Zakes Mda, 2006-10-17 A voice for which one should feel not only affection but admiration The New York Times The Whale Caller Zakes Mda's fifth novel is his most enchanting and accessible book yet a romantic comedy of sorts in which the changing face of post apartheid South Africa is revealed through prodigious lyrical storytelling As the novel opens the seaside village of Hermanus on the country's west coast is overrun with whale watchers foreign tourists wearing floral shirts

and toting expensive binoculars determined to see whales in their natural habitat But when the tourists have gone home the Whale Caller lingers at the shoreline wooing a whale he calls Sharisha with cries from a kelp horn When Sharisha fails to appear for weeks on end the Whale Caller frets like a jealous lover oblivious to the fact that the town drunk Saluni a woman who wears a silk dress and red stiletto heels is infatuated with him After much ado which Mda relates with great relish the two misfits fall in love But each of them is ill equipped for romance and their on again off again relationship suggests something of the fitful nature of change in post apartheid South Africa where just living from one day to the next can be challenge enough Mda has spoken of the end of apartheid as a lifting of the South African novelist's burden to write on political subjects With *The Whale Caller* he has written a tender charming novel the work of a virtuoso among international writers

Minority and Indigenous Trends 2020 - Focus on technology Peter Grant, Carl Söderbergh, 2020-10-15 Technology increasingly permeates every aspect of our lives from the use of big data to information and communication technologies ICTs to artificial intelligence AI and automation These developments are often framed around issues such as efficiency speed and innovation but for minorities indigenous peoples and other marginalized groups there are often very different forces at play the replication of existing patterns of exclusion in new forms While a central aim of the Sustainable Development Goals SDGs was to reduce social inequalities within societies the outbreak of the Covid 19 pandemic has highlighted how profound the gap remains for minorities and indigenous peoples in many countries Though there is much hope and uncertainty around the possibilities of track and trace mobile applications and other emerging technologies to resolve the crisis without a firm commitment to social justice and universal access it is likely that many will be denied their benefits With minorities and indigenous peoples disproportionately represented among the world's poor it is not surprising that poverty is itself a major barrier to these groups accessing mobile phones computers and other technologies Besides the issue of affordability there may be physical and geographic constraints particularly for communities in rural or remote locations In addition other hurdles such as limited information in minority or indigenous languages can compound lack of access For marginalized groups within minority and indigenous communities such as persons with disabilities further significant issues arise for instance whether websites are accessible and compatible with assistive

technologies The need for a more holistic approach to technology is therefore more urgent than ever with an emphasis not only on affordable pricing and accessible delivery but also culturally appropriate and inclusive design Importantly an inclusive approach to technology should translate not only to equitable access as users but also meaningful participation in their development At present however minority and indigenous employment in sectors such as computing remains low This poses a fundamental challenge to the creation of more diverse technologies downstream **Garry Kilworth SF Gateway**

Sprenger, 2015-11-19 Animism refers to ontologies or worldviews which assign agency and personhood to human and non  
human beings alike Recent years have seen a revival of this concept in anthropology where it is now discussed as an  
alternative to modern Western naturalistic notions of human environment relations Based on original fieldwork this book  
presents a number of case studies of animism from insular and peninsular Southeast Asia and offers a comprehensive  
overview of the phenomenon its diversity and underlying commonalities and its resilience in the face of powerful forces of  
change Critically engaging with the current standard notion of animism based on hunter gatherer and horticulturalist  
societies in other regions it examines the roles of life forces souls and spirits in local cosmologies and indigenous religion It  
proposes an expansion of the concept to societies featuring mixed farming sacrifice and hierarchy and explores the question  
of how non human agents are created through acts of attention and communication touching upon the relationship between  
animist ontologies world religion and the state Shedding new light on Southeast Asian religious ethnographic research the  
book is a significant contribution to anthropological theory and the revitalization of the concept of animism in the humanities  
and social sciences
