## **Salmon Nation People Fish And Our Common Home:**

*Animal Architecture* Paul Dobraszczyk, 2023-05-17 A provocative call for architects to remember and embrace the nonhuman lives that share our spaces A spider spinning its web in a dark corner Wasps building a nest under a roof There is hardly any part of the built environment that cannot be inhabited by nonhumans and yet we are extremely selective about which animals we keep in or out This book imagines new ways of thinking about architecture and the more than human and asks how we might design with animals and the other lives that share our spaces in mind *Animal Architecture* is a provocative exploration of how to think about building in a world where humans and other animals are already entangled whether we acknowledge it or not

**Salmon** Peter Coates, 2006-11-30 In *Salmon* Peter Coates examines the fish from the differing perspectives of those who have eaten it pursued it pondered its meaning and absorbed it into culture and art Ranging from Nova Scotia to Norway and from Korea to California he tells the evolutionary ecological and cultural stories of the salmon that has been variously revered depended upon and abused by humans The result is an innovative biography of a species that will delight anyone who has ever eaten or tried to catch this charismatic fish **BOOK JACKET** **Salmon Nation**

Edward C. Wolf, 2003 *Squirrel Nation* Peter Coates, 2023-09-12 A wide ranging meditation on belonging and citizenship through the story of two squirrel species in Britain *Squirrel Nation* is a history of Britain's two species of squirrel over the past two hundred years the much loved though rare red squirrel and the less desirable though more populous grey squirrel A common resident of British gardens and parks the grey squirrel was introduced from North America in the late nineteenth century and remains something of a foreign interloper By examining this species rapid spread across Britain Peter Coates explores timely issues of belonging nationalism and citizenship in Britain today Ultimately though people are swift to draw distinctions between British squirrels and squirrels in Britain *Squirrel Nation* shows that Britain's two squirrel species have much more in common than at first appears **The Fishermen's Frontier** David F. Arnold, 2009-11-17 In *The Fishermen's Frontier* David Arnold examines the economic social cultural and political context in which salmon have been harvested in southeast Alaska over the past 250 years He starts with the aboriginal fishery in which Native fishers lived in close connection with salmon ecosystems and developed rituals and lifeways that reflected their intimacy The transformation of the salmon fishery in southeastern Alaska from an aboriginal resource to an industrial commodity has been fraught with historical ironies Tribal peoples usually considered egalitarian and communal in nature managed their fisheries with a strict notion of property rights while Euro Americans so vested in the notion of property and ownership established a common property fishery when they arrived in the late nineteenth century In the twentieth century federal conservation officials tried to rationalize the fishery by improving upon nature and promoting economic efficiency but their uncritical embrace of scientific planning and their disregard for local knowledge degraded salmon habitat and encouraged a backlash from small boat fishermen who clung to their irrational ways Meanwhile Indian and white commercial fishermen engaged in identical

