*How Industry Analysts Shape the Digital Future* Neil Pollock, Robin Williams, 2016-01-14 Industry analysts are in the business of shaping the technological and economic future They attempt to predict what will become the next big thing to spot new emerging trends and paradigms to decide which hi tech products will win out over others and to figure out which technology vendors can deliver on their promises In just a few short years they have developed a surprising degree of authority over technological innovation Yet we know very little if anything about them This book seeks to explain how this was achieved and on what this authority rests Who are the experts who increasingly command the attention of vendor and user communities What is the nature of this new form of technical and business knowledge How Industry Analysts Shape the Digital Future offers the first book length study into this rarely scrutinized form of business expertise Contributions to this volume show how from a small group of mainly North American players which arose in the 1970s Gartner Inc has emerged as clear leader of a 6 billion industry that involves several hundred firms worldwide Through interviews and observation of Gartner Inc and other industry analyst firms the book explores how these firms create their predictions market classifications and rankings as well as with how these outputs are assessed and consumed The book asks why many social scientists have ignored the proliferation of these new forms of management and technical expertise In some cases scholars have deflated this kind of business acumen portraying it as arbitrary knowledge whose methods and content do not deserve enquiry The valuable exception here has been the path breaking work on the performativity of economic financial or accounting knowledge Drawing upon recent performativity arguments the book argues the case for a Sociology of Business Knowledge

*Understanding Actors and Processes Shaping Transgender Subjectivities* Zhanar Sekerbayeva, 2023-01-01 This book introduces the policies surrounding legal gender recognition of trans people in Kazakhstan Generally the research in this sphere focuses on medical professions described as gatekeepers or judges deciding who fit the prescriptions of being a woman or a man and on trans people themselves who are often portrayed as victims However this process is more complex than only describing the interaction of these two groups or by labelling them either as gatekeepers or victims The project provides a critical approach and attempts to expand our understanding of the process the dynamics and the actors involved This study will be of interest to scholars of contemporary Kazakhstan and of feminism and LGBTQ activism more generally

**The Changing Shape of Nursing Practice** Davina Allen, 2002-01-04. Bringing together sociological theories and nursing practice, this text develops a dynamic conceptualisation of the nursing role which is rooted in the work setting. It looks at the factors which have shaped nursing work in the past and those which are likely to shape it in the future. Nurses' work is changing in two respects: the place nursing occupies in the health care division of labour and the routine shifting of work boundaries that nurses experience in their daily work. Drawing on her detailed observations of the reality of nursing work in a district general hospital, Davina Allen explores these linked themes, focussing on five key work boundaries: nurse-doctor, nurse-manager, nurse-support worker, nurse-patient, nurse-nurse. The text provides new insight into many of the tensions and dilemmas nurses routinely face and the processes and constraints through which their work is fashioned. It offers a new way of thinking about the nursing role which is particularly relevant at a time when the scope of nursing practice is expanding and when the integrated approach to health and social care is seen as the key to provision and improved services.

**the Spaces Between: Unseen Forces That Shape Your Life** Michael Reccia, 2019-08-09. Prepare yourself for an eye-opening odyssey through magical metaphysical realities. The spaces between are filled with wonder, spectacle, and the unexpected. So says Joseph, the ancient discarnate spirit communicator, in this, the eighth book of his internationally acclaimed series, as he draws back the heavy curtain of reality to reveal aspects of the world and of our physical and spiritual lives that have remained unnoticed, unseen, and unappreciated for countless aeons. Within these pages, you will meet the many wondrous expressions of spiritual life, both positive and negative, that cohabit and interact with us on Earth: hugely influential beings that at worst have been dismissed entirely and at best confined to the realms of folklore and myth, as a result of our current fascination with all things material and the glamour of our express train society. You will also come face-to-face with and discover the nature of some of the deepest facets of yourself, allowing you to gain greater control over your life and to express and project the noblest aspects of you into the world for your personal benefit, the benefit of all humanity, and the good of the planet itself. Prepare yourself for an enlightening, enthralling, and sometimes shocking journey through the parallel realms that exist around and within you at this very moment, waiting to once again be recognised and understood. By the last page, you will be in no doubt that the spaces between, on Earth, in the heavens, and deep within yourself, are in fact anything but.

**Doctors and the State** Dorothy Mutizwa-Mangiza, 2018-08-13. Published in 1999, the main aim of this text is to examine the nature of professional control, medical practice, and the state of health services in a post-colonial state and the medical profession in Zimbabwe since 1980. The text reviews the theories of professions and professional control and medical practice; it concludes by examining the nature of the Zimbabwean state. The chapter on methodology highlights some of the ethical dilemmas of carrying out research in developing countries. The book then goes on to review health services and policies of both the colonial and post-colonial governments in Zimbabwe. Three chapters discuss the nature of medical practice and the constraints encountered by doctors in their work, the terms and conditions of service under which doctors work, and the nature of medical regulation, of education, licensing, and discipline, including issues such as malpractice and litigation. Throughout the book, comparisons are made with situations in other

countries both developed and developing and the main conclusions of the book are that medical doctors in Zimbabwe have minimal administrative restrictions on the type of treatment which they can carry out but the unavailability and breakdown of essential equipment shortages of essential drugs and staff limit the doctors autonomy to carry out the treatment that they consider necessary
