Fine Chemicals Manufacture A. Cybulski,M.M. Sharma,R.A. Sheldon,J.A. Moulijn,2001-12-10 The sector of fine chemicals including pharmaceuticals agrochemicals dyes and pigments fragrances and flavours intermediates and performance chemicals is growing fast For obvious reasons chemistry is a key to the success in developing new processes for fine chemicals However as a rule chemists formulate results of their work as recipes which usually lack important information for process development Fine Chemicals Manufacture Technology and Engineering is intended to show what is needed to make the recipe more useful for process development purposes and to transform the recipe into an industrial process that will be safe environmentally friendly and profitable The goal of this book is to form a bridge between chemists and specialists of all other branches involved in the scale up of new processes or modification of existing processes with both a minimum effort and risk and maximum profit when commercializing the process New techniques for scale up and optimization of existing processes and improvements in the utilization of process equipment that have been developed in recent years are presented in the book
