## HVAC Fire Life Safety Level 2 Technician

**Scope:** Level 2 competency in controls, smoke management and stairway pressurization.

**Summary:** The management of fire and smoke has served as the underpinning of building codes in the U.S. for more than 100 years. Nearly all buildings intended for human occupancy are required by today's codes to be designed with an assurance that, over the life of the building, occupants will be reasonably safe from fire and smoke. Building codes require the design of an integrated system of features such as walls, floors, ceiling, and structural members, as well as specific fire and smoke protection components, products, devices and systems that reinforce and cover for one another in case of the failure of any one in the event of a fire. The overall intended building performance and the depth of the designed redundancy is based on the objectives of the building owner and the occupants.

**Requirements to take the HVAC Fire Life Safety Level 2 Technician class:**

- Must have attained HVAC Fire Life Safety Level One Certification\*
- Must be employed by a qualified contractor

**To be certified as an HVAC Fire Life Safety Level 2 Technician the candidate will have to pass a written test validating the following skills:**

- Knowledge of applicable NFPA, state and local building codes
- Qualifications to implement inspections and provide service and follow-up inspection/testing
- Knowledge of smoke control systems design and test criteria as defined by ASHRAE Guidelines 5-1994, NFPA101, 92A & 92B, International Fire Code, SMACNA's Fire Smoke and Radiation Damper Installation Guide for HVAC Systems, and UL.
- Capable to implement individual component and overall system performance testing of fire/smoke and fire/smoke combination dampers and all related control components and interconnected system elements in a manner that will verify life safety compliance.
- Capable to review/access HVAC system design drawings and design intent specifications in collaboration with design professionals, specifically as related to fire/smoke and fire/smoke combination dampers, and the design intent of the fire containment needs of the building.
