Salmon Aquaculture:

Becoming Salmon Marianne E. Lien, 2015-06-30 *Becoming Salmon* is the first ethnographic account of salmon aquaculture the most recent turn in the human history of animal domestication As fish are enrolled in new regimes of marine domestication traditional distinctions between fish and animals are reconfigured recasting farmed fish as sentient beings capable of feeling pain and subject to animal welfare legislation Drawing on ethnographic fieldwork in Norway and Australia the author traces farmed Atlantic salmon through contemporary industrial practices and shows how salmon are bred to be hungry globally mobile and alien in their watersheds of origin Attentive to the economic context of industrial food production as well as the mundane practices of caring for fish it offers novel perspectives on domestication human animal relations and food production Provided by publisher *The Economics of Salmon Aquaculture* Frank Asche, Trond Bjørndal, 2011-03-01 First published in 1990 *The Economics of Salmon Aquaculture* was the first book to systematically analyse the salmon aquaculture industry from both a market and production perspective Since publication of the first edition of this book the salmon aquaculture industry has grown at a phenomenal rate with salmon now being consumed in more than 100 countries worldwide This second edition of a very popular and successful book brings the reader right up to date with all the major current issues pertaining to salmon aquaculture Commencing with an overview of the production process in aquaculture the following chapters provide in depth coverage of the sources of the world's supply of salmon the growth in productivity technological changes environmental issues markets market structure and competitiveness lessons that can be learnt from the culture of other species optimal harvesting techniques production planning and investment in salmon farms Written by Frank Asche and Trond Bjørndal two of the world's leading experts in the economics of aquaculture this second edition of *The Economics of Salmon Aquaculture* provides the salmon aquaculture industry with an essential reference work including a wealth of commercially important information This book is also a valuable resource for upper level students and professionals in aquaculture and economics and libraries in all universities and research establishments where these subjects are studied and taught should have copies of this important book on their shelves *Salmon Aquaculture* Knut Heen, Robert L. Monahan, Fred Utter, 1993-12-14 A comprehensive guide to the responsible development of salmon aquaculture to the mutual benefits of all resources and individuals affected by this industry Geographic distribution approaches to problems of rearing in open and closed marine systems techniques dealing with transportation and feeding consequences of environmental factors on aquaculture and regulations and economic considerations are among the issues discussed Evaluation of Closed-containment Technologies for Saltwater Salmon Aquaculture Edward Michael Pakenham Chadwick, G. Jay Parsons, Boumy Sayavong, 2010 *The Outlook for Salmon Aquaculture Products in World Markets*, 1984 *Sustainable Fish Farming* Helge Reinertsen, Herborg Haaland, 1995-06-01 The aim of the symposium on which this text is based was to discuss the current practices of the fish farming industry and search for sustainable directions for future development Topics

