## **Sale Of Goods Lloyds Commercial Law:**

**International Commercial Sales: The Sale of Goods on Shipment Terms** Andrea Lista, 2016-11-18 This book comprehensively examines the entire legal process of the international sale of goods beginning with the creation of the contract and continuing through to either the fulfilment of the sale or the termination of the contract Every day goods are globally traded between sellers and buyers in different countries and different jurisdictions The distances between the parties involved in such transactions and the relative risks related to that are a key issue in international commercial sales Sales of goods carried by sea thus differ quite drastically from domestic sales the goods will be normally shipped at a port very distant from the buyer preventing his physical presence at the port of loading Further the goods will travel in the custody of a carrier a party normally quite independent from either trader Finally transactions concluded on shipment terms are normally irreversible in the sense that shipping the goods back to the seller represents an unlikely option for the buyer Traders around the world very frequently choose English law to govern their contracts with disputes to be resolved through London arbitration or litigation The basis of that law is to be found in the English Sale of Goods Act 1979 and the book consequently also includes an examination of the fundamental principles of that Act as well as considering use of the Vienna Convention on the International Sale of Goods This book will be an invaluable reference point for legal practitioners specialising in the sale of goods as well as postgraduate students and academic researchers working in sales of goods and the international trade sector

**Proprietary Interests in Commercial Transactions** Sarah Worthington, 1996 One of the most pressing problems now facing commercial lawyers is to explain the principles which determine when a remedy is proprietary and when it is not This book provides a broad overview of the subject It examines representative business transactions which commonly give rise to legal or equitable interests in personal property Its aim is to distil the fundamental principles understanding the relevant legal analyses The result is to provide a more theoretically rigorous analytical framework for proprietary interests in personal property The practical advantages of this are potentially twofold new commercial transactions can be more effectively structured in addition disputes between contracting parties can be more reliably resolved Two features of the analysis are significant The first is the elastic nature of proprietary interests in

personal property Although proprietary interests can be broadly classified as ownership or security interests these are relative concepts which may be affected significantly by impinging contractual arrangements The second feature is the necessary and intimate integration of law and equity Equitable proprietary interests are remarkably prevalent this prevalence is directly related to the apparent ease with which equity is able to convert particular personal obligations into proprietary interests
