Market Encounters Bianca Murillo explores the shifting social terrains that made the buying and selling of goods in modern Ghana possible Fusing economic and business history with social and cultural history she traces the evolution of consumerism in the colonial Gold Coast and independent Ghana from the late nineteenth century through to the political turmoil of the 1970s Murillo brings sales clerks market women and everyday consumers in Ghana to the center of a story that is all too often told in sweeping metanarratives about what happens when African businesses are incorporated into global markets By emphasizing the centrality of human relationships to Ghana's economic past Murillo introduces a radical rethinking of consumption studies from an Africa centered perspective The result is a keen look at colonial capitalism in all of its intricacies legacies and contradictions including its entanglement with gender and race Critical Terms for the Study of Africa Gaurav Desai, Adeline Masquelier, 2018-12-07 For far too long the Western world viewed Africa as unmappable terrain a repository for outsiders wildest imaginings This problematic notion has had lingering effects not only on popular impressions of the region but also on the development of the academic study of Africa Critical Terms for the Study of Africa considers the legacies that have shaped our understanding of the continent and its place within the conceptual grammar of contemporary world affairs Written by a distinguished group of scholars the essays compiled in this volume take stock of African studies today and look toward a future beyond its fraught intellectual and political past Each essay discusses one of our most critical terms for talking about Africa exploring the trajectory of its development while pushing its boundaries Editors Gaurav Desai and Adeline Masquelier balance the choice of twenty five terms between the expected and the unexpected calling for nothing short of a new mapping of the scholarly field. The result is an essential reference that will challenge assumptions stimulate lively debate and make the past present and future of African Studies accessible to students and teachers alike **Africa** Toyin Falola, Daniel Jean-Jacques, 2015-12-14 These volumes offer a one stop resource for researching the lives customs and cultures of Africa's nations and peoples Unparalleled in its coverage of contemporary customs in all of Africa this multivolume set is perfect for both high school and public library shelves The three volume encyclopedia will provide readers with an overview of contemporary customs and life in North Africa and sub Saharan Africa through discussions of key concepts and topics that touch everyday life among the nations peoples While this encyclopedia places emphasis on the customs and cultural practices of each state history politics and economics are also addressed Because entries average 14 000 to 15 000 words each contributors are able to expound more extensively on each country than in similar encyclopedic works with shorter entries As a result readers will gain a more complete understanding of what life is like in Africa s 54 nations and territories and will be better able to draw cross cultural comparisons based on their reading Monetary Transitions Karin Pallaver, 2021-11-16 This book uses money as a lens through which to analyze the social and economic impact of colonialism on African societies and institutions It is the first book to address the monetary history of the colonial period in a comprehensive way covering several areas of the continent and different periods with the

ultimate aim of understanding the long term impact of colonial monetary policies on African societies While grounding an understanding of money in terms of its circulation acceptance and impact this book shows first and foremost how the monetary systems that resulted from the imposition of colonial rule on African societies were not a replacement of the old currency systems with entirely new ones but were rather the result of the convergence of different orders of value and monetary practices By putting histories of people using money at the heart of the story and connecting them to larger imperial policies the volume provides a new and fresh perspective on the history of the establishment of colonial rule in Africa This book is the result of a collaborative and interdisciplinary research project that has received funding by the Gerda Henkel Foundation The contributors are both junior and senior scholars based at universities in Europe Africa Asia and the US who are all specialists on the history of money in Africa It will appeal to an international audience of scholars and educators interested in African Studies and History Economic History Imperial and Colonial History Development Studies **Monetary Studies** The Ashgate Research Companion to Modern Imperial Histories John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures

which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire
