**Virtualization of Universities** Thomas Pfeffer, 2011-12-08 The purpose of this volume is to shape conceptual tools to understand the impact of new information and communication technologies ICTs on the organization of universities Traditional research based universities the most typical representatives of the higher education system find themselves challenged by the speed and the wide range of technical innovations but also by a vast array of implicit assumptions and explicit promises associated with the distribution of digital media The author observes that as universities increasingly use digital media computers and the Internet to accomplish their tasks a transformation takes place in an evolutionary rather than in a revolutionary way Using the University of Klagenfurt as an in depth case study he explores such dynamic issues as how digital media affect the practice of research the preservation and dissemination of knowledge for example through publishing and archiving and delivery of education at universities More broadly he considers issues of organizational culture and design administration and leadership as universities integrate digital technologies into all aspects of their operations

**Organization Theory and Governance for the 21st Century** Sandi Parkes Pershing, Eric K. Austin, 2014-08-21 Applying organization theory to public and governance organizations Organization Theory and Governance for the 21st Century presents readers with a conscious and thoughtful awareness of the history and evolving nature of organizations Authors Sandra Parkes Pershing and Eric Austin address emerging theories rarely touched upon in competing titles and take a deeper look into assumed theories to give the student a chance to critically consider the consequences these embedded assumptions have for organizational practice By providing a consistent theoretical grounding and a clear focus on post traditionalist thinking the book gives students the background they need to analyze organizational settings and take effective

action in the unique setting of contemporary governance      Theories of Communication Networks Peter R. Monge, Noshir Contractor, 2003-03-27 Theories of Communication Networks presents solutions to all five problems The authors develop a multi theoretical model that relates different social science theories with different network properties This model is multilevel providing a network decomposition that applies the various social theories to all network levels individuals dyads triples groups and the entire network The book then establishes a model from the perspective of complex adaptive systems and demonstrates how to use Blanche an agent based network computer simulation environment to generate and test network theories and hypotheses It presents recent developments in network statistical analysis the p family which provides a basis for valid multilevel statistical inferences regarding networks Finally it shows how to relate communication networks to other networks thus providing the basis in conjunction with computer simulations to study the emergence of dynamic organizational networks