labors but established vastly different work cultures and identities based on competing notions of work and nature Arnold concludes with a sobering analysis of the threats to present day fishing cultures by forces beyond their control However the salmon fishery in southeastern Alaska is still very much alive entangling salmon fishermen industrialists scientists and consumers in a living web of biological and human activity that has continued for thousands of years *The Northwest Nature Guide* James Luther Davis,2009-01-06 From winter whale watching to autumn seabirding The Northwest Nature Guide offers more than 170 best bets for wildlife adventures throughout Oregon Washington and British Columbia as well as your own backyard With contagious enthusiasm and irrepressible humor James Luther Davis shares his insider tips helpful maps and experience to guarantee readers know where they need to go to see nature at its peak every month of the year Whatever the season and no matter the weather Davis entices nature lovers of all ages to discover what they might otherwise miss The intrepid may find the three toed woodpecker or even Sasquatch The inquisitive will learn why auks fly but penguins don't Everyone will discover outdoor adventures that revitalize inspire and renew their appreciation for nature Whether it's tidepooling by the shore newt pursuit in the woods or trailing bighorn sheep in the mountains this practical guide helps make the most of every fresh air opportunity **The Bioregional Imagination** Tom Lynch,Cheryll Glotfelty,Karla Armbruster,2012 Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective Although bioregional ideas occur regularly in ecocritical writing until now no systematic effort has been made to outline the principles of bioregional literary criticism and to use it as a way to read write understand and teach literature The twenty four original essays here are written by an outstanding selection of international scholars The range of bioregions covered is global and includes such diverse places as British Columbia's Meldrum Creek and Italy's Po River Valley the Arctic and the Outback There are even forays into cyberspace and outer space In their comprehensive introduction the editors map the terrain of the bioregional movement including its history and potential to inspire and invigorate place based and environmental literary criticism Responding to bioregional tenets this volume is divided into four sections The essays in the Reinhabiting section narrate experiments in living in place and restoring damaged environments The Rereading essays practice bioregional literary criticism both by examining texts with strong ties to bioregional paradigms and by opening other less obvious texts to bioregional analysis In Reimagining the essays push bioregionalism to evolve by expanding its corpus of texts coupling its perspectives with other approaches or challenging its core constructs Essays in the Renewal section address bioregional pedagogy beginning with local habitat studies and concluding with musings about the Internet In response to the environmental crisis we must reimagine our relationship to the places we inhabit This volume shows how literature and literary studies are fundamental tools to such a reimagining The Wonder of Water Ingrid Leman Stefanovic,2019-12-13 Judgment calls values and perceptions often implicitly affect decisions around water policies and programs This book explores how embodied lived experience informs such values and impacts policy and practice around

water issues in critical ways      *Ecotheology in the Humanities* Melissa Brotton,2016-05-20 This book is a collection of essays about the interaction between God humans and nature in the context of the environmental challenges and Biblical studies Chapters include topics on creation care and Sabbath sacramental approaches to earth care classical and medieval cosmologies ecotheodicy how we understand the problem of nonhuman suffering in a world controlled by a good God ecojustice and how humans help to alleviate nonhuman suffering The book seeks to provide a way to understand Judeo Christian perspectives on human to nonhuman interaction through Biblical literary cultural film and music studies and as such offers an interdisciplinary approach with emphasis on the humanities which provides a broader platform for ecotheology

Being Salmon, Being Human Martin Lee Mueller,2017 Examines Western culture s alienation from nature by focusing on the relationship between people and salmon weaving together key narratives about the Norwegian salmon industry as well as wild salmon in indigenous cultures of the Pacific Northwest Amazon com      **A Woman Has a Right to Dream** Florence Schmunk Bauder,2025-08-17 Florence Schmunk Bauder the eleventh of twelve children recalls growing up in Oregon to immigrant parents who arrived in the United States in 1908 As a child she learned how to play the piano By the time she was a teenager could play songs by memory including the hymns she sang at church While still a teenager she attended a missionary conference at a friend s church where she heard God s voice speaking to her about her future She grew up hoping to pursue a special ministry that was different It wasn t until after she married that God challenged her to start a ministry that would continue long after she died Later she heard the Holy Spirit say It s a fact that there are not enough Christian camps and the great majority of persons in the Christian ministry made their decisions while attending a camp Why not consider developing one yourselves This is the author s story of how she teamed up with her husband and others who believed in their mission to organize a nonprofit corporation Camp Emerald Forest an official member of Christian Camping International      **The Biosphere and the Bioregion** Cheryll Glotfelty,Eve Quesnel,2014-07-17 Bioregionalism asks us to reimagine ourselves and the places where we live in ecological terms and to harmonize human activities with the natural systems that sustain life As one of the originators of the concept of bioregionalism Peter Berg 1937 2011 is a founding figure of contemporary environmental thought The Biosphere and the Bioregion Essential Writings of Peter Berg introduces readers to the biospheric vision and post environmental genius of Berg From books and essays to published interviews this selection of writings represents Berg s bioregional vision and its global local urban and rural applications The Biosphere and the Bioregion provides a highly accessible introduction to bioregional philosophy making Berg s paradigm available as a guiding vision and practical greenprint for the twenty first century This valuable compilation lays the groundwork for future research by offering the first ever comprehensive bibliography of Berg s publications and should be of interest to students and scholars in the interdisciplinary fields of environmental humanities environment and sustainability studies as well as political ecology environmental sociology and anthropology      Oceans Jon Bowermaster,2010-04-13 This unique tie in to the major

motion picture Oceans presented by Disney National Geographic explores the health of the oceans and reveals what people can do to improve the health of our seas

