Shaping Of Man Philosophical Aspects Of Sociobiology:

The Shaping of Man Roger Trigg, 1983 *An Encyclopedia of Philosophy* G.H.R. Parkinson, 2012-10-12 Presents a broad survey of philosophical thought Each chapter explores and places in context a major area of philosophical enquiry including the theory of meaning and of truth the theory of knowledge the philosophies of mathematics science and metaphysics the philosophy of mind moral and political philosophy aesthetics and religion Annotated bibliographies for each chapter and indexes of names and subjects Glossary of commonly used philosophical terms Chronological table of the history of philosophy from 1600 It is a fine achievement and deserves the warmest praise Anyone interested in learning what contemporary philosophical debate is about will find this book invaluable for a book of this size and quality of content the cover price is modest Every public library as well as every university college and school library should have a copy on its shelves Times Higher Education Supplement A stimulating collection Reference Reviews **Value, Obligation, and Meta-Ethics** Robin Attfield, 2020-10-12 This work defends an interrelated set of theses in value theory normative ethics and meta ethics The three Parts correspond to these three areas Part One Value defends a biocentric theory of moral standing and then the coherence and objectivity of belief in intrinsic value despite recent objections Intrinsic value is located in the flourishing of living creatures specifically a neo Aristotelian species relative account is supplied of wellbeing or flourishing in terms of the development of the essential capacities of one s species There follows a theory of priorities or of relative intrinsic value in which the satisfaction of basic needs takes priority over other needs and over wants and the interests of complex and sophisticated creatures over those of others where they are at stake Part Two defends a practice consequentialist theory of the criteria of rightness and of obligation which leaves room for supererogation underpins our intuitions about justice commends population growth only where it is genuinely desirable and responds better than act consequentialism to objections like that concerned with the separateness of persons Part Three sifts meta ethical theories rejects moral relativism and defends a cognitivist and naturalist meta ethic In defending analytical naturalism it takes into account the latest literature on supervenience By responding to recent discussions this study supersedes my Theory of Value and Obligation 1987 It is equipped with detailed end notes and an ample bibliography which could prove a research tool of itself In Search of Human Nature Carl N. Degler, 1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America s most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race Neither Black Nor White which won the Pulitzer Prize women s studies At Odds which Betty Friedan called a stunning book Southern history the New Deal and many other subjects Now in The Search for Human Nature Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years Just how much of

human nature is determined by genetics With this sweeping book Pulitzer prize winning historian Carl Degler provides an engrossing account of how we have grappled with that question by tracing the impact of Darwinism on the social sciences in the last hundred years The idea of biological roots to human nature was almost universally accepted at the turn of the century and was used to reinforce prejudice against women non whites and the poor whose positions were seen as the result of genetic weakness until it was discredited by the likes of Franz Boas Margaret Mead and B F Skinner But more recently Degler writes under the influence of Konrad Lorenz Jane Goodall Edward O Wilson and others a more objective approach has uncovered new links between evolution and human behavior A masterful work by one of America s preeminent historians In Search of Human Nature sheds brilliant new light on an essential question and how changing times have influenced the answers we have found

Biopolitics and Gender Meredith W Watts Jr, 2012-12-06 Here is an important book for social scientists interested in the influence of gender on certain types of behavior Several perspectives are presented on the general topic of biopolitics and gender including the points of view of brain science endocrinology ethology psychophysiology and such conventional interests as political attitudes socialization participation social structure and political hierarchy The varied and provocative ideas explored in this volume will broaden discussions of gender beyond an exclusive focus on sex links to oppression and discrimination

Wittgenstein and the Cognitive Science of Religion Robert Vinten, 2023-06-15 Advancing our understanding of one of the most influential 20th century philosophers Robert Vinten brings together an international line up of scholars to consider the relevance of Ludwig Wittgenstein s ideas to the cognitive science of religion Wittgenstein s claims ranged from the rejection of the idea that psychology is a young science in comparison to physics to challenges to scientific and intellectualist accounts of religion in the work of past anthropologists Chapters explore whether these remarks about psychology and religion undermine the frameworks and practices of cognitive scientists of religion Employing philosophical tools as well as drawing on case studies contributions not only illuminate psychological experiments anthropological observations and neurophysiological research relevant to understanding religious phenomena they allow cognitive scientists to either heed or clarify their position in relation to Wittgenstein s objections By developing and responding to his criticisms Wittgenstein and the Cognitive Science of Religion offers novel perspectives on his philosophy in relation to religion human nature and the mind

Empiricism, Explanation and Rationality Len & Roger Doyal & Harris, 2013-04-15 Originally published in 1986 All students of social science must confront a number of important philosophical issues This introduction to the philosophy of the social sciences provides coherent answers to questions about empiricism explanation and rationality It evaluates contemporary writings on the subject which can be as difficult as they are important to understand Each chapter has an annotated bibliography to enable students to pursue the issues raised and to assess for themselves the arguments of the authors

Issues in Evolutionary Ethics Paul Thompson, 1995-01-13 This book explores historical and current discussions of the relevance of evolutionary theory to ethics The historical section

conveys the intellectual struggle that took place within the framework of Darwinism from its inception up to the work of G C Williams W D Hamilton R D Alexander A L Trivers E O Wilson R Dawkins and others The contemporary section discusses ethics within the framework of evolutionary theory as enriched by the works of biologists such as those mentioned above The issue of whether ethical practice and ethical theory can be grounded in the theory of evolution has taken a new and significant direction within the context of sociobiology and is proving to be a challenge to previous thinking This book conveys that challenge

