Numbers And Nationhood Writing Statistics In Nineteenth Century Italy:

Numbers and Nationhood Silvana Patriarca, 1996-10-03 Numbers and Nationhood explores the rise of statistics as a mode of representation in Italian society during the nineteenth century Silvana Patriarca examines the ideologies that informed numerical productions and the role that statistics played in generating a national image of Italy that nevertheless accentuated its internal territorial divisions This innovative study provides a fresh reading of the historiography of Risorgimento Italy bringing issues of science ideology and representation to the fore *A Companion to Nineteenth-Century Europe, 1789 - 1914* Stefan Berger, 2008-04-15 This Companion provides an overview of European history during the long nineteenth century from 1789 to 1914 Consists of 32 chapters written by leading international scholars Balances coverage of political diplomatic and international history with discussion of economic social and cultural concerns Covers both Eastern and Western European states including Britain Pays considerable attention to smaller countries as well as to the great powers Compares particular phenomena and developments across Europe *Italy's Margins* David Forgacs, 2014-03-27 Five case studies show how different people and places were marginalized and socially excluded as the Italian nation state was formed Italy's 'Southern Question' Jane Schneider, 2020-05-31 The Southern Question has been a major topic in Italian political economic and cultural life for a century and more During the Cold War it was the justification for heavy government intervention In contemporary Italy a major part of the appeal of the Lombard League has been its promise to dissociate the South from the North even to the point of secession The South also remains a resonant theme in Italian literature This interdisciplinary book endeavours to answer the following When did people begin to think of the South as a problem Who intellectuals statisticians criminologists political exiles novelists among them some important southerners contributed to the discourse about the South and why Did their view of the South correspond to any sort of reality What was glossed over or ignored in the generalized vision of the South as problematic What consequences has the Question had in controlling the imaginations and actions of intellectuals and those with political and other forms of power What alternative formulations might people create and live by if they were able to escape from the control of the Question and to imagine the political economic and cultural differences within Italy in some other way This timely book reveals how Southern Italians have been affected by distorted versions of a complex reality similar to the discourse of Orientalism In situating the devaluation of Southern Italian culture in relation to the recent emergence of anti mafia ideology in the South and the threat posed to national unity by the Lombard League it also illuminates the world's stiff inter regional competition for investment capital Empire of Nations Francine Hirsch, 2014-11-15 When the Bolsheviks seized power in 1917 they set themselves the task of building socialism in the vast landscape of the former Russian Empire a territory populated by hundreds of different peoples belonging to a multitude of linguistic religious and ethnic groups Before 1917 the Bolsheviks had called for the national self determination of all peoples and had condemned all forms of colonization as exploitative After attaining power however they

began to express concern that it would not be possible for Soviet Russia to survive without the cotton of Turkestan and the oil of the Caucasus In an effort to reconcile their anti imperialist position with their desire to hold on to as much territory as possible the Bolsheviks integrated the national idea into the administrative territorial structure of the new Soviet state In Empire of Nations Francine Hirsch examines the ways in which former imperial ethnographers and local elites provided the Bolsheviks with ethnographic knowledge that shaped the very formation of the new Soviet Union The ethnographers who drew inspiration from the Western European colonial context produced all union censuses assisted government commissions charged with delimiting the USSR s internal borders led expeditions to study the human being as a productive force and created ethnographic exhibits about the Peoples of the USSR In the 1930s they would lead the Soviet campaign against Nazi race theories Hirsch illuminates the pervasive tension between the colonial economic and ethnographic definitions of Soviet territory this tension informed Soviet social economic and administrative structures A major contribution to the history of Russia and the Soviet Union Empire of Nations also offers new insights into the connection between ethnography and empire

La Mamma Penelope Morris,Perry Willson,2018-06-07 The idea of the mamma italiana is one of the most widespread and recognizable stereotypes in perceptions of Italian national character both within and beyond Italy This figure makes frequent appearances in jokes and other forms of popular culture but it has also been seen as shaping the lived experience of modern day Italians of both sexes as well as influencing perceptions of Italy in the wider world This interdisciplinary collection examines the invented tradition of mammismo but also contextualizes it by discussing other often contrasting ways in which the role of mothers and the mother son relationship have been understood and represented in culture and society over the last century and a half both in Italy and in its diaspora

The Cost of Living in America, 1800-1980 John A. Garraty,1981 Prices constantly move up and down in response to changes in the supply of and demand for goods But they are also affected by the amount of money and credit that consumers can command

The Invention of Sustainability Paul Warde,2018-07-12 The issue of sustainability and the idea that economic growth and development might destroy its own foundations is one of the defining political problems of our era This groundbreaking study traces the emergence of this idea and demonstrates how sustainability was closely linked to hopes for growth and the destiny of expanding European states from the sixteenth century Weaving together aspirations for power for economic development and agricultural improvement and ideas about forestry climate the sciences of the soil and of life itself this book sets out how new knowledge and metrics led people to imagine both new horizons for progress but also the possibility of collapse In the nineteenth century anxieties about sustainability often driven by science proliferated in debates about contemporary and historical empires and the American frontier The fear of progress undoing itself confronted society with finding ways to live with and manage nature

Living the Revolution Jennifer Guglielmo,2010-05-03 Italians were the largest group of immigrants to the United States at the turn of the twentieth century and hundreds of thousands led and participated in some of the period s most volatile

labor strikes Jennifer Guglielmo brings to life the Italian working class women of New York and New Jersey who helped shape the vibrant radical political culture that expanded into the emerging industrial union movement Tracing two generations of women who worked in the needle and textile trades she explores the ways immigrant women and their American born daughters drew on Italian traditions of protest to form new urban female networks of everyday resistance and political activism She also shows how their commitment to revolutionary and transnational social movements diminished as they became white working class Americans

State-Making in an Age of Revolution, 1830-1880 Christos Aliprantis, Anna Ross, 2025-07-02

How did states expand in the mid nineteenth century While scholars now associate the period after the 1848 revolutions with a striking increase in state activity few have demonstrated how new state building measures were put into practice From France to Hungary and Scandinavia to Spain *State Making in An Age of Revolution* shows how officials went about implementing reform With original contributions grounded in extensive archival research this volume casts light on the scale at which officials relied on elites professionals and technical experts both inside and outside of government and even from outside their own states to carry out their expanding work Together these findings help us to re think the reach and nature of growing states during these pivotal decades of change
