New Approaches To The Study Of Benign Prostatic Hyperplasia:

Prostate Cancer Methods and Protocols Pamela J. Russell, Paul Jackson, Elizabeth A. Kingsley, 2008-02-01 Prostate cancer is the second leading cancer in men in Western society A major concern and an area of intensive research involves understanding why certain prostate cancers remain localized or indolent whereas others become aggressive and metastasize The differences between these cancer types have profound implications for patients and physicians Indolent disease which grows very slowly generally does not cause any problems to the patient whereas aggressive disease requires immediate treatment the earlier the better At present there are no markers that discriminate between these two entities thus causing a dilemma for the management of patients who have recently been diagnosed The aim of Prostate Cancer Methods and Protocols is to explore cutting edge molecular methods that may have the potential to reveal markers of disease for use in more accurate diagnoses of prostate cancer and consequently to lead to new treatment strategies This book provides a comprehensive collection of both in vitro and in vivo step by step protocols currently used by leaders in prostate cancer research advice on approaches that can be used in the study of prostate cancer as well as reviews covering areas less amenable to laboratory research such as environmental factors in prostate cancer to provide the reader with an overview of the prostate cancer research field as it currently stands

Molecular and Cellular Biology of Prostate Cancer D.S. Coffey, James P. Karr, R.G. Smith, D.J. Tindall, 2012-12-06 These proceedings of the 5th Prostate Neck Meeting on Prostate Cancer held in October 1989 highlight the many advances in the understanding of prostatic growth and function at the cellular and molecular levels which have been registered since the first Prostate Neck Meeting in 1985 a meeting which also focused on the then current concepts and basic approaches to understanding prostate cancer Intervening Prostate Neck Meetings in 1986 1987 and 1988 were devoted to treatment image cytometry and clinical markers As before the Prostate Neck tradition of bringing together an international multidisciplinary group of experts for 3 days to exchange ideas and new data in the relaxed atmosphere of an old inn on the scenic Maine coast proved to be an ideal combination for a highly successful conference Accordingly the Organ System Program of the National Cancer Institute plans to use the Prostate Neck model for future conferences on other solid tumors bladder in 1990 and kidney in 1991 and will return to the prostate in 1992 A new dimension was added to the current program through the inclusion of a poster session to recognize the research of pre and postdoctoral investigators The posters were judged by Drs Collette Freeman Frank French Shutsung Liao Robert Matusik and Henry Sun The three winners in alphabetical order were John Fabian Robert Getzenberg and Ming Fong Lin

Current Concepts and Approaches to the Study of Prostate Cancer Donald S. Coffey, 1987 **Treatment of Lower Urinary Tract Symptoms and Benign Prostatic Hyperplasia: Current methods, outcomes, and controversies, An Issue of Urologic Clinics of North America, E-Book** Kevin T. McVary, Charles Welliver, 2016-08-12 Benign prostatic hyperplasia and the resulting lower urinary tract symptoms is a major part of almost any urologist's clinical practice Due to

