Life's Solution Simon Conway Morris, 2003-09-04 The assassin's bullet misses the Archduke's carriage moves forward and a catastrophic war is avoided So too with the history of life Re run the tape of life as Stephen J Gould claimed and the outcome must be entirely different an alien world without humans and maybe not even intelligence The history of life is littered with accidents any twist or turn may lead to a completely different world Now this view is being challenged Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution repeatedly Eyes brains tools even culture all are very much on the cards So if these are all evolutionary inevitabilities where are our counterparts across the galaxy The tape of life can only run on a suitable planet and it seems that such Earth like planets may be much rarer than hoped Inevitable humans yes but in a lonely Universe *From Atlantis to the Sphinx* Colin Wilson, 2004-07-01 In this compelling book Colin Wilson argues that thousands of years before ancient Egypt and Greece held sway there was a great civilization whose ships traveled the world from China to Antarctica Their advanced knowledge of science mathematics and astronomy was passed on to descendants who escaped to Egypt and South America From Atlantis to the Sphinx bases this assertion on a true fact that archaeologists and geologists are at odds over the age of the Sphinx Archaeologists claim that the Sphinx dates to classical dynastic Egypt around 2 400 b c But some geologists claim that it could have been built as early as 7 000 to 10 500 b c The geologists claim is based on the curious fact that the erosion of the

Sphinx is more characteristic of water erosion than that of wind and sand Starting from the assumption that there was an advanced civilization in existence much earlier than previously thought Wilson goes on to claim that it could very well be Atlantis not a literal island that sank but more of a great civilization that either declined naturally or experienced a great catastrophe passing on only a fraction of its knowledge to other peoples From Atlantis to the Sphinx delves into what might have been a completely different knowledge system from that of modern man one as alien to us as that of the Martians The book sets out to reconstruct that ancient knowledge in a fascinating exploration of the remote depths of history a ground breaking attempt to understand how these long forgotten peoples thought felt and communicated with the universe The Importance of Religion Gavin Flood,2011-11-07 The Importance of Religion reveals the significance of religion in modern times showing how it provides people with meaning to their lives and helps guide them in their everyday moral choices Provides readers with a new understanding of religion demonstrating how in its actions texts and world views religion is enduring and vividly engages with the mystery of the world Offers striking arguments about the relationship of religion to science art and politics Engagingly written by a highly respected scholar of religion with an international reputation **The Early Neolithic of the Eastern Fertile Crescent** Roger Matthews,Wendy Matthews,Kamal Rasheed Raheem,Amy Richardson,2020-07-31 The Eastern Fertile Crescent region of western Iran and eastern Iraq hosted major developments in the transition from hunter forager to farmer herder lifestyles through the Early Neolithic period 10 000 7000 BC Within the scope of the Central Zagros Archaeological Project excavations have been conducted since 2012 at two Early Neolithic sites in the Kurdistan region of Iraq Bestansur and Shimshara Bestansur represents an early stage in the transition to sedentary farming life where the inhabitants pursued a mixed strategy of hunting foraging herding and cultivating maximising the new opportunities afforded by the warmer wetter climate of the Early Holocene They also constructed substantial buildings of mudbrick including a major building with a minimum of 65 human individuals mainly infants buried under its floor in association with hundreds of beads These human remains provide new insights into mortuary practices demography diet and disease during the early stages of sedentarisation The material culture of Bestansur and Shimshara is rich in imported items such as obsidian carnelian and sea shells indicating the extent to which Early Neolithic communities were networked across the Eastern Fertile Crescent and beyond This volume includes final reports by a large scale interdisciplinary team on all aspects of the results from excavations at Bestansur and Shimshara through application of state of the art scientific techniques methods and analyses The net result is to re emphasise the enormous significance of the Eastern Fertile Crescent in one of the most important episodes in human history the Neolithic transition How Compassion Made Us Human Penelope Spikins,2015-05-07 An intriguing look at how our capacity to care about and connect with others has contributed to our evolutionary success as a species Our ability to care about the wellbeing of others whether they are close family or strangers can appear to be unimportant in today s competitive societies But in this volume archaeologist Penny Spikins

argues that compassion lies at the heart of what makes us human She takes us on a journey from the earliest Stone Age societies two million years ago to the lives of Neanderthals in Ice Age Europe using archaeological evidence to illustrate the central role that emotional connections had in human evolution Simple acts of kindness left to us from millions of years ago provide evidence for how social emotions and morality evolved and how our capacity to reach out beyond ourselves into the lives of others allowed us to work together for a common good and form the basis for human success The Origins of Human Society Peter Bogucki,2000-01-04 The Origins of Human Society traces the development of human culture from its origins over 2 million years ago to the emergence of literate civilization In addition to a global coverage of prehistoric life the book pays specific attention to the origins and dispersal of anatomically modern humans the development of symbolic expression the transition from mobile foraging bands to sedentary households early agriculture and its consequences the emergence of social differentiation and hereditary ranking and the prehistoric roots of ancient states and empires The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production The Buried Soul Timothy Taylor,2005-08-15 Do cannibals exist Is there evidence for contemporary human sacrifice What are vampires The Buried Soul charts the story of the human response to death from prehistory to the present day This book is a radical adventure into the sepulchral world Prehistoric Belief Mike Williams,2011-11-08 Starting with the dawn of what we would recognise as modern human thought this book journeys through 35 000 years of our human past It shows how our earliest ancestors learnt to enter trance states and the revolutionary effect this had on the way they interacted with their world Moreover by marrying the very latest research with vivid first person reconstructions the book will actually take readers back in time In its pages we join Stone Age hunting parties steal food from desperate starving cannibals sit eye to eye with a mouldy Bronze Age mummy and join the Celts for a feast where you truly are what you eat The story of our past has never been told this way before and has never been brought to life with such vividness This is the past as our ancestors would have known it **The Healing Hand** Guido Majno,1975 This journey to the beginnings of the physician s art brings to life the civilizations of the ancient world Egypt of the Pharaohs Greece at the time of Hippocrates Rome under the Caesars the India of Ashoka and China as Mencius knew it Probing the documents and artifacts of the ancient world with a scientist s mind and a detective s eye Guido Majno pieces together the difficulties people faced in the effort to survive their injuries as

well as the odd chilling or inspiring ways in which they rose to the challenge In asking whether the early healers might have benefited their patients or only hastened their trip to the grave Dr Majno uncovered surprising answers by testing ancient prescriptions in a modern laboratory Illustrated with hundreds of photographs many in full color and climaxing ten years of work The Healing Hand is a spectacular recreation of man s attempts to conquer pain and disease
