Torres, 2014-05-15 Print CourseSmart *Nonprofits in Policy Advocacy* Sheldon Gen, Amy Conley Wright, 2020-08-01 Policy advocacy is an increasingly important function of many nonprofit organizations as they seek broad social changes in their concerning issues Their advocacy practices however have often been guided by their own past experiences anecdotes from peer networks and consultant advice Most of their practices have largely escaped empirical and theoretical grounding that could better root their work in established theories of policy change The first book of its kind Nonprofits in Policy Advocacy bridges this gap by connecting real practices of on the ground policy advocates with the burgeoning academic literature in policy studies In the process it empirically identifies six distinct policy advocacy strategies and their accompanying tactics used by nonprofits Case studies tell the stories of how advocates apply these strategies in a wide variety of issues including civil rights criminal justice education energy environment public health public infrastructure and youth This book will appeal

The Nature of the Nonprofit Sector J Steven Ott, Lisa Dicke, 2021-05-27 The Nature of the Nonprofit Sector is a collection of insightful and influential classic and recent readings on the existence forms and functions of the nonprofit sector the sector that sits between the market and government The readings encompass a wide variety of perspectives and disciplines and cover everything from Andrew Carnegie's turn of the century philosophy of philanthropy to the most recent writings of current scholars and practitioners Each of the text's ten parts opens with a framing essay by the editors that provides an overview of the central themes and issues as well as sometimes competing points of view The fourth edition of this comprehensive volume includes both new and classic readings as well as two new sections on the international NGO sector and theories about intersectoral relations The Nature of the Nonprofit Sector Fourth Edition is therefore an impressively up to date reader designed to provide students of nonprofit and public management with a thorough overview of this growing field The State of Nonprofit America Lester M Salamon, 2012-05-14 Today America's nonprofit organizations seem caught

in a force field buffeted by four impulses voluntarism professionalism civic activism and commercialism Too little attention however has been paid to the significant tensions among these impulses Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole In this second edition of an immensely successful volume Lester Salamon and his colleagues offer an overview of the current state of America's nonprofit sector examining the forces that are shaping its future and identifying the changes that might be needed The State of Nonprofit America has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector which faces significant financial challenges during a time when its services are needed more than ever The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment **Social Enterprise in China** Echo Lei Wang, 2023-07-21 Wang offers an empirically based exploration into work integration social enterprises as a means for delivering social services in China Focusing on the political economy of

social enterprise development in China Wang examines the nature of the relationship between the state and social enterprises and the implications of such relationships for their institutional effectiveness She adopts a bottom up approach that investigates indigenous practices embedded within the local political context Common ground has been established internationally that the social enterprise model provides new ways of social service delivery that could potentially change and restructure the social welfare economy However the development path differs across social contexts especially in an authoritarian country like China This study provides insights into China s efforts to develop its social welfare sector and reinvigorate customary ideas about how public services could be better offered given the country s political economy This book will be of great interest to both scholars of China s political economy and those with an interest in the development of the social enterprise sector looking to see how this works in a Chinese context
