Shaping Identity In Canadian Society:

Shaping Identity in Canadian Society Jack Haas, William Shaffir, 1978-01-01 **Canadian Women Shaping Diasporic Religious Identities** Becky R. Lee, Terry Tak-ling Woo, 2016-01-01 This collection of essays explores how women from a variety of religious and cultural communities have contributed to the richly textured pluralistic society of Canada. Focusing on women's religiosity, it examines the ways in which they have carried and conserved and brought forward and transformed their cultures old and new in modern Canada. Each essay explores the ways in which the religiosities of women serve as locations for both the assertion and the refashioning of individual and communal identity in transcultural contexts. Three shared assumptions guide these essays: religion plays a dynamic role in the shaping and reshaping of social cultures; women are active participants in their transmission and their transformation; and a focus on women's activities within their religious traditions often informal and unofficial provides new perspectives on the intersection of religion, gender, and transnationalism. Since the first European migrations, Canada has been shaped by immigrant communities as they negotiated the tension between preserving their religious and cultural traditions and embracing the new opportunities in their adopted homeland. Viewing those interactions through the lens of women's religiosity, the essays in this collection model an innovative approach and provide new perspectives for students and researchers of Canadian Studies, Religious Studies, and Women's Studies.

This meticulously researched and engaging narrative explores the challenges and triumphs of those who dared to build a new life in Canada, shaping a nation built on courage, resilience, and the enduring spirit of human endeavor. Discover the stories that shaped Canada and the enduring legacy of its pioneers and settlers.

The European Roots of Canadian Identity Philip Resnick, 2005-04-01 What makes Canada a different kind of society from the United States? In this book-length essay, Philip Resnick argues that in more ways than one, Canada has been profoundly marked by its European origins. This is most apparent where the European historical underpinnings, both of English-speaking

and French speaking Canada are concerned but it is no less true when one examines Canada's multiple national identities robust social programs increasingly secular values and multilateral outlook on international affairs today As the war in Iraq brought home and the 2004 federal election reinforced Canada is a more European type society than is our neighbour to the south This does not come without its own complexities or problems On the contrary there are significant parallels between the ambiguous versions of national identity that one finds in Canada and what one finds on the European continent There are parallels too between the elements of self doubt that characterize Canadians overall when they think about their country and those of Europeans caught up in their own often fractious attempts to forge a more integrated Europe The author argues that Canada needs Europe as an effective counter weight to the influence of the United States He further argues that at a deeper existential level Canadians need relevant European references to better understand what makes them the kind of North Americans that they are
