Every practicing health professional should have this guide **The Journal of Ambulatory Care Management Series**
Seth B. Goldsmith,1994-12 This four volume collection of the best articles from the Journal of Ambulatory Care Management addresses critical issues facing ambulatory care professionals today As the role of ambulatory care becomes more significant under managed care and health care reform these books will be a valuable resource to ambulatory care providers and students in health administration programs **Malpractice, Insurance, Legislation, Economics** Charlotte Kenton,1985
The Just Culture Principles in Aviation Law Francesca Pellegrino,2019-09-09 This book reviews and critically analyzes the current legal framework with regard to a more just culture for the aviation sector This new culture is intended to protect front line operators in particular controllers and pilots from legal action except in the case of willful misconduct or gross negligence by creating suitable laws regulations and standards In this regard it is essential to have an environment in which all incidents are reported moving away from fears of criminalization The approach taken until now has been to seek out human errors and identify the individuals responsible This punitive approach does not solve the problem because frequently the system itself is also at fault Introducing the framework of a just culture could ensure balanced accountability for both individuals and complex organizations responsible for improving safety Both aviation safety and justice administration would benefit from this carefully established equilibrium *Literature Search* National Library of Medicine (U.S.),1985
