Treasures of the Sea Murray S. Kaufman, Paul Kanner, 2018 **Companion For The Shell Collector** Sven Erik Gehrmann, 2021-06-29 This work is based on the WORLD REGISTER OF MARINE SPECIES WORMS which is an international platform of science This includes the currently valid scientific names and systematics of our recent marine animals This book presents more than 600 different species of marine and freshwater molluscs It also includes some species of sea urchins starfish and arthropods bringing the total number of diverse species to more than 780 The work places the species in the context of their habitats their survival and reproduction strategies and their aquaristic durability if live specimens can be obtained This book presents both The live animals for the vivarists and their empty shells for the collectors Many of the species shown here are not common unusual or even rare In addition some photos of original habitats and aquarium photographs round off the work In passing the book also comments on some current environmental problems which are unfortunately usually not mentioned in conventional works on this subject A very informative book which should inspire reflection and action at the same time *THE ANIMALS OF THE NORTH SEA 3* Sven Erik Gehrmann, 2023-04-27 Part 3 of this book series puts the invertebrates of the North Sea from molluscs to diverse cnidarians in the context of the changing living conditions in this small part of the one big ocean The book presents a balance between long established species and immigrants from the subtropics Aspects of fishing ecology and aquarium keeping were also included in this work In addition the preservation of cephalopods was also addressed It would be very welcome if in the future more people would concern themselves with the care and preservation of the wondrous and multifarious inhabitants of the North Sea For unfortunately many of the species shown here seem to be largely unknown to a wider public which is why they hardly seem to have a real lobby in practice So we should better get to know our endemic species before they become extinct **The Pirates'**