covered include resources for fish food in aquaculture genetics and environment and aquaculture interaction *Aquaculture Environment Regulation and System Engineering* Ce Shi,Zhangying Ye,Dibo Liu,2023-11-02 Final Report of the Subcommittee to Study Salmon Aquaculture in Maine Maine. Legislature. Joint Standing Committee on Marine Resources. Subcommittee to Study Salmon Aquaculture in Maine,1990 **World Fish Farming: Cultivation and Economics** E. Brown,2012-12-06 Until the First Edition of World Fish Farming Cultivation and Economics was published several years ago there was little or no economic and technical information on commercial aquaculture either by countries or by species I tried at that time to partially fill the gap in the literature In this Second Edition I have updated data originally presented and increased the scope by adding new countries New trout data have been added for 10 western European countries sections on cost of production of food sized catfish and fingerlings in the USA new and improved chapters for Japan Hungary Indonesia the Philippines and the United Kingdom and completely new chapters pertaining to Poland Thailand and Czechoslovakia have all been added to this edition The book now includes 31 countries including all major producing ones Between 5.5 and 60 million metric tons of finfish shrimp and crayfish cultured production are represented which accounts for about 90% of the world's total The People's Republic of China and the USSR as well as countries on the continents of Europe Asia North America and Oceania are represented Because of only minimal reported cultured fish production in Africa and South America these continents have been omitted Also according to information received from New Zealand there is no culturing of fish in that country other than for restocking of public waters More than 100 species of cultured fish seven species of shrimp and prawns and six species of crayfish are discussed **NOAA**. United States. National Oceanic and Atmospheric Administration,1971 **NOAA** ,1971 **The Rights of Indigenous Peoples in Marine Areas** Stephen Allen,Nigel Banks,Øyvind Ravna,2019-09-19 The question of what rights might be afforded to Indigenous peoples has preoccupied the municipal legal systems of settler states since the earliest colonial encounters As a result of sustained institutional initiatives many national legal regimes and the international legal order accept that Indigenous peoples possess an extensive array of legal rights However despite this development claims advanced by Indigenous peoples relating to rights to marine spaces have been largely opposed This book offers the first sustained study of these rights and their reception within modern legal systems Taking a three part approach it looks firstly at the international aspects of Indigenous entitlements in marine spaces It then goes on to explore specific country examples before looking at some interdisciplinary themes of crucial importance to the question of the recognition of the rights of Indigenous peoples in marine settings Drawing on the expertise of leading scholars this is a rigorous and long overdue exploration of a significant gap in the literature *Seafood Ecolabelling* Trevor Ward,Bruce Phillips,2009-01-28 **SEAFOOD Ecolabelling Principles and Practice** Edited by Trevor Ward and Bruce Phillips In recent years there have been some major developments and a greatly increased recognition of the importance of more sustainable and environmentally friendly fishing and fish farming methods Various types of seafood eco endorsements have

been introduced and these initiatives have now blossomed into an extensive range of types of product endorsement labels and systems. This volume comprehensively reviews the current eco endorsement systems for seafood products described in four main sections with contributions by leading experts from around the globe. A full description of the background and history of eco labels, ratings guides and choice systems. Seafood evaluation and certification including issues of quality costs and benefits. Highly significant case studies in the use of eco labels including details of programs undertaken with species such as Pollock, Baja Red Spiny Lobster and Patagonian Toothfish. The future of sustainable seafood. Seafood Ecolabelling is an essential purchase for all those involved in fisheries and aquaculture management and product certification and ecolabelling throughout the world. Professionals including fishery scientists and managers, fish farm managers, marine biologists, environmental biologists, conservation biologists, ecologists, natural resource managers, civil society and sustainability governance practitioners and resource and environmental economists will find this book to be extremely valuable. Professionals involved in the seafood trade including those in production, packaging, reselling and seafood product labelling will find a great deal of commercial interest within this book. Libraries in all universities and research establishments where biological sciences, food science and fisheries are studied and taught should have copies of this important book on their shelves. Animal Housing and Human-Animal Relations Kristian Bjørkdahl, Tone Druglitrø, 2016-05-12. This book provides an in depth investigation into the practices of animal housing systems with international contributions from across the humanities and social sciences. By attending to a range of different sites such as the zoo, the laboratory, the farm and the animal shelter to name a few, the book explores material technologies from the perspective that these are integrated parts of a larger biopolitical infrastructure and questions how animal housing systems and the physical infrastructures that surround central human animal practices come into being. Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3.0 license.

Sea Grant Publications Index, 1977. **Oceans and Society** Ana Spalding, Daniel Suman, 2023-02-28. This unique textbook presents an introduction to the interdisciplinary field of marine studies exploring the dynamic relationship between people and the marine environment. Emphasizing the human dimension of coastal and ocean issues, the book provides an innovative examination of the complex marine human environment dynamics by drawing on social science and humanities approaches. Applying these interdisciplinary approaches, the textbook addresses key challenges facing the marine environment including changing climate, fisheries, aquaculture, marine pollution, energy production and management of areas beyond national jurisdiction. While leading with a human dimension approach to these challenges, the

chapters are all firmly grounded in foundational knowledge about coastal and ocean environments and processes The textbook also includes examples of professional or academic areas of specialization within marine studies such as social and environmental justice governance global perspectives traditional ecological knowledge and management entrepreneurship community development conservation and the blue economy Ultimately the book provides the first cohesive resource on marine studies to educate students train interdisciplinary marine leaders inspire new knowledge about people and the sea generate innovative solutions for sustainable oceans and build capacity for a new generation of marine focused professionals Oceans and Society is essential reading for students on marine studies courses as well as those studying marine governance policy conservation and law more broadly It will also be of great interest to students researchers and professionals interested in applying interdisciplinary approaches to environmental challenges

