"The Occupational Safety and Health Act of 1970 clearly states our common goal of safe and healthful working conditions for the first consideration in operating this business."

"Safety and health in our business must be part of every operation, without question, it is every employee's responsibility and right."

"As the owner of this company to comply with all laws. To do this, we must constantly be aware of conditions in all work areas that can produce injuries. We recognize it is required for each of our business owners to not safe or healthful. Your cooperation in detecting hazards and in fully understanding them, is a condition of your employment. Inform your supervisor immediately of any situation beyond your ability or authority to correct."

"The personal safety and health of each employee of this company is of primary importance. Prevention of occupationally-induced injuries and illnesses is of such consequence that it will be given precedence over operating productivity whenever necessary. To the greatest degree possible, management will provide all equipment and personal activities required for personal safety and health, in keeping with the highest standards."

"We will maintain a safety and health program conforming to the best practices of organizations of this type. To be successful, such a program must involve proper administration, injury and illness prevention in the field of supervisors and employees. It also requires cooperation in all safety and health matters, not only between supervisor and employees, but also between each employee and their co-workers. Only through such a cooperative effort can a safety program in the field become of all the established and planned."

"Our objective is a safety and health program that will reduce the number of injuries and illnesses to an absolute minimum, not merely in keeping with, but exceeding the best experience of operations similar to ours. Our goal is zero accidents and injuries."

"Our safety and health program will include:

- Providing mechanical and physical safeguards for the equipment used in process.
 - Conducting safety and health inspections to find, eliminate or control safety and health hazards as well as unsafe working conditions and practices and to comply fully with the safety and health standards for workers.

 - Setting up a system to recognize employees for outstanding safety records or performance. This recognition system should not discourage employees from reporting accidents, injuries, or illnesses."

- The employer accepts responsibility for leadership of the safety and health program, for its effectiveness and improvement, and for providing the safeguards and/or controls to ensure safe conditions.
 - Supervisors are responsible for developing proper safety and health and health (or maintenance) and in those they supervise, and for ensuring that all operations are performed with the utmost regard for the safety and health of all personnel involved, including themselves.
