Theater Urbanism Charlie Qiuli Xue, 2019-07-04 This volume explores the phenomenon and trend of cultural buildings by investigating 10 typical cities in China from the first second and third tiers and from the Chinese diaspora Each grand theater design was the result of a high profile international competition and created by global architects in collaboration with Chinese design institutes The national and international significance of these iconic projects lies in the fact that they not only reflect the dynamics of global design ideas but also represent a particular historical moment in China's modernization process The development histories and purposes of constructing cultural buildings are carefully outlined and colorfully presented Given China's tremendous population the development trajectory of its urban construction will provide insights for other regions that hope to embark on the high speed track in the 21st century In *Grand Theater Urbanism* Professor Charlie Xue and his team document China's current shift towards a culture of consumption and leisure symbolized by the construction of multi use Grand Theaters in major cities *Grand Theater Urbanism* reveals the unexpected variety and complexity of this contemporary cultural drive in a series of exemplary chapters with highly detailed local case studies Professor David Grahaeme Shane Columbia University New York Jane Jacobs likened city life to a performance This book goes a stage further and analyses the actual performance spaces within cities in China In doing so it makes a valuable connection between urban design and the cultural life in cities This is an important and often forgotten dimension of urbanism and I heartily commend this book to readers Professor Matthew Carmona The Bartlett University College London

Aspects of Urbanization in China Gregory Bracken, 2012 China's opkomst als wereldmacht is een van de ingrijpendste gebeurtenissen van deze tijd Honderden miljoenen mensen zijn de armoede ontvlucht dankzij de snelle industrialisatie van het land De wonderbaarlijke economische groei van China heeft zijn nadelen iets wat vaak het meest pijnlijk duidelijk wordt in de steden Deze studie is geschreven door wetenschappers uit verschillende disciplines waaronder architectuur stedenbouw sociale wetenschappen aardrijkskunde en antropologie Een deel van de auteurs behandelt de mondiale ambities van de steden terwijl andere hun culturele en architecturale uitingen onderzoeken

Beyond Regimes Duara Prasenjit, Elizabeth J. Perry, 2020-10-26 For many years China and India have been powerfully shaped by both transnational and subnational circulatory forces This edited volume explores these local and global influences as they play out in the contemporary era The analysis focuses on four intersecting topics labor relations legal reform and rights protest public goods provision and transnational migration and investment The eight substantive chapters and introduction share a common perspective in arguing that distinctions in regime type democracy versus dictatorship alone offer little insight into critical differences and similarities between these Asian giants in terms of either policies or performance A wide variety of subnational and transnational actors from municipal governments to international organizations and from local NGO activists to a far flung diaspora have been and will continue to be decisive The authors approach China and India through a strategy of convergent comparison in which they investigate temporal and spatial parallels at various critical junctures at various levels of the

political system and both inside and outside the territorial confines of the nation state The intensified globalization of recent decades only heightens the need to view state initiatives against such a wider canvas Globalization, Modernity and the City John Rennie Short, 2013-03-01 We live in a world of big cities Urbanization globalization and modernization have received considerable attention but rarely are the connections and relations between them the subjects of similar attention Cities are an integral part of the network of globalization and important sites of modernization Globalization Modernity and The City weaves together broad social themes with detailed urban analysis to explore the connections between the rise of big cities the creation of a global network and the making of the modern world It explains the growth of big cities the urban bias of global flows and the creation of metropolitan modernities The text develops broad theories of the subtle and complex interactions between urbanization globalization and modernization in a sweep of the urban experience across the globe Thematic chapters explore the making of the modern city in profiles of the growth of urban spectacles the role of flânerie the traffic issues of the modernist city recurring issues of urban utopias and the rise of the primate city Detailed case studies are drawn from cities in Australia China and the USA Urban snapshots of cities such as Atlanta Barcelona Istanbul Mumbai and Seoul provide a truly global coverage The book links together broad social themes with deep urban analysis This well written accessible and illustrated text will appeal to the broad audience of all those interested in the urban present and the metropolitan future

Anyuan Elizabeth Perry, 2012-10-01 How do we explain the surprising trajectory of the Chinese Communist revolution Why has it taken such a different route from its Russian prototype An answer Elizabeth Perry suggests lies in the Chinese Communists creative development and deployment of cultural resources during their revolutionary rise to power and afterwards Skillful cultural positioning and cultural patronage on the part of Mao Zedong his comrades and successors helped to construct a polity in which a once alien Communist system came to be accepted as familiarly Chinese Perry traces this process through a case study of the Anyuan coal mine a place where Mao and other early leaders of the Chinese Communist Party mobilized an influential labor movement at the beginning of their revolution and whose history later became a touchstone of political correctness in the People's Republic of China Once known as China's Little Moscow Anyuan came over time to symbolize a distinctively Chinese revolutionary tradition Yet the meanings of that tradition remain highly contested as contemporary Chinese debate their revolutionary past in search of a new political future

New Urban Configurations R. Cavallo, S. Komossa, N. Marzot, 2014-04-25 Urban areas have been caught up in a turbulent process of transformation over the past 50 years and changes have been rapid with issues such as mobility nature water management energy use and public space featuring prominently

In each Olympic year since 1988 the Faculty of Architecture at Delft University of Technology has held an international conference focusing on the connection between research and design exploring the field of tension between science technology and art

This book presents the proceedings of the latest in this series of conferences New Urban Configurations held in Delft the Netherlands in October 2012 in collaboration with the

European Association for Architectural Education EAAE and the International Seminar on Urban Form ISUF This edition of the conference discussed the role and critical potential of the architectural project in the transformation process of cities and territories that leads to new urban configurations _x000D_ The publication contains all 140 accepted papers and a selection of the keynote lectures presented at the conference The papers have been grouped into five main themes innovation in building typology infrastructure and the city complex urban projects green spaces and delta urbanism Four of these major topics are further divided into several subtopics _x000D_ This book will be of interest to everyone involved in designing building thinking about as well as managing the urban landscape and territory In the Images of Development Tridib Banerjee,2021-06-08 The urban legacy of the Global South since the colonial era and how sustainable development and environmental and social justice can be achieved Remarkably little of the expansive literature on development and globalization considers actual urban form and the physical design of cities as outcomes of these phenomena The development that has shaped historic transformations in urban form and urbanism and the consequent human experiences remains largely unexplored In this book Tridib Banerjee fills this void by linking the idea of development with those of urbanism urban form and urban design focusing primarily on the contemporary cities in the developing world the Global South and their intrinsic prospects in city design Further he examines the endogenous possibilities for the future design of these cities that may address growing inequality and the environmental crisis Banerjee deftly traces the urban legacy of the Global South from the beginning of the colonial era closely examining the economic political and ideological forces that influenced colonial and postcolonial development drawing from relevant experiences of different cities in the developing world and discussing the arguments for the historic parity of these cities with their Western counterparts Finally Banerjee considers essential notions of future city design that are grounded in the critical challenges of sustainable development equity environmental and social justice and diversity and how such outcomes can be achieved This book serves as the opening of a long overdue conversation among design development and planning scholars and practitioners and those interested in the urban development of the Global South
