Sharing Realities Toward An Epistemology Of Conversation:

Sharing Realities: Toward an Epistemology of Conversation Richard Ostrofsky, 2005-10 Our senses do not take in the world as it is Rather the mind construes an intelligible world for human and personal purposes What remains of reason truth and knowledge when this post modern insight is accepted This book draws a sharp distinction between responsible pluralism and anything goes relativism arguing that Nietzsche and his followers are correct that all cognition depends on willful acts of interpretation but wrong in concluding that discourse between interpretive cultures can be nothing more than a power struggle It responds to the post modern scandal of interpretations by showing how public truth may be construed and deployed in policy making as a structure of argument among conflicting strategies of understanding *Contemporary Curriculum Discourses* William F. Pinar, 1999 JCT was the most important journal of curriculum studies during the field's paradigm shift in the 1970s Its editors sponsored a yearly conference which also supported the intellectual breakthrough that was the reconceptualization of American curriculum studies This collection brings together the best of JCT articles plus key documentary material of importance to scholars and students alike Undergraduate and graduate students in curriculum instruction and foundations would find this book useful and insightful

Virtual Realities and Their Discontents

Robert Markley,1996 The recognition that cyberspace is a fiction a narrative that creates a coherence it would like to imagine really exists is crucial to any theoretically sophisticated critique of the limitations of this consensual hallucination and the discontents it imperfectly masks In this groundbreaking volume Robert Markley and his co authors set out to discover why cyberspace provokes often rapturous rhetoric but resists critical analysis Taking a variety of approaches the authors explore the ways in which virtual realities conserve and incorporate rather than overthrow the assumptions and values of a traditional logocentric humanism the Platonist division of the world into the physical and metaphysical in which ideal forms are valued over material content Cyberspace David Porush suggests represents not a break with our metaphysical past but an extension of its basic theistic postulates Richard Grusin argues that the claims for new forms of electronic communication depend upon the very notions of authorship and subjectivity they claim to transcend N Katherine Hayles examines debates about cybernetics in the 1950s to demonstrate that the history of mind body ideas in the age of computers and feedback loops is itself conflicted David Brande analyzes cyberspace as an extension of the logic of late twentieth century capitalism And Robert Markley explores the entangled roots of cyberspace in the philosophy of mathematics One of the ironies of our culture s fascination with cyberspace is that our material and psychic investments in Virtual Reality suggest that the death of print culture or its disappearance into the matrix has been greatly exaggerated Cyberspace is unthinkable literally inconceivable without the print culture it claims to transcend It is in part a by product of a tradition of metaphysics that boats against the current bears us back relentlessly to our past Robert Markley from the introduction

Critical Conversations Murray A. Rae,2012-01-18 Critical Conversations provides a series of theological engagements with the work of Michael Polanyi one of the twentieth century s most profound philosophers of science Polanyi s sustained explorations of the nature of human knowing open a range of questions and themes of profound importance for theology He insists on the need to recover the categories of faith and belief in accounting for the way we know and points to the importance of tradition and the necessity sometimes of conversion in order to learn the truth of things These themes are explored along with Polanyi s social and political thought his anthropology his hermeneutics and his conception of truth Several of the essays set Polanyi alongside the work of other thinkers particularly Karl Barth Lesslie Newbigin Hans Georg Gadamer and Rene Girard and they discuss points of comparison and contrast between the respective figures While all the essays are appreciative of Polanyi s contribution they do not shy away from critical analysis and take further therefore the critical appreciation of Polanyi s work

Conversation Analysis and Sociological Theory Melisa Stevanovic,David Inglis ,Anssi Peräkylä,Emmi Koskinen,2024-08-22 The relations between Conversation Analysis CA sociology and social theory are complex often ambiguous and have sometimes been rather fraught While there might be some relatively high level of agreement amongst their practitioners on what CA is what it does and what it is meant

to achieve that is not so much the case for the more open and broad terrains of sociology and social theory Moreover each of the domains in question has changed in orientation composition and academic location since CA first came into existence in the late 1960s While initially a child of sociology as CA has matured and extended its substantive and methodological reach it has become a large intellectual domain in its own right with inputs from and relevance for a host of other disciplines notably linguistics anthropology and psychology It is now no longer at all clear how CA relates to sociology and social theory what each side currently does or what it could bring to the other in the future

Gossip, Epistemology, and Power Karen Adkins, 2017-02-22 This book explains how gossip contributes to knowledge Karen Adkins marshals scholarship and case studies spanning centuries and disciplines to show that although gossip is a constant activity in human history it has rarely been studied as a source of knowledge People gossip for many reasons but most often out of desire to make sense of the world while lacking access to better options for obtaining knowledge This volume explores how when our access to knowledge is blocked gossip becomes a viable path to knowledge attainment one that involves the asking of questions the exchange of ideas and the challenging of preconceived notions

Mirrors and Reflections Charlotte Burck, Gwyn Daniel, 2018-05-08 In this volume as the title indicates the focus is on understanding and elaborating what might be said to be going on in supervision as well as further exploring what is distinctive about systemic supervision Looking at processes within systemic supervision involves engaging with the different contexts within which the supervision takes place and engaging with a range of theories some developed or applied within therapeutic contexts and others drawn from theories of learning Various theoretical frameworks have emerged and been described as underpinnings for systemic supervision Social constructionist and narrative ideas have been vital in the creation of supervisory practices that promote open dialogues multiple perspectives and the interrogation of traditional assumptions about expertise and hierarchy This has inevitably led to a discussion of tensions and contradictions

unease about implicit practices of power the problematics of assessment and evaluation and issues concerning the allocation of clinical responsibility Positioning theory dialogic theories and ideas from the field of adult education have also contributed helpful theoretical concepts for use by systemic supervisors

Conversations with Barth on Preaching Bishop William H. Willimon,2010-09-01 One of today s greatest preacher theologians engages one of the twentieth century s greatest teacher theologians on the meaning of preaching Readers of William H Willimon s many books have long found there the influence of Karl Barth probably the most significant theologian of the twentieth century In this new book Willimon explores that relationship explicitly by engaging Barth s work on the pitfalls and problems glories and grandeur of preaching the Word of God The Swiss theologian says the author expressed one of the highest theologies of preaching of any of the great theologians of the church Yet too much of Barth s understanding of preaching lies buried in the Church Dogmatics and other sometimes obscure sources Willimon brings this material to light introducing the reader to Barth s thought not just on the meaning but the practice of preaching as well
