Highberg,Melissa Nicolas,2014-04-04 This unique collection considers the nature of writing groups inside and outside the academic environment Exploring writing groups as contextual literacy events editors Beverly J Moss Nels P Highberg and Melissa Nicolas bring together contributors to document and reflect on the various types of collaborations that occur in writing groups in a wide range of settings both within and outside the academy The chapters in this volume respond to a variety of questions about writing groups including What is the impact of gender race and socioeconomic class on power dynamics in writing groups When is a writing group a community and are all writing groups communities How does the local community of a writing group impact the participation of group members in other local or global communities How does the local community of a writing group impact the participation of group members in other local or global communities What actions contribute to a strong community of writers and what actions contribute to the breakdown of community When and for whom are writing groups ineffective What is it about belonging to a community of writers that makes writing groups appealing to so many within and beyond the academy Each chapter highlights how writing groups whether or not they are labeled as such function in various spaces and locations and how collaboration works when writers from a variety of backgrounds with diverse interests come together Writing Groups Inside and Outside the Classroom illustrates that writing groups outside of the academy are worthy of study and serve as important sites of writing and literacy instruction Offering significant insights into the roles of writing groups in literacy and writing practice this volume is appropriate for scholars and teachers of writing rhetoric composition and literacy for writing center administrators and staff and for writing group participants **Breaking Open the Box** Nancy DaFoe,2013-02-12 What do David Foster Wallace s essay on wars over

usage and Pico Iyer s comma personification have to do with improving students academic writing Everything For all of the attention supposedly paid to Bloom s Taxonomy with creativity at the top educators tend to shy away from encouraging students creative choices in areas where traditional analysis and the critic s style and tone have reigned While we do not want our students to write inane or empty verbiage we unintentionally set them up for this inevitability or worse The movement away from children s natural creative impulses in elementary school to a direction in which they literally fit their writing into preconfigured shapes is a gradual one Although purportedly taught to instill academic structures these boxes are also designed to facilitate the ease with which student product may be assessed We need a more creative approach to teaching writing A methodology incorporating creativity as modeled by students in this text demonstrates the kind of progress we are all seeking offering an exciting challenge for young writers and educators alike *Theory and Practice of Writing* William Grabe,Robert B. Kaplan,2014-09-25 This book undertakes a general framework within which to consider the

complex nature of the writing task in English both as a first and as a second language The volume explores varieties of writing different purposes for learning to write extended text and cross cultural variation among second language writers The volume overviews textlinguistic research explores process approaches to writing discusses writing for professional purposes and contrastive rhetoric It proposes a model for text construction as well as a framework for a more general theory of writing Later chapters organised around seventy five themes for writing instruction are devoted to the teaching of writing at the beginning intermediate and advanced levels Writing assessment and other means for responding to writing are also discussed William Grabe and Robert Kaplan summarise various theoretical strands that have been recently explored by applied linguists and other writing researchers and draw these strands together into a coherent overview of the nature of written text Finally they suggest methods for the teaching of writing consistent with the nature processes and social context of writing

Securing a Place for Reading in Composition Ellen C. Carillo, 2015-01-15 Securing a Place for Reading in Composition addresses the dissonance between the need to prepare students to read not just write complex texts and the lack of recent scholarship on reading writing connections Author Ellen C Carillo argues that including attention to reading practices is crucial for developing more comprehensive literacy pedagogies Students who can read actively and reflectively will be able to work successfully with the range of complex texts they will encounter throughout their post secondary academic careers and beyond Considering the role of reading within composition from both historical and contemporary perspectives Carillo makes recommendations for the productive integration of reading instruction into first year writing courses She details a mindful reading framework wherein instructors help students cultivate a repertoire of approaches upon which they consistently reflect as they apply them to various texts This metacognitive frame allows students to become knowledgeable and deliberate about how they read and gives them the opportunity to develop the skills useful for moving among reading approaches in mindful ways thus preparing them to actively and productively read in courses and contexts outside first year composition Securing a Place for Reading in Composition also explores how the field of composition might begin to effectively address reading including conducting research on reading revising outcome statements and revisiting the core courses in graduate programs It will be of great interest to writing program administrators and other compositionists and their graduate students
