Symmetry Tohru Ogawa,Koryo Miura,Takashi Masunari,Denes Nagy,2012-12-06 In Japanese culture the concept of katachi has special significance connoting relationships and connectedness Although katachi cannot be translated precisely it corresponds most closely to form shape pattern or Gestalt The contemporary study of katachi is interdisciplinary and encompasses virtually all scientific and aesthetic endeavors Katachi research seeks to bridge the gap between cultures whether the two cultures of C P Snow or the contrasting cultures of East and West To help achieve this aim and to foster international cooperation the interdisciplinary symposium titled Katachi U Symmetry was convened in Tsukuba Japan November 21 25 1994 With many participants from differing backgrounds and cultural perspectives the symposium was the culmination of 15 years of work in the field Like minded researchers and philosophers came together from two movements in interdisciplinary studies of katachi and symmetry that arose in the 1980s one in Japan the other in Hungary The proceedings of the symposium will stimulate and provoke the interest of scientists and mathematicians engineers and architects philosophers and semioticians indeed all those with a lively sense of curiosity and a wide ranging intellect Contemporary Architects Muriel Emanuel,2016-01-23 Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl Avery Library,1990 Warō Kishi Warō Kishi,Hiroshi Watanabe,2000-10-31 Born 1950 Warō Kishi belongs to the generation of Japanese architects that emerged from Tadao Ando The Architecture of Tokyo Hiroshi Watanabe,2001-03-20 Over 500 buildings are presented from 15th century Buddhist temples to 20th century cultural buildings from venerable folkhouses to works by leading contemporary architects of Japan such as Kenzo Tange Fumihiko Maki Arata Isozaki Hiroshi Hara Toyo Ito and Riken Yamamoto as well as by foreign architects such as Norman Foster Peter Eisenman and Steven Holl BOOK JACKET Beyond Utopia Agnes Nyilas,2018-05-25 Megastructure proposals by the Japanese Metabolism group are commonly identified with the concept of utopia Beyond this partial understanding Agnes Nyilas suggests that rather than being merely utopian the Megastructure of Metabolism represents a uniquely amalgam genre the myth camouflaged as utopia Although its Megastructure seemingly describes a desirable future condition as utopia does it also comprises certain cultural images

rooted in the collective unconscious of Japanese people in accordance with the general interpretation of myth. The primary narrative of *Beyond Utopia* thus follows the gradual unfolding of the myth like characteristics of its Megastructure. Myth is dealt here as an interdisciplinary subject in line with contemporary myth theories. After expounding the mechanism underlying the growing demand for a new myth in architecture, the origin of the myth, Part I discovers the formal characteristics of the Megastructure of Metabolism to give a hint of the real intention behind it. Based on this, Part II is a reexamination of their design methods which aims to clarify the function of the myth and to suggest the meaning behind it. Finally, Part III deals with the subject matter of the myth by disclosing the meaning unfolding in the story and suggests a new reading of Metabolism urban theory as an attempt to reconsider the traditional Japanese space concept. **Nurturing**

Dreams Fumihiko Maki, 2012-09-21. Unavailable as a collection until now, these essays document both the intellectual journey of one of the world's leading architects and a critical period in the evolution of architectural thought. Born in Tokyo, educated in Japan and the United States, and principal of an internationally acclaimed architectural practice, celebrated architect Fumihiko Maki brings to his writings on architecture a perspective that is both global and uniquely Japanese. Influenced by post-Bauhaus internationalism, sympathetic to the radical urban architectural vision of Team X, and a participant in the avant-garde movement Metabolism, Maki has been at the forefront of his profession for decades. This collection of essays documents the evolution of architectural modernism and Maki's own fifty-year intellectual journey during a critical period of architectural and urban history. Maki's treatment of his two overarching themes, the contemporary city and modernist architecture, demonstrates strong and sometimes unexpected linkages between urban theory and architectural practice. Images and commentary on three of Maki's own works demonstrate the connection between his writing and his designs. Moving through the successive waves of modernism, postmodernism, neomodernism, and other isms, these essays reflect how several generations of architectural thought and expression have been resolved within one career. **Adaptive**

Architecture Wolfgang F. E. Preiser, Andrea E. Hardy, Jacob J. Wilhelm, 2017-09-01. The constant in architecture's evolution is change. Adaptive Architecture explores structures or environments that accommodate multiple functions at the same time, sequentially or at periodically recurring events. It demonstrates how changing technological, economic, ecological, and social conditions have altered the playing field for architecture, from the design of single-purpose structures to the design of interacting systems of synergistically interdependent distributed buildings. Including contributors from the US, UK, Japan, Australia, Germany, and South Africa, the essays are woven into a five-part framework which provides a broad and unique treatment of this important and timely issue. *Designing Modern Japan* Sarah Teasley, 2022-05-06.
