Safety Licensable Computing Architecture:

A Safety Licensable Computing Architecture Wolfgang A Halang, Bernd J Kramer, Soon-key Jung, Johan J Scheepstra, 1993-12-30 This book describes the design of a low complexity fault detecting computer architecture for utilisation in programmable logic controllers PLCs for process control purposes The cyclic operating mode of PLCs and a specification level graphical programming paradigm based on interconnecting application oriented standard software function modules are architecturally supported Thus by design there is no semantic gap between the specification programming and machine execution levels enabling the safety licensing of application software by diverse back translation an extremely simple but rigorous method

Humane Interfaces J.P. Marsh, B. Gorayska, J.L. Mey, 1999-04-07 Ever since the first successful International Cognitive Technology CT Conference in Hong Kong in August 1995 a growing concern about the dehumanising potential of machines

and the machining potential of the human mind has pervaded the organisers thinking When setting up the agenda for the Second International CT Conference in Aizu Japan in August of 1997 they were aware that a number of new approaches had seen the light but that the need to integrate them within a human framework had become more urgent than ever due to the accelerating pace of technological and commercialised developments in the computer related fields of industry and research What the present book does is re emphasize the importance of the human factor not as something that we should also take into account when doing technology but as the primary driving force and supreme aim of our technological endeavours Machining the human should not happen but humanising the machine should La Humacha should replace the Hemachine in our thinking about these matters

Computer Safety, Reliability and Security Massimo Felici, Karama Kanoun, Alberto Pasquini, 2003-07-31 The European Commission emphasizes in its Fifth Research Framework the emerging generic dependability requirements in the information society stemming both from the ubiquity and volume of embedded and networked systems and services as well as from the global and complex nature of large scale information and communication infrastructures from citizens administrations and business in terms of technologies tools systems applications and services The series of Conference on Computer Safety Reliability and Security Safecomp contributes to satisfy these requirements by reviewing the state of the art experiences and new trends in the relevant scientific and industrial areas Safecomp is intended to be a platform for technology transfer among academia industry and research institutions providing the opportunity for exchange of ideas opinions and visions among experts This year Safecomp celebrates the 20th anniversary its first Conference having been organized in Stuttgart by EWICS European Workshop on Industrial Computer Systems in 1979 and we hope these

Proceedings will contribute to the celebration by supporting Safecomp aims The Proceedings include the 25 papers that have been presented orally at the Conference and the full version of the 14 papers that have been presented as posters all of which were selected from 76 submissions Papers almost uniformly take up Safecomp topics dealing with the issues of Safety Assessment and Human Factors Verification and Validation Design for Safety Formal Methods and Security Soft Computing for Risk Evaluation and Management Da Ruan, Mario Fedrizzi, 2012-08-10 Risk is a crucial element in virtually all problems people in diverse areas face in their activities It is impossible to find adequate models and solutions without taking it into account Due to uncertainty and complexity in those problems traditional hard tools and techniques may be insufficient for their formulation and solution This is the first book in the literature that shows how soft computing methods fuzzy logic neural networks genetic algorithms etc can be employed to deal with various problems related to risk analysis evaluation and management in various fields of technology environment and finance **Proceedings of the 2022 International**
