Professional C++
 Christophe Pichaud, 2022-11-10
 This book contains all the necessary knowledge to learn, think, and become a professional C developer for building real-world and critical software. It requires some basic knowledge that could be acquired at the University Engineering Schools or just by reading the right books for the right decision. C gave you the ability to create, design, think, and implement such amazing, big, big stuff without limits. The industry is led by C, and C++ Ok, everybody has heard about security, memory management, problem of unsecure stuff, and that bla bla. OK, listen to me, give me the list of all your applications on your laptop, and I promise to you 90% of them are made with C and C++. So who are the dinosaurs, C/C++ developers or Marketing Clowns that want you to drink Coca-Cola and Jack Daniel's on the morning on twelve and in the afternoon? The World is Built on C by Herb Sutter. The C++ Is The Invisible Foundation of Everything by Bjarne Stroustrup. Windows, Office, Linux, LibreOffice, Chrome, and all the C++ backed Linux shared libraries are done with native stuff. From GCC, Clang to CL EXE shipped with Visual Studio from my Microsoft friends in Redmond. Just dive and sometimes deep dive into C++. It's an infinite source of learning, different way to cook. You will embrace the way GAFAM are developing software. Real World Wide software and all World Wide Critical software that makes our world running for the business, the economy, and the Cloud, the gaming, the medical, the energy, the military, and the old embedded industry reborn as IoT is all native, are using C++ Native. World Is The Real Answer from A Complex World. Note if you are a JS, TS, NET, Java, PHP developers, read this book. Don't be afraid. And then you will know why we rule the world.
