Lerner's work presents a powerful and emotive treatise on the crisis facing America's youth Drawing on a wide range of statistical evidence to support his arguments he graphically demonstrates the risks of drug and alcohol abuse unsafe sexual practices teenage pregnancy school drop out and academic underachievement delinquency crime and violence facing American youth at historically unprecedented levels Lerner calls for a comprehensive and integrated national policy on youth to address these risk factors which he sees as threatening the very fabric of American society This is an authoritative well researched piece of work which takes a refreshing and positive look to the future of action research in collaboration with empowered communities to provide the needs and treasure the community resources which have in the past been paid scant attention It is both forward thinking and imaginative and will challenge researchers policy makers and practitioners faced with crisis of American youth Heather Leitch in *Journal of Adolescence*

Our nation's youth are at risk for drug and alcohol abuse unsafe sexual practices teen pregnancy academic underachievement delinquency and crime and violence What can be done to prevent these problems from occurring Outlining a vigorous call to arms this volume describes the steps needed to overcome these potential problems by enhancing academic researchers responsiveness to the needs of the community and encouraging them to apply the results of research findings to community outreach After reviewing the problems that beset today's youth Lerner offers a model developmental contextualism that provides a theoretical framework for viewing child and adolescent development in relation to specific features of environmental context such as family neighborhood society culture etc This model is used to describe the problems and the potentials that are associated with the bidirectional relationships between youth and their contexts Lerner asserts that by altering the context in which youth live researchers can test the effectiveness of policies and or programs in

creating desired changes in children's and adolescents' behavior and development. Researchers and practitioners interested in child and adolescent development, family studies, child and family policy, and program evaluation will find this thought-provoking book useful in their studies and programs. Brief and often abstract, the book first describes the crises facing America's children and adolescents. The ideas proposed by Lerner could transform programs for America's youth and revitalize applied research. Choice One of the nation's most eminent developmental psychologists has applied his mastery of adolescent research and theory to a new challenge. In *America's Youth in Crisis*, he focuses his attention on solutions, showing how research and outreach come together in successful prevention programs. Graham B. Spanier, Chancellor, University of Nebraska-Lincoln

Educating African American Students Abul Pitre, Esrom Pitre, Ruth Ray, Twana Hilton-Pitre, 2009-08-15

Using a combination of case studies and research, the contributors of this timely book highlight some of the significant issues: historical, curricular, and societal, that have led to African American students having a proportionally larger representation in special education classes, higher dropout rates, and more incidences of in-school race-on-race violence. The contributors draw from critical pedagogy, multicultural education, and the Afrocentric canon to critique the American educational system. *Educating African American Students* examines historical issues that are significant for understanding the current state of affairs for African American education, addresses problems and issues in social studies education, mathematics education, and the overrepresentation of African American males in special education, and poignantly illuminates the necessity for renewed activism by telling the stories of African American children and their schooling experiences.