In the Valleys of the Noble Beyond John Zada, 2019-07-02 A journalist travels through British Columbia exploring one of the world's most baffling mysteries: the existence of the Sasquatch. On the central and north coast of British Columbia, the Great Bear Rainforest is the largest intact temperate rainforest in the world, containing more organic matter than any other terrestrial ecosystem on the planet. The area plays host to a wide range of species, from thousand-year-old western cedars to humpback whales to iconic white Spirit bears. According to local residents, another giant is said to live in these woods. For centuries, people have reported encounters with the Sasquatch, a species of hairy bipedal man apes said to inhabit the deepest recesses of this pristine wilderness. Driven by his own childhood obsession with the creatures, John Zada decides to seek out the diverse inhabitants of this rugged and far-flung coast, where nearly everyone has a story to tell. From a scientist who dedicated his life to researching the Sasquatch to members of the area's First Nations to a former grizzly bear hunter turned nature tour guide, with each tale Zada discovers that his search for the Sasquatch is a quest for something infinitely more complex, cutting across questions of human perception, scientific inquiry, indigenous traditions, the environment, and the power and desire of the human imagination to believe in or reject something largely unseen. Teeming with gorgeous nature writing and a driving narrative that takes us through the forests and into the valleys of a remote and seldom-visited region, *In the Valleys of the Noble Beyond* sheds light on what our decades-long pursuit of the Sasquatch can tell us about ourselves and invites us to welcome wonder for the unknown back into our lives.

Praise for *In the Valleys of the Noble Beyond*: Books on supernatural phenomena typically steer one of two courses: tabloid gullibility or mean-spirited debunkery. Zada deftly tightropes between the two. *In the Valleys of the Noble Beyond* is not really about Sasquatch. It is about how we see what we want to see and don't see what we're not prepared to see. A quirky and oddly captivating tale. —Eric Weiner, *Washington Post*

An adventure story in the tradition of Paul Theroux and in parts, Jon Krakauer, Zada is a latter-day Henry David Thoreau or John Muir. Searching for an elusive ape, Zada has a knack for meeting unforgettable humans. —Peter Kuitenbrouwer, *Globe and Mail*

If people can believe in God, why not Sasquatch? Zada takes us through the temperate rainforest of British Columbia, looking for both the hairy bipedal and the mythology and landscape surrounding it. Terrific nature writing with a furry twist. —Kerri Arsenault, *Orion*

*Born of Fire and Rain* Hoda Barakat, 2024-10-29 Go beyond the scenery of the Pacific temperate rainforest to witness how complex ecosystems survive in a world of upheavals. If you live on a rapidly changing planet, you'd be wise to learn how it works. The giant old forests on a skinny stretch of land on the far west coast of North America have a lot to say about living in a twitchy world. In this engaging book, science writer M. L. Herring takes readers into the Pacific temperate rainforest at the tumultuous edge of a shifting continent in a precarious moment of time. Readers peek behind the magnificent scenery into a forest of ancient trees, exploding mountains, disappearing owls, tsunamis, megafires, and ten million people to learn what it means to be a forest in a

