Safety Culture In Nuclear Power Operations:

Safety Culture in Nuclear Power Operations Bernhard Wilpert, Naosuke Itoigawa, 2001-09-13 Technical psychological and social aspects of industrial safety come under the rigorous scrutiny of scientists and engineers from a vast array of different backgrounds For many years as an immediate result of direct international governmental and popular concern the nuclear power industry has led the safety world Safety Culture in Nuclear Power [Safety Culture in Pre-operational Phases of Nuclear Power Plant Projects](#) International Atomic Energy Agency, 2012 An abundance of information exists on safety culture related to the operational phases of nuclear power plants however pre operational phases present unique challenges This publication focuses on safety culture during pre operational phases that span the interval from before a decision to launch a nuclear power programme to first fuel load It provides safety culture insights and focuses on eight generic issues safety culture understanding multicultural aspects leadership competencies and resource competition management systems learning and feedback cultural assessments and communication Each issue is discussed in terms of specific challenges desired state approaches and methods and examples and resources This publication will be of interest to newcomers and experienced individuals faced with the opportunities and challenges inherent in safety culture programmes aimed at pre operational activities *Emerging Demands for the Safety of Nuclear Power Operations* Naosuke Itoigawa, Babette Fahlbruch, Bernhard Wilpert, 2004-07-08 Technological and social aspects of industrial safety come under the scrutiny of scientists and engineers from an array of backgrounds This is the third publication developed from a very fruitful longstanding cooperation between the Institute of Social Research within the Institute of Nuclear Safety System in Japan and the Research Center System The book presents a cross disciplinary state of the art look at the latest human factors developments in the industry with wider applications for the entire industrial sector Expert contributors explore issues in key areas [Key Practical Issues in Strengthening Safety Culture](#) International Atomic Energy Agency, 2002 This report discusses key issues in safety culture and practical matters such as the assessment of personal contributions to the enhancement of safety culture It complements Safety Series No 75 INSAG 4 Safety Culture 1991 and INSAG Series No 13 Management of Operational Safety in Nuclear Power Plants **Safety Culture in the Maintenance of Nuclear Power Plants** International Atomic Energy Agency, 2005 Building upon earlier IAEA publications on this topic this Safety Report reviews how challenges to the maintenance of nuclear power plants can affect safety culture It also highlights indications of a weakening safety culture The challenges described are in areas such as maintenance management human resources management plant condition assessment and the business environment The steps that some Member States have taken to address safety culture aspects are being detailed and singled out as good practices with a view to disseminating and exchanging experiences and lessons learned **People, Risk, and Security** Lance Wright, 2017-02-20 Lance Wright shows why business in the 21st century requires a new understanding of the intersection of risk security and human resource

management He argues that these areas should no longer be considered separate processes handled by technical specialists with limited spheres of expertise People risk and security management should be treated as a critically important integrated business management system People may be your greatest asset but they can also be your biggest liability They expose you to all sorts of risks risks from things they can do or fail to do and from things that can be done to them No matter how tight a risk and security management policy may be in theory it can fail on its first contact with reality if it doesn't understand the people involved Wright understands people risk and security like few others For years he was in charge people management for leading oil companies getting people into and out of some of the most dangerous and hostile work environments on the planet and keeping them safe while they were there Then he was responsible for a private army literally licenced to kill guarding nuclear submarines that were being decommissioned as part of the Megatons to Megawatts program Risk is more than a set of formulas Security is more than guns gates and badges Both ultimately come down to the people you are responsible for One day the depth of your understanding of that connection may what stands between you and disaster