Environmental Conflict and Democracy in

Canada Laurie E. Adkin, 2010-01-01 The urgent need to resolve conflicts over forests fisheries farming practices urban sprawl and greenhouse gas reductions among many others calls for a critical rethinking of the nature of our democracy and citizenship This work aims to move the ideas of green democracy and ecological citizenship from the margins to the centre of discussion and debate in Canada Environmental Conflict and Democracy in Canada offers sixteen case studies to demonstrate that environmental conflicts are always about our rights and responsibilities as citizens as well as the quality of our democratic institutions By bringing together environmental politics and democratic theory this path breaking collection charts a new course for research and activism one that reveals the deficits of citizenship and how democracy must be extended to achieve a socially just ecologically sustainable society

Differentiating and defining 'exposed' and 'offshore' aquaculture and implications for aquaculture operation, management, costs, and policy Tyler Scłodnick, Kevin Gerald

Heasman, Bela H. Buck, 2025-02-17 Ocean based aquaculture has typically occurred in protected coastal environments however the industry and been expanding into offshore locations over the past few decades The term offshore has been used to broadly define any aquaculture facility that either is spatially far from shore or exposed to high energy environments even though these are different situations In most cases however offshore is not used in its primary sense namely the distance from the coastline A definition for offshore in the context of aquaculture has not been clearly defined and continues to lead to ambiguity and confusion among industry participants support industries academics and regulators Recent advances in the sector and a growing need to produce seafood from offshore environments creates a necessity for research and analysis to define and characterize the environments currently described as offshore and create a framework for industry members to understand and describe ocean environments effectively The research topic seeks to create a framework for describing aquaculture environments in the context of distance from shore and ocean energy as well as explore how these two parameters impact aquaculture technology operations regulation and economics Submissions should add to the understanding of offshore or open ocean aquaculture farms specifically in the context of the environment in which they

operate A focus will be on creating definitions for the terms offshore open ocean and high energy in the context of marine farming such that these terms can be used more effectively in the future **Aquacultural Development** Conner Bailey,2019-03-07 In this volume an international group of contributors explores the newly emerging aquaculture industry Focusing on the social and environmental dimensions of aquacultural development in both industrialized and nonindustrialized nations they examine issues of social equity user group conflict environmental impacts of production and the mediating role of the state They also discuss aquaculture s role in development activity especially in sustainable development where it can enhance community viability coherence and solidarity Asserting the need for careful planning and recognizing impending political and moral choices the contributors assess the decisionmaking process for public authorities and development agencies and consider the social consequences of these decisions Policymakers responsible for promoting and managing this growing industry will find this volume invaluable as they begin to research and design appropriate institutional structures In addition scholars interested in the overall adoption and diffusion of new technologies will find here a rich source of information about a system that shares attributes with but also differs significantly from agricultural and fisheries production systems A Century of Maritime Science Jennifer M. Hubbard,David Wildish,Robert L. Stephenson,2016-05-12 Located on the Bay of Fundy the St Andrews Biological Station is Canada s oldest permanent marine research institution A Century of Maritime Science reviews the fisheries environmental oceanographic and aquaculture research conducted over the last hundred years at St Andrews from the perspective of the participating scientists Introductory essays by two leading historians of science situate the work at St Andrews within their historical context With topics including the contributions of women to the early study of marine biology in Canada the study of scallops Atlantic salmon and paralytic shellfish poisoning and the development of underwater camera technology A Century of Maritime Science offers a captivating mixture of first hand reminiscences scientific expertise and historical analysis