Being Human Roger Smith,2007-09-11 Challenging commonly held biological religious and ethical beliefs internationally well known historian of science Roger Smith boldly argues that human nature is not some thing awaiting discovery but is active in understanding itself According to Smith being human is a self creation made possible through a reflective circle of thought and action with a past and a future and studying this history from a range of perspectives is fundamental to human self understanding Smith s argument brings together historical and contemporary debates concerning materialism and human nature and the relations of the different fields of knowledge He draws on classic writings from across the human sciences touching on sociology anthropology brain sciences history philosophical hermeneutics and critical theory and demonstrates that there is no position outside history for an absolutely objective or eternally valid view of human nature The question what is human does not have and could not possible have one answer Instead there exists a variety of answers for different purposes and there are good reasons for the many conceptions of what it is to be human Smith does not treat human nature as only biological economic or moral but as a multidimensional subject that should be considered in its proper historical context By understanding this context Smith believes we can come to a truer understanding of ourselves Persuasively and elegantly written **Being Human** takes an important new turn in the philosophical study of being human

Science and Religion John Hedley Brooke,2014-05-15 Offers an introduction and critical guide to the relationship between scientific thought and religious belief

In Defence of Science Jack W. Grove,1989-12-15 Science holds a central role in the modern world yet its complex interrelationships with nature technology and politics are often misunderstood or seen from a false perspective In a series of essays that make extensive use of original work by sociologists historians and philosophers of science J W Grove explores the roles and relationships of science in modern technological society Modern Science can be viewed from four related perspectives It is an expression of human curiosity a passion to understand the natural world what it is made of how it is put together and how it works It is a body of practice a set of ways of finding out that distinguish it from other realms of inquiry It is a profession a body of men and women owing allegiance to the pursuit of knowledge and for those people a career And it is a prescriptive enterprise in that the increase of scientific understanding makes it possible to put nature to use in new kinds of technology Each of these aspects of science is today the focus of critical scrutiny and often outright hostility With many examples Grove exposes the threats to science today its identification with technology its subordination to the state the false claims made in its name and

the popular intellectual forces that seek to denigrate it as a source of human understanding and progress **Reductionism and Cultural Being** J.W. Smith,2012-12-06 **A Theory of Value and Obligation** Robin Attfield,2020-07-20 Originally published in 1987 and re issued in 2020 with a new Preface this book presents and elaborates interrelated solutions to a number of problems in moral philosophy from the location of intrinsic value and the nature of a worthwhile life via the limits of obligation and the nature of justice to the status of moral utterances After developing a biocentric account of moral standing the author locates worthwhile life in the development of the generic capacities of a creature whether human or nonhuman and presents an account of relative intrinsic value which later generates a theory of interspecific justice This value theory also informs a consequentialist understanding of obligation of moral rightness and of supererogation The understanding thus supplied is shown to cope with the problems of integrity of justice and of the Repugnant Conclusion in population ethics A cognitivist account of ethical conclusions such as those so far reached is then defended against non cognitivist and relativist objections and a far reaching naturalist theory is defended integrating earlier conclusions with an account of the logic of the fundamental ethical concepts This wide ranging volume which maps the whole area of morality is thoroughly argued with reference both to contemporary philosophical developments and to classical theories

Wickedness Dr Mary Midgley,Mary Midgley,2024-11-01 To look into the darkness of the human soul is a frightening venture Here Mary Midgley does so with her customary brilliance and clarity Midgley s analysis proves that the capacity for real wickedness is an inevitable part of human nature This is not however a blanket acceptance of evil Out of this dark journey she returns with an offering to us an understanding of human nature that enhances our very humanity

Evolutionary Theory and Human Nature Ron Vannelli,2012-12-06 Evolutionary Theory and Human Nature is an original highly theoretical work dealing with the transition from genes to behavior using general principles of evolution especially those of sexual selection It seeks to develop a seamless transition from genes to human motivations as bio electric brain processes emotional cognitive processes to human nature propensities various constellations of emotional cognitive forces desires and fears to species typical patterns of behavior This work covers two often antagonistic fields biology and the social sciences It should be of strong interest to anthropologists sociologists sociobiologists psychobiologists and psychologists who are interested in the question of human nature influences on social behavior **Companion**

Morality Matters Roger Trigg, 2008-04-15 Morality still matters argues philosopher Roger Trigg in this accessible introduction to moral thinking Written for general readers with no background in philosophy Argues that we need a shared moral vision in order to live together both nationally and internationally Considers the need for a shared morality in relation to subjects of vital importance such as human rights Stresses that private behaviour cannot be kept separate from public choices Discusses matters of topical debate on both sides of the Atlantic

Verification in Economics and History Omar F. Hamouda, Betsey Price, 2012-11-12 Attitudes and methods derived from the hard sciences have become increasingly commonplace in the human and social sciences Whilst this scientification process has undoubtedly fostered the growth of knowledge within history and economics these are disciplines where verification as practised in the pure sciences is not appropriate This book first published in 1991 argues constructively for a new interpretation of scientific verification within economics and history

Making our Way through the World Margaret S. Archer, 2007-06-14 How do we reflect upon ourselves and our concerns in relation to society and vice versa Human reflexivity works through internal conversations using language but also emotions sensations and images Most people acknowledge this inner dialogue and can report upon it However little research has been conducted on internal conversations and how they mediate between our ultimate concerns and the social contexts we confront In this book Margaret Archer argues that reflexivity is progressively replacing routine action in late modernity shaping how ordinary people make their way through the world Using interviewees life and work histories she shows how internal conversations guide the occupations people seek keep or quit their stances towards structural constraints and enablements and their resulting patterns of social mobility
