special reference to Australia Canada Sweden and the United Kingdom Three main aspects are discussed The restructuring of the labor market this is considered with respect to precarious work and to gender issues and their implications for the health and safety of workers The neoliberal agenda this is examined with respect to the diminished power of organized labor decriminalization and new governance theory including an examination of how well the health and safety at work regimes put in place in many industrial societies about forty years ago have fared and how distinctive the recent emphasis on self regulation in several countries really is The role of evidence there is a dearth of evidence based policy The book examines how policy on health and safety at work is formulated at both company and state levels Cases considered include the scant regard paid to evidence by an official inquiry into future strategy in Canada the lack of evidence based policy and the reluctance to observe the precautionary principle with respect to work related cancer in the United Kingdom and the failure to learn from past mistakes in the Deepwater Horizon disaster in the Gulf of Mexico     Oxford Textbook of Palliative Medicine Geoffrey W. C. Hanks, 2011-07-21 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care
