Sharing And Caring Log:

Caring is Sharing — Exploiting the Value in Data for Health and Innovation M. Häggglund, M. Blusi, S. Bonacina, 2023-06-22 Modern information and communication technologies make it easier for individuals to be involved in their own health and social care. They also facilitate contact between individuals and service providers and deliver more efficient tools for healthcare staff. Artificial Intelligence (AI) promises to bring even more benefits in the future with more effectiveness and the provision of decision support. This book presents the proceedings of the 33rd Medical Informatics Europe Conference (MIE2023) held in Gothenburg, Sweden, from 22 to 25 May 2023. The theme of MIE2023 was Caring is Sharing: Exploiting Value in Data for Health and Innovation, stressing the increasing importance of sharing digital health data and the related challenges. The sharing of health data is developing rapidly both in Europe and beyond, so the focus of the conference was on the enabling of trustworthy sharing of data to improve health. Topics covered include healthcare, community care, self care, public health, and the innovation and development of future-proof digital health solutions, and the almost 300 papers divided into 10 chapters also cover important advances in the sub domains of biomedical informatics, decision support systems, clinical information systems, clinical research informatics, knowledge management and representation, consumer health informatics, natural language processing, public health informatics, privacy, ethical and societal aspects among them. Describing innovative approaches to the collection, organization, analysis, and data sharing related to health and wellbeing, the book contributes to the expertise required to take medical informatics to the next level and will be of interest to all those working in the field.

Caring and Sharing Robert D. Myrick, Tom Erney, 1978 This book contains information and skill building activities designed to train adolescents as peer facilitators. The first chapter describes peer facilitation and provides an overview of the book. The second chapter discusses principles, concepts, and ideas to help better understand how people learn, make decisions, change, and develop their own unique personalities. The third chapter describes the process of attentive listening. The fourth chapter discusses the skills and intuitive elements needed for the facilitator to increase the chances that the helping conditions will be present and that the relationship will be beneficial. The fifth chapter describes a facilitative feedback model. The value of feedback, feedback as praise, feedback as confrontation, direct and indirect feedback, and using feedback in a group are discussed. The sixth chapter examines responsible decision making. A five-step model is presented which can serve as a guide in decision making. The seventh chapter addresses the evaluation process. Assessment of self and others is discussed as information needed to evaluate progress, make adjustments when necessary, give direction, and eventually help group members understand more about their work. The eighth chapter focuses on practical aspects of being a peer facilitator. Three peer facilitator roles are described and possible work settings are described. The ninth chapter provides information for handling problem moments as a peer facilitator.
