Forthcoming Books Rose Arny, 2003-04 **Health Technology Development and Use** Sampsa Hyysalo, 2010-06-22 How do development and use of new technology relate How can users contribute to innovation This volume is the first to study these questions by following particular technologies over several product launches in detail It examines the emergence of inventive ideas about future technology and uses how these are developed into products and embedded in health care practices and how the form and impact of these technologies

then evolves through several rounds of design and deployment across different types of organizations Examining these processes through three case studies of health care innovations these studies reveal a blind spot in extant research on development use relations The majority of studies have examined shorter episodes moments within particular design projects implementation processes usability evaluations and human machine interactions Studies with longer time frames have resorted to a relatively coarse grain size of analysis and hence lost sight of how the interchange is actually done As a result there are no social science information systems or management texts which comprehensively or adequately address how different moments sites and modes of shaping new technology determine the evolution of new technology the detailed mechanisms of learning interaction and domination between different actors and technology during these drawn out processes and the relationship of technology projects and the professional practices and social imaginations that are associated in technology development evaluation and usage The biographies of technologies and practices approach to new technology advanced in this volume offers us urgent new insight to core empirical and theoretical questions about how and where development projects gain their representations of future use and users how usage is actually designed how users requests and modifications affect designs and what kind of learning takes place between developers and users in different phases of innovation all crucial to our understanding and ability to advance new health technology and innovation more generally

Marketing Technology as a Service Laurie Young, Bev Burgess, 2010-05-24 Despite the fact that vast engineering networks are the foundations of modern society the services that technology companies provide over them have been a relatively neglected area of study As a result marketing in some technology businesses has been depressingly tactical and inconsistent Marketers with little experience and even less professional training run around presenting PowerPoint decks to each other chasing after the latest fad and throwing erratic changing activities at the market each quarter Many work on the unchallenged assumption that markets are fast changing and that customers only want the lowest prices Yet this industry has liberated human imagination in the internet and convinced the world that they must have a PC and a mobile phone Now as a result of profound relentless global forces some of the leading firms and greatest minds in it are at last turning their attention to service With the advent of cloud computing and radical changes in the engineering of some utilities the marketing of services that are based on a technical infrastructure is about to become as important and sophisticated as in say consumer products This book explores their story and experience I really enjoyed the book From Products to Services by Mr Laurie Young Encouraged by it Haier accelerated its changeover from a traditional product driven to a more customer centric company This new book Marketing Technology as a Service is another major contribution to technology companies for the cultivation of service needs worldwide Mr Zhang Ruimin CEO and Chairman Haier Group Beijing Young and Burgess describe a shift in mindset and pragmatic techniques that are quite doable Rae Sedel MD Global Technology Practice Russell Reynolds Associates This book provides practical and insightful advice on how to use services to turn technology into value

Discount Business Strategy Michael Moesgaard Andersen, Flemming Poultfelt, 2009-08-28 What people are saying about Discount Business Strategy Michael Andersen and Flemming Poultfelt provide a provocative discussion of the rapidly growing role of discounters across numerous industries how they operate how they create uniqueness and how they can destroy value for incumbents Understanding the specific moves and tools that the authors analyze will be valuable for attackers and incumbents alike Adrian J Slywotzky Director Mercer Management Consulting USA This book is very timely dealing with today's most critical strategic issue how to provide more value to the consumer through aggressive discounting Those players in manufacturing and distribution who master this will be the winners many established firms will fall by the wayside A similar set of issues are facing many nations today Europe vs Asia Peter Lorange President IMD Switzerland Andersen and Poultfelt have researched one of the most important themes in today's business world how fundamentally new business models have wiped out establishments not with new products or technologies but by creating new rules for conventional industries Read this book and learn how to recognize the disruption of your industry before it is too late Sigurd Liljenfeldt Senior Partner Monitor Group France This book asks if a firm can have its cake and eat it too that is maintain high quality at low prices My favourite example and shopping place is big box Costco Ikea is another A must read for a broad audience concerned about corporate survival Professor Larry E Greiner Marshall School of Business University of Southern California USA The aspiration to adopt the right strategy still prevails over the business world But is there a single best strategy for a company Can an organization create sustainable competitive advantage from an off the peg strategy And are most companies likely to craft a strategy that genuinely creates uncontested market space and makes the competition irrelevant The answer to all these questions is probably No And the rising tide of companies like Dell CostCo Skype and Linux means that asking them at all may soon be futile While strategists have foundered in old paradigms a new breed of competitors has emerged Value destroyers Old style thinking understood value destruction when it was confined to an industry and driven by a new product or technology But what are the implications when the destruction stems from a new way of thinking from a strategy that simultaneously creates value The implications are enormous Every company in every industry is potentially at risk This risk or opportunity is precisely the reason for this book and its focus on exploring why and how some companies have bridged the gap between differentiator and cost leader strategies to emerge as winners in hypercompetitive markets and what this entails in terms of value destruction and creation Discounting organizations are here to stay are you
