Sharing The Front Line And The Back Hills:

Sharing the Front Line and the Back Hills Yael Danieli, 2018-10-26 Sharing the Front Line and the Back Hills points to a crisis facing international institutions and the media who seek to alleviate and report human suffering throughout the world. The goals of the editor are to tell the story of thousands of individuals dedicated to helping others and to integrate issues of protection and care into all levels of planning, implementing and evaluating international intervention and action. The book identifies approaches that have proven useful and explores and suggests future directions. **Trauma Journalism** Mark H. Massé, 2011-10-06 A narrative approach advocating education for students and professionals on the impact of stress, trauma and intervention in the life of a journalist. **Journalism's Roving Eye** John Maxwell Hamilton, 2011-08-15 In all of journalism, nowhere are the stakes higher than in foreign news gathering. For media owners, it is the most difficult type of reporting to finance; for editors, the hardest to oversee. Correspondents roaming large swaths of the planet must acquire expertise that home-based reporters take for granted: facility with the local language, for instance, or an understanding of local cultures. Adding further to the challenges, they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs, a task made all the more daunting because of the consequence to national security. In *Journalism's Roving Eye*, John Maxwell Hamilton, a historian and former foreign correspondent, provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the cavalcade of colorful personalities who shaped readers' perceptions of the world across two centuries. From the colonial era when newspaper printers hustled down to wharves to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War, Hamilton explores journalism's constant and not always successful efforts at dishing the foreign news as James Gordon Bennett put it in the mid-nineteenth century to describe his approach in the *New York Herald*. He details the highly partisan coverage of the French Revolution, the early emergence of special correspondents and the challenges of organizing their efforts, the profound impact of the non-yellow press in the run-up to the Spanish American War, the increasingly sophisticated machinery of propaganda and censorship that surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe. From the Nazis' intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the Vietnam War, Hamilton covers every aspect of delivering foreign news to American doorsteps. Along the way, Hamilton singles out a fascinating cast of characters among them: Victor Lawson, the overlooked proprietor of the *Chicago Daily News* who pioneered the concept of a foreign news service geared to American interests; Henry Morton Stanley, one of the first reporters to generate news on his own with his 1871 expedition to East Africa to find Livingstone; and Jack Belden, a forgotten brooding figure who exemplified the best in

combat reporting Hamilton details the experiences of correspondents editors owners publishers and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry many fear that foreign reporting will soon no longer exist But as Hamilton shows in this magisterial work traditional correspondence survives alongside a new type of reporting Journalism s Roving Eye offers a keen understanding of the vicissitudes in foreign news an understanding imperative to better seeing what lies ahead War and Public Health Barry S. Levy, Victor W. Sidel, 2008 The first comprehensive examination of the relationship between war and public health this book documents the public health consequences of war and describes what health professionals can do to minimize these consequences and even help prevent war altogether It explores the effects of war on health human rights and the environment The health and environmental impact of both conventional weapons and weapons of mass destruction nuclear chemical and biological weapons is described in chapters that cover the consequences of their production testing maintenance use and disposal Separate chapters cover especially vulnerable populations such as women children and refugees In depth descriptions of specific military conflicts including the Vietnam War the Persian Gulf War and wars in Central America provide striking illustrations of the issues covered in other chapters A series of chapters explores the roles of health professionals and of organizations during war and in preventing war and its consequences This revised second edition includes seven new chapters including one on landmines by the Nobel Prize winning founding director of the International Campaign to Ban Landmines A wide range of individuals including physicians nurses and other health professionals will find this book enlightening and useful in their work The book will be valuable for faculty and students in schools of public health medicine nursing and other health professions In addition it will be useful to those working in the fields of law economics international studies peace and conflict resolution military studies diplomacy and sociology and in related disciplines The United Nations and Human Rights Frédéric Mégret, Philip Alston, 2020-04-02 The very concept of human rights implies governmental accountability To ensure that governments are indeed held accountable for their treatment of citizens and others the United Nations has established a wide range of mechanisms to monitor compliance and to seek to prevent as well as respond to violations The panoply of implementation measures that the UN has taken since 1945 has resulted in a diverse and complex set of institutional arrangements the effectiveness of which varies widely Indeed there is much doubt as to the effectiveness of much of the UN s human rights efforts but also about what direction it should take Inevitable instances of politicization and the hostile or at best ambivalent attitude of most governments has at times endangered the fragile progress made on the more technical fronts At the same time technical efforts cannot dispense with the complex politics of actualizing the promise of human rights at and through the UN In addition to significant actual and

potential problems of duplication overlapping and inconsistent approaches there are major problems of under funding and insufficient expertise The complexity of these arrangements and the difficulty in evaluating their impact makes a comprehensive guide of the type provided here all the more indispensable These essays critically examine the functions procedures and performance of each of the major UN organs dealing with human rights including the Security Council and the International Court of Justice as well as the more specialized bodies monitoring the implementation of human rights treaties Significant attention is devoted to the considerable efforts at reforming the UN s human rights machinery as illustrated most notably by the creation of the Human Rights Council to replace the Commission on Human Rights The book also looks at the relationship between the various bodies and the potential for major reforms and restructuring