world of upheavals Through Herring's words and pictures readers drift into the canopy through masses of ferns and lichens burrow into soil through hair thin threads of fungi and plunge headlong through a watershed flushed with rain and snowmelt Readers experience the temperate rainforest through science and art as it faces a shifting climate and the shifting priorities of a constantly changing society The book journeys beyond the grid of latitude and longitude and into places only one's imagination can fit to discover what it means to be human in an ecological world Species Problems and Beyond John S. Wilkins, Frank E. Zachos, Igor Ya. Pavlinov, 2022-06-14 *Species Problems and Beyond* offers a collection of up to date essays discussing from an interdisciplinary perspective the many ramifications of the Species Problem The authors represent experts in the philosophy of biology in species level evolutionary investigations and in biodiversity studies and conservation Some of the topics addressed concern the context sensitivity of the term species species as individuals processes natural kinds or as operative concepts species delimitation in the age of Big genomic Data and taxonomic inflation and its consequences for conservation strategies The carefully edited volume will be an invaluable resource for philosophers of biology and evolutionary biologists alike Olivier Rieppel Rowe Family Curator of Evolutionary Biology Negaunee Integrative Research Center Field Museum USA *Species or the Species Problem* is a topic in science in the philosophy of science and in general philosophy In fact it encompasses many aspects of the same problem and these are dealt with in this volume Species are often thought of as fundamental units of biological matter to be used in ecology conservation classification and biodiversity The chapters in this book present opposing views on the current philosophical and conceptual issues of the Species Problem in biology Divided into four sections Concepts and Theories Practice and Methods Ranks and Trees and Names and Metaphysics and Epistemologies the book is authored by biologists philosophers and historians many leaders in their fields Topics include ontology of species definitions of both species category and units species rank speciation issues nomenclature ecology and species conservation *Species Problems and Beyond* aims to clarify the contemporary issues of the Species Problem It is ideal for use in upper level seminars and courses in Evolutionary Biology Philosophy of Science Philosophy of Biology Systematics and Taxonomy and Phylogenetics Cladistics and for any scholar in these fields *Eating for Pregnancy* Catherine Jones, Rose Ann Hudson, 2019-07-02 The comprehensive pregnancy nutrition guide completely revised to cover baby's development and mom's health month by month and updated with the latest research and 25 new recipes *Eating for Pregnancy* is the ultimate no nonsense nutrition guide and cookbook for moms to be Every pregnant woman understands that what she eats and drinks affects the baby growing within her Yet many of them don't have the time or energy to ensure they're always eating right The guide walks readers through pregnancy month by month to cover developmental highlights body changes and nutritional needs of the mother and baby Each chapter shares delicious healthful recipes that put a special emphasis on the nutrients that mother and baby need that month during preconception the nine months of pregnancy and the postpartum period Each of the 150 recipes highlights the essential nutrients for mom and

growing baby and provides handy nutritional breakdowns and complete meal ideas This new edition has been completely revised and updated with 25 brand new recipes and updated classics with more quick and easy dishes more vegan and vegetarian recipes and variations and more gluten free options The most up to date information on supplements nutrient sources environmental concerns and high risk pregnancies Guidance for mothers with diabetes or gestational diabetes including low carb meal plans recipe variations and dining out strategies

*The Routledge Handbook of Philosophy of Biodiversity* Justin Garson, Anya Plutynski, Sahotra Sarkar, 2016-10-04 Biological diversity or biodiversity is the degree of variation of life within an ecosystem It is a relatively new topic of study but has grown enormously in recent years Because of its interdisciplinary nature the very concept of biodiversity is the subject of debate amongst philosophers biologists geographers and environmentalists The Routledge Handbook of Philosophy of Biodiversity is an outstanding reference source to the key topics and debates in this exciting subject Comprising twenty three chapters by a team of international contributors the Handbook is divided into six parts Historical and sociological contexts focusing on the emergence of the term and early attempts to measure biodiversity What is biodiversity How should biodiversity be defined How can biodiversity include entities at the edge of its boundaries including microbial diversity and genetically engineered organisms Why protect biodiversity What can traditional environmental ethics contribute to biodiversity Topics covered include anthropocentrism intrinsic value and ethical controversies surrounding the economics of biodiversity Measurement and methodology including decision theory and conservation the use of indicators for biodiversity and the changing use of genetics in biodiversity conservation Social contexts and global justice including conservation and community conflicts and biodiversity and cultural values Biodiversity and other environmental values How does biodiversity relate to other values like ecological restoration or ecological sustainability Essential reading for students and researchers in philosophy environmental science and environmental studies and conservation management it will also be extremely useful to those studying biodiversity in subjects such as biology and geography
