation swept up in Mars mania. At the center of Baron's historical drama is Percival Lowell, the Boston Brahmin and Harvard scion who observed canals etched into the surface of Mars. Lowell devised a grand theory that the red planet was home to a utopian society that had built gargantuan ditches to funnel precious meltwater from the polar icecaps to desert farms and oasis cities. The public fell in love with the ambitious amateur astronomer who shared his findings in speeches and wildly popular books. While at first people treated the Martians whimsically, Martians headlining Broadway shows, biologists speculating whether they were winged or gilled, the discussion quickly became serious. Inventor Nikola Tesla announced he had received radio signals from Mars. Alexander Graham Bell agreed there was no escape from the conviction that intelligent beings inhabited the planet. Martian

excitement reached its zenith when Lowell financed an expedition to photograph Mars from Chile's Atacama Desert resulting in what newspapers hailed as proof of the Martian canals existence. Triumph quickly yielded to tragedy. Those wild claims and highly speculative photographs emboldened Lowell's critics whose withering attacks gathered steam and eventually wrecked the man and his theory but not the fervor he had started. Although Lowell would die discredited and delusional in 1916 the Mars frenzy spurred a nascent literary genre called science fiction and the world's sense of its place in the universe would never be the same. Today the red planet maintains its grip on the public's imagination. Many see Mars as civilization's destiny the first step toward our becoming an interplanetary species but as David Baron demonstrates this tendency to project our hopes onto the world next door is hardly new. *The Martians* is a scintillating and necessary reminder that while we look to Mars for answers what we often find are mirrors of ourselves. *Historic Tales of Flagstaff* Kevin Schindler & Michael Kitt, 2019. Flagstaff Arizona was originally settled in the 1870s as a railroad and lumber town on the southwestern edge of the Colorado Plateau amid the ponderosa pines. Now most noted for its proximity to the Grand Canyon the city offers a tantalizing combination of history and progress. Theodore Roosevelt the Apollo astronauts Walt Disney filmmakers Navajo code talkers and Pluto discoverer Clyde Tombaugh all feature in the area's fascinating past. Join authors Kevin Schindler and Michael Kitt as they relate the trials and triumphs that have given this town its charm from the tumultuous days of the Wild West to the fast paced twentieth century. *Wupatki National Monument (N.M.), General Management Plan*, 2001.

Arizona Goes to War Brad Melton, Dean Smith, 2003-04. Tells the stories of Arizonans who answered their country's call to fight in World War II as well as the adventures of those on the home front. *Northern Arizona University* Lee C. Drickamer, Peter J. Runge, 2011. Any university is composed of faculty students and staff. But these living components change over time and in varying degrees while the campus buildings are more permanent remaining for decades a century or longer. This book looks at the buildings that have graced the campus of Northern Arizona University from its opening in 1898 to the present. The school began with a single building Old Main and it was joined by five other structures prior to World War I. In the following decades the campus remained relatively small expanding to approximately twenty five structures by the late 1950s. During the tenure of President J. Lawrence Walkup 1957-1979 the university effectively doubled in size spreading southward and adding more than forty buildings including an entire south campus academic center. Since 1979 the campus has witnessed the addition of more than thirty structures most as infill within the existing campus layout. Arranged chronologically this extensively illustrated volume briefly describes the history of every building that has been a part of the university's physical layout. The authors describe various structural aspects of each building and provide entertaining and informative anecdotes about events and people associated with the structures. By combing the university's archives Drickamer and Runge have turned up photographs of each building as it looked shortly after construction and at present providing a fascinating visual time lapse. With more than two hundred images of campus buildings many of them never before

published Northern Arizona University Buildings as History provides a wonderful pictorial chronicle of the campus that will interest architectural historians as well as all those who have called NAU home
