Sharing The Wealth Workers And The World:

Sharing the Wealth Ethan B. Maguire, 2003-04-03 This book presents the work of the Sacred Choices Initiative of the Religious Consultation on Population Reproductive Health and Ethics The purpose of this Packard and Ford Foundation supported initiative is to attempt to change international discourse on family planning and to rescue this debate from superficial sloganeering by drawing on the moral stores of the world's major and indigenous religions In many of the world's religions there is a restrictive and pro natalist view on family planning and this is one legitimate reading of those religious traditions As the essays in this volume demonstrate however this is not the only legitimate or orthodox view These authors show that the parameters of orthodoxy are wider and gentler than that and that the great religious traditions are wiser and more variegated and nuanced than a simple repetition of the most conservative views would suggest This theme is carried out in essays on each of the world's major religious traditions written by scholar practitioners of those faiths *The Palgrave International Handbook of Basic Income* Malcolm Torry, 2023-10-20 This handbook brings together scholars from various disciplines and from around the world to examine the history characteristics effects viability and implementation of basic income The first edition of this book contributed a comprehensive treatment of multiple aspects of the basic income debate This updated expanded edition tackles new topics that are becoming increasingly prominent in the global debate New chapters are devoted to recent research on the history of basic income the development and peacemaking potential of basic income in conflict zones municipal experiments in the United States requirements for pilot projects and experiments and the public health implications of basic income Existing chapters on the implementation of basic income have also been substantially updated to take account of new

research on microsimulation land value tax local currencies and blockchain technology and cryptocurrency along with new material on the increasing use of opinion polls and the difficulties related to that New political and ethical perspectives on the role of trade unions and their increasing engagement with the basic income debate are also introduced while the section on pilot projects and experiments has been updated to cover recent political developments Fully updated to reflect new global developments in the basic income debate this handbook will be of interest to researchers teachers and research oriented policymakers in a range of fields

Managing Labor Migration in the Twenty-First Century Philip Martin, Manolo Abella, Christiane Kuptsch, 2008-10-01 Why have ninety million workers around the globe left their homes for employment in other countries What can be done to ensure that international labor migration is a force for global betterment This groundbreaking book presents the most comprehensive analysis of the causes and effects of labor migration available and it recommends sensible sustainable migration policies that are fair to migrants and to the countries that open their doors to them The authors survey recent trends in international migration for employment and demonstrate that the flow of authorized and illegal workers over borders presents a formidable challenge in countries and regions throughout the world They note that not all migration is from undeveloped to developed countries and discuss the murky relations between immigration policies and politics The book concludes with specific recommendations for justly managing the world's growing migrant workforce