the high prevalence of the disease in our aging population new concepts and treatments are constantly entering the marketplace Differences in patient preferences and desired outcomes require the practicing urologist to understand not only the pathophysiology of the disease but how specific treatments may be better suited for some patients and not others This issue will address the current concepts and treatments available to urologists The Prostate as an Endocrine Gland Richard J. Ablin, Wells E. Farnsworth, 1989-11-30 This unique publication illustrates that the prostate elaborates an array of local hormones or autoids and how these influence prostatic growth function and oncogenesis It describes how familiarity with these participants and how they effect the character and direction of prostatic function may suggest diagnostic markers of malfunction and new sites and modes of therapeutic intervention The catholic scope and authorship of the work seeks to integrate the views of those urologists reproductive physiologists and endocrinologists who presently work with the prostate It attempts to show all other biologists the full range of the gland s activities and participating molecules Included are oncogenes mitogens polyamines prostaglandins growth factors antigens and the familiar steroid peptide and protein hormones This volume is unique in its point of view and in the new concepts it presents Addressed are actions of spermine binding protein and osteoblastic mitogens consequences of inhibin thyrotropin releasing hormone balance and urokinase effects Covered also are androgen modulation of vasoactive intestinal polypeptides evidence of a prostatolymphoreticular system secretion of dihydrotestosterone and a model of the inter dependence of prostatic epithelium and stroma This unique new volume is of great value to those in urology internal medicine physiology endocrinology and pharmacology *Surgical Pathology of Prostate & Seminal Vesicles* Joseph Kovi, 2021-05-30 Written expressly for the surgical pathologist the pathology resident and the urologic surgeon this volume describes the histopathologic appearances of diseases affecting the prostate and the seminal vesicles The introductory chapter includes a discussion on the role and limitations of immunohistochemistry and fine needle aspiration in the diagnosis of prostatic carcinoma In the pathologic descriptions the main emphasis is placed on microscopic differential diagnosis Many conditions are discussed including prostatic calculi benign nodular hyperplasia tumors of prostatic urethra therapy induced changes and rare carcinomas Many diagrams charts tables and 221 photomicrographs complement the text **Research Awards Index**, 1977 **Benign Prostatic Hyperplasia and Lower Urinary Tract Symptoms in Men** Alexander Bachmann, Jean de la Rosette, 2011-11-24 The diagnosis and treatment of Benign Prostate Hyperplasia BPH is considered to be one of the most important topics in urology and afflicts millions of older men world wide This pocketbook will cover the entire background diagnostic process and treatment options available to patients suffering from lower urinary tract symptoms due to BPH **Autocrine and Paracrine Mechanisms in Reproductive Endocrinology** L. Krey, 2013-11-11 There is a provision in the charter of each Study Section of the Division of Research Grants at the National Institutes of Health that stipulates that workshops are to be held periodically to aid Study Section members in their appraisals of recent developments in their fields and to identify future challenges worthy of

investigation The Reproductive Endocrinology Study Section was established on December 13 1985 to review research grants and research training activities relating to reproductive endocrinology including aspects of management of reproductive endocrine disorders and hormonal imbalances as related to infertility and during pregnancy and puberty breast cancer and prostate cancer It held its first workshop entitled Autocrine and Paracrine Mechanisms in Reproductive Endocrinology in October 1988 in Shrewsbury MA at The Worcester Foundation for Experimental Biology The proceedings of this workshop which are detailed herein reflect the fact that autocrine and paracrine interactions are rapidly being accepted as an exciting area of research by scientists investigating the physiological and biochemical mechanisms of hormone action in the male and female reproductive systems The material covered is novel and wide ranging extending from theoretical considerations of mechanisms of growth factor action and the role of cell cycle stage in determining hormone action to investigations of autocrine and paracrine interactions during development to discussions of the potential clinical ramifications of the basic research findings Such an extensive inventory is necessary for two reasons

The Endocrinology of Prostate Tumours R. Ghanadian,2012-12-06 Tumours of the prostate are the commonest types of neoplasm in the male Whilst the benign form is virtually a universal condition in the ageing male malignant tumours rank amongst the top causes of cancer death Despite the fact that the involvement of the testis in the growth of the prostate has been recognised for almost two centuries it was not until the early 1940s that Charles Huggins studies on the effect of orchidectomy and oestrogen therapy on prostatic cancer initiated endocrine manipulation in the management of this malignancy During the 1960s progress in the understanding of the mechanism of hormone action achieved through advances in molecular biology and the recognition of certain aspects of hormonal control in relation to the genome introduced a new dimension for approaching endocrine manipulation of prostatic tumours By the end of that decade a new scientific discipline devoted to prostate research had been born which brought together investigators in the fields of molecular biology biochemistry endocrinology immunology urology and pathology to search for the cause and to explore methods for advancing the management of abnormal prostatic growth Since then a wealth of scientific data has accumulated on the prostate in which endocrinology has manifested itself as the cardinal aspect to which most of the findings can be related
