Lecturas del agua María Isabel Morales Sánchez, 2018-05-08 La Red Internacional de Universidades Lectoras decidió crear un foro de investigadores sobre la cultura del agua con el objetivo de aunar esfuerzos en la investigación y la difusión de los trabajos realizados en esta línea por las universidades integrantes de la misma. Desde entonces se han sucedido diversas iniciativas cuyo objetivo principal ha sido el de ofrecer miradas multidisciplinares en torno a la lectura y la interpretación de sus paisajes y de la cultura que los integra. Este libro se suma a dichas aportaciones ofreciendo una visión certera, heterogénea y plural que vierte nuevas gotas a un incesante caudal tan esencial en nuestra historia e identidad. Una obra que nos ofrece un variado recorrido por cauces y meandros, ciudades y desiertos, mitos y villas turísticas. Un espacio abierto y transversal que invita a la reflexión y a la lectura al descubrimiento y a la revelación.

LA DIETA DE MARIN COUNTY Albert C. Goldberg, MD, 2013-12 This book contains everything a parent needs to know to design an optimal diet for the healthy child from infancy through the teenage years. It addresses the need for a practical nutrition book that contains evidence-based information rather than faith-based reasoning passed off as science. It addresses the daily nutritional health issues of children in a specific, truthful and friendly way. In addition to parents, this book will be of special interest to nursery schools, elementary and high school teachers, coaches, all health care providers, family physicians, pediatricians and nurses who work with children including pediatric and family nurse practitioners. At the turn of the previous century, malnutrition, the lack of certain nutrients, vitamins and minerals was a problem second only to infection in this country. Today, malnutrition is more likely to be a case of overconsumption of certain nutrients. Too much has replaced too little: too much fat, too much salt, too much sugar and too much ultra-processed food. The author reveals the solution to the problem of overconsumption in this book, which is peppered throughout with helpful nutritious recipes as well as examples of the food labels of many popular products with notes on what to look out for when reading the packages of your favorite foods. Although most of Dr. Goldberg's suggestions and anecdotes come from his years of nurturing thousands of children and their parents, he has recruited the experience of many other experts in nutrition. For the past twenty-five years, the author has worked in countries such as Argentina, Chile, China, Colombia, Ecuador, Ethiopia, Honduras, India, Nepal, Philippines, Peru, Venezuela and Vietnam, where poverty, ignorance, social disintegration and war have contributed to nutritional diseases, and he has brought back with him a keen understanding of the multi-cultural effects upon diet. In 2001, Doctor Goldberg was selected as one of fifty Unsung Heroes of Compassion from around the world and was acknowledged personally by His Holiness the XIV Dalai Lama.

Water Resources of North America Asit K. Biswas, 2013-12-17 Leonardo da Vinci, the eminent Renaissance scholar and philosopher, said water is the driver of nature. Many may have considered it to be an overstatement in the past, but at the beginning of the third millennium, no sane individual would disagree with Leonardo's view. Water is becoming an increasingly scarce resource for most of the world's citizens. The current trends indicate that the overall situation is likely to deteriorate further at least.

for the next two decades unless the water profession eschews its existing business as usual practices which can only allow incremental changes to occur Somewhat surprisingly the water profession as a whole neither realised nor appreciated the gravity of the global water situation as late as 1990 even though a few serious scholars have been pointing out the increasing criticality of the situation from around 1982 For example the seriousness of the crisis was not a major issue either at the International Conference on Water and the Environment which was organised by the UN system in Dublin and also at the UN Conference on Environment and Development at Rio de Janeiro Held in 1992 both are considered to be important events for the water sector of the past decade It is now being increasingly recognised that the Dublin Conference was poorly planned and organised and thus not surprisingly it produced very little if any worthwhile and lasting results **(español)**