Protection of Civilians Haidi Willmot,Ralph Mamiya,Scott Sheeran,Marc Weller,2016-04-15 The protection of civilians is a highly topical issue at the forefront of international discourse and has taken a prominent role in many international deployments It has been at the centre of debates on the NATO intervention in Libya UN deployments in Darfur South Sudan and the Democratic Republic of the Congo and on the failures of the international community in Sri Lanka and Syria Various described as a moral responsibility a legal obligation a mandated peacekeeping task and the culmination of humanitarian activity it has become a high profile concern of governments international organisations and civil society and a central issue in international peace and security This book offers a multidisciplinary treatment of this important topic harnessing perspectives from international law and international relations traversing academia and practice Moving from the historical and philosophical development of the civilian protection concept through relevant bodies of international law and normative underpinnings and on to politics and practice the volume presents coherent cross cutting analysis of the realities of conflict and diplomacy In doing so it engages a series of current debates including on the role of politics in what has often been characterized as a humanitarian endeavour and the challenges and impacts of the use of force The work brings together a wide array of eminent academics and respected practitioners incorporating contributions from legal scholars and ethicists political commentators diplomats UN officials military commanders development experts and humanitarian aid workers As the most comprehensive publication on the subject this will be a first port of call for anyone studying or working towards a better protection of civilians in conflict [Making Choices for Peace](#) Elias Omondi Opongo,2006

Love and Liberation Lauren Carruth,2021-10-15 Lauren Carruth s Love and Liberation tells a new kind of humanitarian story The protagonists are not volunteers from afar but rather Somali locals caring for each other nurses aid workers policymakers drivers community health workers and bureaucrats The contributions of locals are often taken for granted and the competencies aspirations and effectiveness of local staffers frequently remain muted or absent from the planning and evaluation of humanitarian interventions structured by outsiders Relief work is traditionally imagined as politically neutral and impartial and interventions are planned as temporary extraordinary and distant Carruth provides an alternative vision of what

humanitarian response means in practice not driven by International Humanitarian Law the missions of Western relief organizations or trends in the aid industry or academia but instead by what Somalis call samafal Samafal is structured by the cultivation of lasting relationships of care interdependence kinship and ethnic solidarity Samafal is also explicitly political and potentially emancipatory humanitarian responses present opportunities for Somalis to begin to redress histories of colonial partitions and to make the most out of their political and economic marginalization By centering Love and Liberation around Somalis understanding and enactments of samafal Carruth offers a new perspective on politics and intervention in Africa

Biobehavioral Resilience to Stress Brian J Lukey, Victoria Tepe, 2008-03-19 Military service involves exposure to multiple sources of chronic acute and potentially traumatic stress especially during deployment and combat Notoriously variable the effects of stress can be subtle to severe immediate or delayed impairing individual and group readiness operational performance and ultimately survival A comprehensive co

Modern Warfare Benjamin Perrin, 2012-05-15 The face of modern warfare is changing as more and more humanitarian organizations private military companies and non state armed groups enter complex security environments such as Iraq Afghanistan and Haiti Although this shift has been overshadowed by legal issues connected to the War on Terror and intervention in countries such as Rwanda and Sudan it has caused some to question the relevance of the laws of war Modern Warfare explores the law s failure and potential to ensure compliance in the context of a changing military landscape by doing so it opens a path to preventing further unnecessary suffering and violence

Dark Threats and White Knights Sherene Razack, 2004-12-15 Somalia March 4 1993 Two Somalis are shot in the back by Canadian peacekeepers one fatally Barely two weeks later sixteen year old Shidane Abukar Arone is tortured to death Dozens of Canadian soldiers look on or know of the torture The first reports of what became known in Canada as the Somalia Affair challenged national claims to a special expertise in peacekeeping and to a society free of racism Today however despite a national inquiry into the deployment of troops to Somalia what most Canadians are likely to associate with peacekeeping is the nation s glorious role as peacekeeper to the world Moments of peacekeeping violence are attributed to a few bad apples bad generals and a rogue regiment In Dark Threats and White Knights Sherene H Razack explores the racism implicit in the Somalia Affair and what it has to do with modern peacekeeping Examining the records of military trials and the public inquiry Razack weaves together two threads that of the violence itself and what would drive men to commit such atrocities and secondly the ways in which peacekeeping violence is largely forgiven and ultimately forgotten Race disappears from public memory and what is installed in its place is a story about an innocent morally superior middle power nation obliged to discipline and sort out barbaric third world nations Modern peacekeeping Razack concludes maintains a colour line between a family of white nations constructed as civilized and a third world constructed as a dark threat a world in

which violence is not only condoned but seen as necessary

Happiness in Journalism Valérie Bélair-Gagnon, Avery E. Holton, Mark Deuze, Claudia Mellado, 2023-11-14 This book examines how journalism can overcome harmful institutional issues such as work related trauma and precarity focusing specifically on questions of what happiness in journalism means and how one can be successful and happy on the job Acknowledging profound variations across people genres of journalism countries types of news organizations and methodologies this book brings together an array of international perspectives from academia and practice It suggests that there is much that can be done to improve journalists subjective well being despite there being no one size fits all solution It advocates for a shift in mindset as much in theoretical as in methodological approaches moving away from a focus on platforms and adaptation to pay real attention to the human beings at the center of the industry That shift in mindset and approach involves exploring what happiness is how happiness manifests in journalism and media industries and what future we can imagine that would be better for the profession Happiness is conceptualized from both psychological and philosophical perspectives Issues such as trauma harassment inequality digital security and mental health are considered alongside those such as precarity recruitment emotional literacy intelligence resilience and self efficacy Authors point to norms values and ethics in their regions and suggest best practices based on their experience Constituting a first of its kind study and guide Happiness in Journalism is recommended reading for journalists educators and advanced students interested in topics relating to journalists mental health and emotion media management and workplace well being This book is accompanied by an online platform which supports videos exercises reports and links to useful further reading
