Processing Politics:

Processing Politics Doris A. Graber, 2012-07-15 How often do we hear that Americans are so ignorant about politics that their civic competence is impaired and that the media are to blame because they do a dismal job of informing the public Processing Politics shows that average Americans are far smarter than the critics believe Integrating a broad range of current research on how people learn from political science social psychology communication physiology and artificial intelligence Doris Graber shows that televised presentations at their best actually excel at transmitting information and facilitating learning She critiques current political offerings in terms of their compatibility with our learning capacities and interests and she considers the obstacles both economic and political that affect the content we receive on the air on cable or on the Internet More and more people rely on information from television and the Internet to make important decisions Processing Politics offers a sound well researched defense of these remarkably versatile media and challenges us to make them work for us in our democracy

Celebrity and the American Political Process Jennifer Brubaker, 2020-11-10 Integrated Marketing Communication Celebrity and the American Political Process uses an integrated marketing communication perspective to examine the brand of the celebrity as it is brought into the American political system primarily in the form of celebrity endorsements and branding as candidates causes and movements use celebrities as a strategy to reach voters Jennifer Brubaker posits that while the relationship between celebrities and political issues is hardly new it has evolved into a significant connection in the past it was a novelty to see a politically active celebrity today it s becoming an expectation related to fame Using integrated marketing communication and persuasion theory Brubaker argues that establishing candidates brand identity is a critical factor in determining whether they win or lose an election and celebrity politics relationships are a central tool in building a candidates brand identity Scholars of political science communication marketing and history will find this book particularly useful

The Media and Political Process P. Eric Louw, 2005-05-20 The Media and Political Process examines the increasingly topical subject of the political process and assesses The nature of the relationship between mass media and the political process The impact of media ization on existing political frameworks The implications of media ized politics Eric Louw uses a number of case studies including political celebrity war and terrorism to provide a media studies perspective on how media workers journalists public affairs officers spin doctors impact upon the political process The book also considers the media s role in promoting a range of twentieth century ideologies and emerging dominant discourses

Politics, Process, and American Trade Policy Sharyn O'Halloran, 1994 Relying on the New Economics of Organizations NEO or New Institutionalism Politics Process and American Trade Policy shows why conventional models do not adequately describe the formation of American trade policy Rejecting both the pressure group model and the presidential ascendancy model this study s institution based approach emphasizes the influence Congress has in setting trade policy connecting theories of institutional design with the procedural details of regulating trade policy To

reach her conclusions Sharyn O Halloran uses time series data and econometric analysis to test a set of propositions concerning trade policy She examines detailed case studies and provides a comprehensive history of the institutions that govern trade policy making Unlike most scholars who see trade policy as disparate and ad hoc O Halloran is able to explain both early and contemporary American trade policy in a consistent and integrated fashion She argues that a single set of procedures may lead to apparently different outcomes under differing initial conditions therefore the key is to identify the common logic derived from constitutional imperatives that underlies all policy outcomes *The Process and Politics of Defense Acquisition* David S. Sorenson, 2008-12-30 The United States government invests billions each year on equipping armed forces with the most advanced military equipment The root of the American defense acquisition system is driven by a combination of national interests and domestic political requirements While fundamentally the defense acquisition system has produced results for the United States military improvements are needed in order to continue to move forward in advancing military tactics and technology Exploring both the systemic and political levels of the system Sorenson argues that the United States will fall behind if the current defense acquisition system is not reformed This book brings together elements of this complicated system such as national security requirements and the changes that are needed in both the structural and political pillars A combination of political interests and the needs of the military serviced by an ever shrinking defense industry make a genuine acquisition reform even more difficult resulting in reform that is more symbolic than genuine *The Media and Political Process* Eric Louw, 2010-03-12 How have professional communicators transformed the business of politics How do political bodies use the media to sell domestic and foreign policies to the public This fully revised new edition of *The Media and Political Process* assesses the impact of spin doctoring and media activity in liberal democracies that are just as concerned with impression management and public relations as with policy Political processes never stand still and this revised second edition explores the mediatisation of the political process in light of recent developments from Vladimir Putin's growth into a political celebrity to the activities of spin doctors in the 2008 US Presidential Elections Providing a comprehensive overview of the evolution operation and terminology of political communication this text is an accessible lively resource for students of political communication and media and politics and will be important further reading for students of journalism public relations and cultural studies **Apprehending Politics** Marco Calavita, 2005-01-01 Using penetrating in depth interviews examines the individual political development of young adults in post 1960s America and the roles that news media play in that development **Political Process and the Development of Black Insurgency, 1930-1970** Doug McAdam, 1999-11-22 In this classic work of sociology Doug McAdam presents a political process model that explains the rise and decline of the black protest movement in the United States Moving from theoretical concerns to empirical analysis he focuses on the crucial role of three institutions that foster protest black churches black colleges and Southern chapters of the NAACP He concludes that political opportunities a heightened

sense of political efficacy and the development of these three institutions played a central role in shaping the civil rights movement In his new introduction McAdam revisits the civil rights struggle in light of recent scholarship on social movement origins and collective action A first rate analytical demonstration that the civil rights movement was the culmination of a long process of building institutions in the black community Raymond Wolters Journal of American History A fresh rich and dynamic model to explain the rise and decline of the black insurgency movement in the United States James W Lamare Annals of the American Academy of Political and Social Science Image Bite Politics Maria Elizabeth Grabe,Erik Page Bucy,2009-03-02 Image Bite Politics is the first book to systematically assess the visual presentation of presidential candidates in network news coverage of elections and to connect these visual images with shifts in public opinion Presenting the results of a comprehensive visual analysis of general election news from 1992 2004 encompassing four presidential campaigns the authors highlight the remarkably potent influence of television images when it comes to evaluating leaders

American Political Process Alan Grant,2003-09-04 American Political Process examines both the formal institutions of government and organizations such as political parties and pressure groups It analyzes how these bodies interact in the making of public policy in the United States in order to provide an understanding of contemporary American politics The seventh edition has been thoroughly updated and revised with entirely new material on the 2000 Presidential election and George W Bush s presidency the September 11th attacks and the War on Terrorism the 2002 mid term elections controversial issues such as abortion and gun control Each chapter includes a variety of useful tables and diagrams suggestions for further reading and relevant websites and a glossary of key terms Written with admirable clarity this is the ideal textbook for students of American politics and society
