Grace Aaron, 2005

Thought and Poetic Structure in San Juan de la Cruz's Symbol of Night is a comprehensive appraisal of the traditional critical perspectives of mysticism philosophical theological literary and psychological Examining the a priori limitations of these approaches the book presents an original definition of the symbol as an integral whole of experience and expression and concludes that night is the form the organizing principle of spiritual life

*Saint Jean de la Croix et le problème de l'expérience mystique* Jean Baruzi, 1931      *Saint Jean de la Croix et le problème de l'expérience mystique*. Thèse pour le Doctorat ès Lettres, etc Jean BARUZI, 1924      **John of the Cross** Sam Hole, 2020-11-19

Through the dark night of the soul to the depiction of the erotically charged union of the soul and God the poetry and prose works of the Spanish friar John of the Cross 1542 1591 offer a striking account of the transformation of the individual in the course of the Christian life John of the Cross Desire Transformation and Selfhood argues that these writings are animated by John's own creative and subtly conceptualized notion of erotic desire John's understanding of desire has the potential to enrich recent theological discussion of the subject but it has been curiously neglected in past scholarship To correct this lacuna this study undertakes a detailed historical analysis in three parts Firstly it attends to the patristic medieval and sixteenth century Spanish influences on John's writings showing how John reworks a long tradition of biblical Christian and Platonic reflection on the concept Secondly it traces the importance of desire through John's writings demonstrating how he develops the theme through his poetry his anthropology of the soul and his account of the spiritual ascent Thirdly it explores the reception of his writings in the twentieth century demonstrating how particular modern philosophical and theological commitments have prevented scholars from recognising the rich and distinctive shape of John's theological vision John's account of the transformation of the self with its hopeful vision of the graced transformation of the soul's desires has significance beyond the constrained modern categories of systematic theology Christian spirituality pastoral theology and mysticism it is a vision that is worthy of recovery today      *The general and departmental libraries* University of California, Berkeley. Library, 1928      *Mystery of God, Mystery of Christ* Ysabel de Andia, 2024-03-28

Now available in English for the first time Ysabel de Andia's double exploration of Christian and Hindu mysticism provides a valuable addition to the field Composed from lectures given in Benares in 2015 to priests of the Missions Etrangères de Paris *Mystery of God Mystery of Christ* combines the two main research interests that have defined de Andia's career first an understanding of Christian mysticism as growing out of the Christian mystery of Christ and the sacrament and secondly the

relationship between this and Hindu contemplative prayer as articulated by Jules Monchanin Beginning with the Cappadocian fathers de Andai traces the developing interpretation of Mystery through Christian thinkers from Origen and Gregory of Nyssa to Basil and Dionysios the Areopagite From here she begins to dovetail this study with an exploration of Hindu contemplation relating the Carmelite mystic St John of the Cross to the Advaitist tradition especially as expounded by Shankara Throughout her masterful understanding of both traditions is apparent For English readers her insight will provide a fresh perspective on this lively subject area

Mysticism in the French Tradition Louise Nelstrop, Bradley B. Onishi, 2016-03-09 In the nineteenth and early twentieth centuries secular French scholars started re engaging with religious ideas particularly mystical ones Mysticism in the French Tradition introduces key philosophical undercurrents and trajectories in French thought that underpin and arise from this engagement as well as considering earlier French contributions to the development of mysticism Filling a gap in the literature the book offers critical reflections on French scholarship in terms of its engagement with its mystical and apophatic dimensions A multiplicity of factors converge to shape these encounters with mystical theology feminist devotional and philosophical treatments as well as literary historical and artistic approaches The essays draw these into conversation Bringing together an international and interdisciplinary range of contributions from both new and established scholars this book provides access to the melting pot out of which the mystical tradition in France erupted in the twenty first century and from which it continues to challenge theology today

Selected Essays, Volume II Andrew Louth, 2023-07-18 Taken together these two volumes collect seventy five essays written by Professor Andrew Louth over a forty year period Louth s contribution to scholarship and theology has always been significant and these essays have been collected from journals and edited collections many of which are difficult to access and are here made available over two thought provoking and wide ranging volumes Volume II collects essays on a variety of theological topics arranged chronologically showing the development of Louth s thought since 1978 Throughout this collection the nature of theology as it is understood within Orthodox tradition is a constant concern These essays offer distinctive reflections on categories such as development of doctrine that have become foundational in modern western thought but which must be viewed rather differently from an Orthodox perspective The legacy of modern Russian Orthodox thought especially the key figures of the twentieth century Russian diaspora is under constant consideration and forms a constant dialogue partner

Inner Experience Georges Bataille, 2014-07-22 Outlines a mystical theology and experience of the sacred founded on the absence of god Originally published in 1943 Inner Experience is the single most significant work by one of the twentieth century's most influential writers It outlines a mystical theology and experience of the sacred founded on the absence of god Bataille calls Inner Experience a narrative of despair but also describes it as a book wherein profundity and passion go tenderly hand in hand Herein he says The mind moves in a strange world where anguish and ecstasy take shape Bataille's search for experience begins where religion philosophy science and literature leave off where doctrines dogmas methods and the arts collapse His method of meditation outlined and documented here commingles horror and delight Laughter intoxication eroticism poetry and sacrifice are pursued not as ends in and of themselves but as means of access to a sovereign realm of inner experience This new translation is the first to include Method of Meditation and Post Scriptum 1953 the supplementary texts Bataille added to create the first volume of his Summa Atheologica This edition also offers the full notes and annotations from the French edition of Bataille's Oeuvres Complètes along with an incisive introductory essay by Stuart Kendall that situates the work historically biographically and philosophically

*A Theory of /Cloud/* Hubert Damisch, 2002 This is the first in a series of books in which one of the most influential of contemporary art theorists revised from within the conceptions underlying the history of art The author's basic idea is that the rigor of linear perspective cannot encompass all of visual experience and that it could be said to generate an oppositional factor with which it interacts dialectically the cloud On a literal level this could be represented by the absence of the sky as in Brunelleschi's legendary first experiments with panels using perspective Or it could be the vaporous swathes that Correggio uses to mediate between the viewer on earth and the heavenly prospect in his frescoed domes at Parma Insofar as the cloud is a semiotic operator interacting with the linear order of perspective it also becomes a dynamic agent facilitating the creation of new types of pictorial space Damisch puts the signifier cloud between slashes to indicate that he deals with clouds as signs instead of realistic elements This way of looking at the history of painting is especially fruitful for the Renaissance and Baroque periods but it is also valuable for looking at such junctures as the nineteenth century For example Damisch invokes Ruskin and Turner who carry out both in theory and in practice a revision of the conditions of appearances

of the cloud as a landscape feature Even for the twentieth century he has illuminating things to say about how his reading of cloud applies to the painters Leger and Braque In short Damisch achieves a brilliant and systematic demonstration of a concept of semiotic interaction that touches some of the most crucial features of the Western art tradition
