Threatening Communications and Behavior National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, 2011-04-21 Today s world of rapid social technological and behavioral change provides new opportunities for communications with few limitations of time and space Through these communications people leave behind an ever growing collection of traces of their daily activities including digital footprints provided by text voice and other modes of communication Meanwhile new techniques for aggregating and evaluating diverse and multimodal information sources are available to security services that must reliably identify communications indicating a high likelihood of future violence In the context of this changed and changing world of communications and behavior the

Board on Behavioral Cognitive and Sensory Sciences of the National Research Council presents this volume of three papers as one portion of the vast subject of threatening communications and behavior. The papers review the behavioral and social sciences research on the likelihood that someone who engages in abnormal and or threatening communications will actually then try to do harm. The focus is on how the scientific knowledge can inform and advance future research on threat assessments in part by considering the approaches and techniques used to analyze communications and behavior in the dynamic context of today's world. The papers in the collection were written within the context of protecting high profile public figures from potential attack or harm. The research however is broadly applicable to U.S. national security including potential applications for analysis of communications from leaders of hostile nations and public threats from terrorist groups. This work highlights the complex psychology of threatening communications and behavior and it offers knowledge and perspectives from multiple domains that contribute to a deeper understanding of the value of communications in predicting and preventing violent behaviors.

Intercultural Public Relations Lan Ni, Qi Wang, Bey-Ling Sha, 2018-06-12 *Intercultural Public Relations: Theories for Managing Relationships and Conflicts with Strategic Publics* develops a coherent framework to unify the theories of public relations and intercultural communication and within the framework examines empirical studies of intercultural interactions. This book follows an intercultural approach which considers how individuals and entities with dissimilar cultural identities interact and negotiate to solve problems and reach mutually satisfying outcomes. This work provides a theory driven empirically supported framework that will inform and guide the research and practices of intercultural public relations. Furthermore, it provides numerous levels of analysis and incorporates the use and challenges of social media. The book examines theories and issues in three integrated processes: Identification of publics, Relationship management, Conflict resolution. These areas represent the most critical functions that public relations contributes to organizational effectiveness: scanning the environment, identifying strategic publics and building long term quality relationships with these publics to reduce costs, gain support and empower the publics themselves. In doing so, the book adopts simultaneously public centered and organization centered perspectives. This unique work will serve as an essential reference for students, practitioners and scholars in today's global public relations environment.

Information Theory , Indian National Security and Counter-Insurgency Namrata

Goswami,2014-11-27 This book based on extensive field research examines the Indian state's response to the multiple insurgencies that have occurred since independence in 1947. In reacting to these various insurgencies the Indian state has employed a combined approach of force, dialogue, accommodation of ethnic and minority aspirations and overtime the state has established a tradition of negotiation with armed ethnic groups in order to bolster its legitimacy based on an accommodative posture. While these efforts have succeeded in resolving the Mizo insurgency it has only incited levels of violence with regard to others. Within this backdrop of ongoing Indian counter insurgency this study provides a set of conditions responsible for the groundswell of insurgencies in India and some recommendations to better formulate India's national security policy with regard to its counter insurgency responses. The study focuses on the national institutions responsible for formulating India's national security policy dealing with counter insurgency such as the Prime Minister's Office, the Cabinet Committee on Security, the National Security Council, the Ministry of Home Affairs and the Indian military apparatus. Furthermore it studies how national interests and values influence the formulation of this policy and the overall success and or failure of the policy to deal with armed insurgent movements. Notably the study traces the ideational influence of Kautilya and Gandhi in India's overall response to insurgencies. Multiple cases of armed ethnic insurgencies in Assam, Manipur, Mizoram and Nagaland in the Northeast of India and the ideologically oriented Maoist or Naxalite insurgency affecting the heartland of India are analysed in depth to evaluate the Indian counter insurgency experience. This book will be of much interest to students of counter insurgency, Asian politics, ethnic conflict and security studies in general.
